## Additional Backup Information

This project will decommission the Harris Branch Wastewater Treatment Plant located along Arlington Mill Road. As part of the decommissioning, 7,700 linear feet of 36-inch diameter wastewater line will be installed to redirect the flow currently going to the Harris Branch Wastewater Treatment Plant to the Wild Horse Wastewater Treatment Plant along Blue Bluff Road in Manor, Texas. The decommissioning will eliminate the annual costs associated with its maintenance, monitoring and repair.

The Harris Branch Wastewater treatment plant has reached the end of its life cycle and a delay in the project may result in the continued expense of maintenance and repair. The project is meant to relieve it and prevent possible spills.

This project is being built within easements on privately owned property. The easements were acquired from the property owner. The project team has been in communication with the property owner.

Due to the potential for encountering unknown conditions, a 10% contingency in funding has been included to allow for the expeditious processing of any change orders. A contingency is an additional amount of money added to the construction budget to cover any unforeseen construction costs associated with the project.

The contract allows 365 calendar days for completion of this project. This project is located within zip code 78653 (District 1). The project will be managed by the Public Works Department.

SJ Louis Construction of Texas, Ltd. is located in San Antonio, Texas.
