

Garage Placement for New Single-Family Construction

LDC 25-2-1604

Attached or detached garages and/or *carports* with entrances that face a front yard must be located flush with or behind the front façade of a house. The width of a parking structure located less than twenty feet (20') behind the front façade of a house may not exceed fifty percent (50%) of the width of the façade of the house. For example, if the front façade of a house—not including the garage—is thirty feet (30') wide, then the garage may be no wider than fifteen feet (15').

There is no garage width limitation for side entry garages or for attached or detached garages and/or carports located twenty feet (20') or more behind the front façade of a house.
