ZONING CHANGE REVIEW SHEET

CASE: C14-2016-0127 – Harris Tract Rezoning

ADDRESS: 1608 Barclay Drive

DISTRICT AREA: 8

OWNER/APPLICANT: Adam and Megan Harris

AGENT: Masterplan (Karen Wunsch)

ZONING FROM: Development Reserve (DR) TO: Single Family Residence Standard Lot (SF-2)

AREA: 1.62 acres (70567 sq. ft.)

SUMMARY STAFF RECOMMENDATION:

Staff recommends Single Family Residence Standard Lot (SF-2) district zoning.

ZONING AND PLATTING COMMISSION RECOMMENDATION:

JANUARY 3, 2017: RECOMMENDED SF-2 ON CONSENT. VOTE 9-0 [A. DENKLER, A. AGUIRRE 2nd, T. WEBER, S. LAVANI ABSENT]

DEPARTMENT COMMENTS

The subject property is an unplatted, 1.62 acre lot located adjacent to the Lost Creek, Barclay Heights and Woods at Westlake Subdivisions off of Capital of Texas Highway in West Austin. The property was annexed (full purpose) in 2001. It is currently developed with an empty two-story structure previously used as an office.

The surrounding area is developed with single family subdivisions to the north and east with SF-2 and SF-1 zoning. There is a range of lot sizes from 8500 square feet (Lost Creek) to 32000 square feet (Barclay Heights). To the south and west are Austin Water Utility property (water tower) and a telecommunications tower and the Barton Creek Greenbelt.

The applicant proposes to subdivide the tract into two “flag-lot” properties taking access to Barclay Drive via a shared driveway. This flag lot subdivision must meet code requirements and approval from the Zoning and Platting Commission.

The property sits at the top of a slope with approximately half in the Barton Creek watershed, the other is in the Eanes Creek watershed. Future development would be limited to 20% and 40% impervious cover respectively.

As the current pattern of zoning and use is primarily SF-2 and SF-1, the request for SF-2 district zoning is both consistent and compatible with adjacent properties.

ISSUES: Staff spoke with a neighbor who is concerned with lot size and potential property value reduction.

STAFF RECOMMENDATION

Staff recommends Single Family Standard Large Lot – (SF-2) district zoning.

BASIS FOR RECOMMENDATION

1. The proposed zoning should be consistent with the purpose statement of the district sought.
   Single-family residence standard lot (SF-2) district is the designation for a moderate density single-family residential use on a lot that is a minimum of 5,750 square feet. An SF-2 district designation may be applied to a use in an existing single-family neighborhood that has moderate sized lots or to new development of single-family housing on lots that are 5,750 square feet or more.

2. Zoning changes should promote compatibility with adjacent and nearby uses.
   Single family zoning and use is compatible with the adjacent single family zoning and uses.

3. Zoning should be consistent with approved and existing residential densities.
   The proposed request will result in consistent residential zoning as surrounding properties.

4. Granting of the request should result in an equal treatment of similarly situated properties.
   The request for SF-2 district zoning is both consistent and compatible with adjacent properties.

ADDITIONAL STAFF COMMENTS

Comprehensive Planning – Kathleen Fox, 512-974-7877

This zoning case is located on the west side of Barclay Drive, on a vacant parcel that is approximately 1.62 acres in size. This property is not located within the boundaries of a Neighborhood Plan Area. Surrounding land uses includes residential uses to the north, east

</table>
and west, and an undefined government uses with a large holding tank to the south. The proposed use is to subdivide one parcel into two single family lots.

The comparative scale of this site relative to other residential uses in this area, as well as the site not being located along an Activity Corridor or within an Activity Center, falls below the scope of Imagine Austin, which is broad in scope, and consequently the plan is neutral on the proposed rezoning.

NPZ Environmental Review - Mike Mcdougal 512-974-6380

1. The site is not located over the Edwards Aquifer Recharge Zone. The site is in the Barton Creek Watershed and in the Eanes Creek Watershed, which are classified as a Barton Springs Zone Watershed and a Water Supply Suburban Watershed, respectively. The site is in the Drinking Water Protection Zone.

