Petition to Oppose Apartments on 3300 Oak Creek

We, the undersigned, oppose the apartments that are planned for 3300 Oak Creek Drive, as well as any re-zoning of the land for use of apartments. We ask that you advise the Texas Dept. of Housing and Community Affairs that the affordable housing tax grant, application number 16161, development name Elysium Park, does NOT meet with your approval. The site is not suitable for apartments for a number of reasons including: increases in already overcrowded traffic (increased inconvenience as well as safety issues for pedestrians), increases in already overcrowded schools, increased danger of flooding downstream, unsuitability of the land (karst - air pockets and caves) for heavy buildings, negative effect on water quality, and issues for the proposed development's residents, including lack of access to public transportation, inability to walk to nearby business, and safety issues due to close proximity to train tracks.

We, the undersigned, oppose the apartments that are planned for 3300 Oak Creek Drive, as well as any re-zoning of the land for use of apartments. We ask that you advise the Texas Dept. of Housing and Community Affairs that the affordable housing tax grant, application number 16161, development name Elysium Park, does NOT meet with your approval. The site is not suitable for apartments for a number of reasons including: Increases in already overcrowded traffic (Increased inconvenience as well safety issues for pedestrians), increases in already overcrowded schools, Increased danger of flooding downstream, unsuitability of the land (karst — air pockets and caves) for heavy buildings, negative effect on water quality, and issues for the proposed development's residents, including lack of access to public transportation, inability to walk to nearby business, and safety issues due to close proximity to train tracks

Petition to Oppose Apartments on 3300 Oak Creek

We, the undersigned, oppose the apartments that are planned for 3300 Oak Creek Drive, as well as any re-zoning of the land for use of apartments. We ask that you advise the Texas Dept. of Housing and Community Affairs that the affordable housing tax grant, application number 16161, development name Elysium Park, does NOT meet with your approval. The site is not suitable for apartments for a number of reasons including: increases in already overcrowded traffic (increased inconvenience as well as safety issues for pedestrians), increases in already overcrowded schools, increased danger of flooding downstream, unsuitability of the land (karst – air pockets and caves) for heavy buildings, negative effect on water quality, and issues for the proposed development's residents, including lack of access to public transportation, inability to walk to nearby business, and safety issues due to close proximity to train tracks.

Petition to Oppose Apartments on 3300 Oak Creek

We, the undersigned, oppose the apartments that are planned for 3300 Oak Creek Drive, as well as any re-zoning of the land for use of apartments. We ask that you advise the Texas Dept. of Housing and Community Affairs that the affordable housing tax grant, application number 16161, development name Elysium Park, does NOT meet with your approval. The site is not suitable for apartments for a number of reasons including: increases in already overcrowded traffic (increased inconvenience as well safety issues for pedestrians), increases in already overcrowded schools, increased danger of flooding downstream, unsuitability of the land (karst – air pockets and caves) for heavy buildings, negative effect on water quality, and issues for the proposed development's residents, including lack of access to public transportation, inability to walk to nearby business, and safety issues due to close proximity to train tracks

Petition to Oppose Apartments on 3300 Oak Creek

We, the undersigned, oppose the apartments that are planned for 3300 Oak Creek Drive, as well as any re-zoning of the land for use of apartments. We ask that you advise the Texas Dept. of Housing and Community Affairs that the affordable housing tax grant, application number 16161, development name Elysium Park, does NOT meet with your approval. The site is not suitable for apartments for a number of reasons including: increases in already overcrowded traffic (increased inconvenience as well as safety issues for pedestrians), increases in already overcrowded schools, increased danger of flooding downstream, unsuitability of the land (karst – air pockets and caves) for heavy buildings, negative effect on water quality, and issues for the proposed development's residents, including lack of access to public transportation, inability to walk to nearby business, and safety issues due to close proximity to train tracks

Petition to Oppose Apartments on 3300 Oak Creek

We, the undersigned, oppose the apartments that are planned for 3300 Oak Creek Drive, as well as any re-zoning of the land for use of apartments. We ask that you advise the Texas Dept. of Housing and Community Affairs that the affordable housing tax grant, application number 16161, development name Elysium Park, does NOT meet with your approval. The site is not suitable for apartments for a number of reasons including: increases in already overcrowded traffic (increased inconvenience as well safety issues for pedestrians), increases in already overcrowded schools, increased danger of flooding downstream, unsuitability of the land (karst – air pockets and caves) for heavy buildings, negative effect on water quality, and issues for the proposed development's residents, including lack of access to public transportation, inability to walk to nearby business, and safety issues due to close proximity to train tracks

Petition to Oppose Apartments on 3300 Oak Creek

We, the undersigned, oppose the apartments that are planned for 3300 Oak Creek Drive, as well as any re-zoning of the land for use of apartments. We ask that you advise the Texas Dept. of Housing and Community Affairs that the affordable housing tax grant, application number 16161, development name Elysium Park, does NOT meet with your approval. The site is not suitable for apartments for a number of reasons including: increases in already overcrowded traffic (Increased inconvenience as well safety issues for pedestrians), increases in already overcrowded schools, increased danger of flooding downstream, unsuitability of the land (karst – air pockets and caves) for heavy buildings, negative effect on water quality, and issues for the proposed development's residents, including lack of access to public transportation, inability to walk to nearby business, and safety issues due to close proximity to train tracks
