Additional Backup Information

The Austin Shelter for Women and Children provides continuous emergency shelter, basic needs, specialized counseling, childcare, and educational services for single women and women with dependent children. The 13,328 square-foot facility is located at 4523 Tannehill Lane. The City has recently executed a new 50-year lease with Travis County to operate the facility.

The shelter is in need of renovations in order to better serve the existing population of homeless women and children as well as expand to serve between 32–34 additional clients. To address the most critical facility needs and expansion programming, renovations must include fire suppression system, dining room expansion, Americans with Disabilities Act upgrades, code compliant kitchen ceiling and site improvements including irrigation, site drainage, tree rehabilitation and planting, new drive for emergency vehicle access, and a safe walking path. Expansion of the facility will also provide additional sleeping quarters for family groups with older males, expanded child care facility, and increased parking.

The facility will remain occupied by women and children during renovations making it imperative that the contractor have experience working under similar circumstances. The Competitive Sealed Proposal method of contracting has allowed the City to evaluate and score proposers on such comparable relevant experience so the services will be provided by a duly qualified and experienced contractor offering the best value to the City. A City-staffed panel reviewed, evaluated, and ranked the proposals based on published evaluation criteria. Council's authorization of this request allows for negotiation and execution of a contract with the top-ranked contractor that offers the best value to the City on the basis of published selection criteria. Should the City be unsuccessful in negotiating a satisfactory agreement with the top-ranked contractor, said contractor will be notified in writing that negotiations will cease. Pursuant to statute, staff will then proceed to negotiate with the next contractor in the order of selection ranking, returning to Council prior to contract execution.

The contract allows 440 calendar days for completion of this project. This project is located within zip code 78721 (District 1). The project will be managed by the Public Works Department.

IE2 Construction, Inc. is located in Austin, Texas.