2. In the Barton Creek Watershed portion of the property, impervious cover is limited to 20% of net site area. In the Eanes Creek Watershed portion of the property, impervious cover is limited as follows:

<table>
<thead>
<tr>
<th>Development Classification</th>
<th>% of Net Site Area</th>
<th>% NSA with Transfers</th>
</tr>
</thead>
<tbody>
<tr>
<td>One or Two Family Residential</td>
<td>30%</td>
<td>40%</td>
</tr>
<tr>
<td>Multifamily Residential</td>
<td>40%</td>
<td>55%</td>
</tr>
<tr>
<td>Commercial</td>
<td>40%</td>
<td>55%</td>
</tr>
</tbody>
</table>

3. According to floodplain maps there is no floodplain within or adjacent to the project location.

4. Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

5. Numerous trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development’s requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 512-974-1876. At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

6. In the Barton Creek Watershed portion of the property, development or redevelopment requires water quality control with increased capture volume and control of the 2 year storm on site. Runoff from the site is required to comply with pollutant load restrictions as specified in Land Development Code. In the Eanes Creek Watershed portion
of the property, development or redevelopment requires water quality control with increased
capture volume and control of the 2 year storm on site.

7. At this time, no information has been provided as to whether this property has any
preexisting approvals that preempt current water quality or Code requirements.

_Transportation, Ivan Naranjo, 512-974-7649_

TR1. FYI, additional right-of-way maybe required at the time of subdivision and/or site plan.

TR2. FYI, Chad Crager, Urban Trails, Public Works Department and Nathan Wilkes, Bicycle
Program, Austin Transportation Department may provide additional comments regarding
bicycle and pedestrian connectivity per the Council Resolution No. 20130620-056.

TR3. FYI, a traffic impact analysis was not required for this case because the traffic generated by
the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113]

_Water and Wastewater_

WW1. The landowner intends to serve the site with City of Austin water and wastewater utilities.
The landowner, at own expense, will be responsible for providing any water and wastewater utility
improvements, offsite main extensions, utility relocations and or abandonments required by the land
use. The water and wastewater utility plan must be reviewed and approved by the Austin Water
Utility for compliance with City criteria and suitability for operation and maintenance. Depending on
the development plans submitted, water and or wastewater service extension requests may be
required. All water and wastewater construction must be inspected by the City of Austin. The
landowner must pay the City inspection fee with the utility construction. The landowner must pay the
tap and impact fee once the landowner makes an application for a City of Austin water and
wastewater utility tap permit.

_Storm Water Detention_

At the time a final subdivision plat, subdivision construction plans, or site plan is submitted, the
developer must demonstrate that the proposed development will not result in additional identifiable
flooding of other property. Any increase in storm water runoff will be mitigated through on-site
storm water detention ponds, or participation in the City of Austin Regional Storm water
Management Program if available.

_Site Plan and Compatibility Standards_

SP 1. Site plans will be required for any new development other than single-family or duplex
residential.

PUBLIC HEARING INFORMATION

This zoning/rezoning request will be reviewed and acted upon at two public hearings: before the Land Use Commission and the City Council. Although applicants and/or their agent(s) are expected to attend a public hearing, you are not required to attend. However, if you do attend, you have the opportunity to speak FOR or AGAINST the proposed development or change. You may also contact a neighborhood or environmental organization that has expressed an interest in an application affecting your neighborhood.

During its public hearing, the board or commission may postpone or continue an application’s hearing to a later date, or may evaluate the City staff’s recommendation and public input forwarding its own recommendation to the City Council. If the board or commission announces a specific date and time for a postponement or continuation that is not later than 60 days from the announcement, no further notice is required.

During its public hearing, the City Council may grant or deny a zoning request, or rezone the land to a less intensive zoning than requested but in no case will it grant a more intensive zoning.

However, in order to allow for mixed use development, the Council may add the MIXED USE (MU) COMBINING DISTRICT to certain commercial districts. The MU Combining District simply allows residential uses in addition to those uses already allowed in the seven commercial zoning districts. As a result, the MU Combining District allows the combination of office, retail, commercial, and residential uses within a single development.

For additional information on the City of Austin’s land development process, visit our website: www.austintexas.gov/planning.

Comments:
Too many million $+ homes in
THE Eanes ISD is bad for the social
fabric of the ISD. Eanes is predominantly
upper-middle class focused on raising children.
The $+ demographic is changing the
character of Eanes in a negative way. Eanes
is unique and a national gem with remarkable
outcomes. Vainglorious households
from California, repeat with staff, change
the focus and character and eventually lowers
the outcomes of the ISD.
