Additional Backup Information				
<p>Austin Energy requests authorization to enter into an agreement with PSW Real Estate, to provide incentives, for a total amount not to exceed \$351,061, for the installation of solar electric systems on 147 single family residential homes and 48 condominium units located within six of their communities in Austin. The communities are located at:</p> <ul style="list-style-type: none"> - Eastline - 2000 East 7th St. (District 1) - Franklin Grove - 2001 E. M. Franklin Ave. (District 1) - North Bluff - 813 N. Bluff Dr. (District 2) - Lightsey Ridge - 1814 Lightsey Rd. (District 5) - Parkside - 4020 Airport Blvd. (District 9) - Cima Hills - 3704 Cima Serena (District 10) <p>The total installation cost is \$1,624,667 and the incentive will cover up to 22% of the cost. The ownership of the PV systems will transfer to the buyers of the individual single family homes and condominium units upon sale of the property. The solar incentive level is \$0.70 per watt-DC for a portion of the applications, totaling 219.22 kW-DC, and \$0.60 per watt-DC for the remainder of the applications, totaling 329.35 kW-DC. The solar equipment, which meets</p>				

Austin Energy program requirements, includes a total of 2,071 solar modules rated at 265 watts. The combined solar installations will have a total capacity of 455.31 kW-AC.

Austin Energy's solar program helps meet the community's solar goal of 950 MW by 2025, including 200 MW of local solar capacity, established in the updated Resource, Generation and Climate Protection Plan approved by City Council in December 2014. The solar program is designed to reduce the amount of electricity Austin Energy must purchase from the market and reduce associated greenhouse gas emissions.

These energy improvements will generate an estimated 797,065 kWh per year—enough to power 71 average Austin homes. This project is estimated to prevent the production of the following emissions each year: 528 tons of Carbon Dioxide (CO₂); 665 pounds of Sulfur Dioxide (SO₂); 735 pounds of Nitrogen Oxide (NOX); and 511 pounds of Carbon Monoxide (CO). These emissions reductions are equivalent to planting 12,296 trees or 615 acres of forest in Austin's parks or the removal of 1,074,589 vehicle miles or 91 cars from Austin roadways.

The Austin City Council launched Austin Energy's original solar photovoltaic (PV) rebate incentive program in 2004 (Resolution No. 040527-06) to benefit Austin residents and utility customers by: promoting the use of an environmentally-friendly and energy efficient renewable energy resource; promoting economic development for the development, recruitment and retention of renewable energy enterprises; and ensuring that Austin remains a local, national and international leader in the development and use of renewable energy.

Additional Backup Information				
<p>Austin Energy requests authorization to enter into an agreement with Target, to provide a performance-based incentive (PBI) for an amount not to exceed \$1,128,344.47 over a 10-year period, for the generation of solar energy at four of its facilities located within Austin Energy's service area. The Target stores included are located at 3702 S. FM 620 (in Travis County), 2300 W. Ben White Blvd. (Council District 5), 10900 Lakeline Mall Dr. (District 6) and 5300 S. MoPac Expy. (District 8).</p> <p>The total installation cost is \$3,448,134.40 and the incentive will cover up to 33% of the cost. The PBI levels for these projects range from \$0.02 to \$0.04 per kilowatt hour (kWh) for 10 years. The solar equipment, which meets Austin Energy program requirements, includes a total of 6866 solar modules rated at 320 and 325 watts. The combined solar installations will have a total capacity of 1.83 MW-AC.</p> <p>Austin Energy's solar program helps meet the community's solar goal of 950 MW by 2025, including 200 MW of local solar capacity, established in the updated Resource, Generation and Climate Protection Plan approved by City Council</p>				

in December 2014. The solar program is designed to reduce the amount of electricity Austin Energy must purchase from the market and reduce associated greenhouse gas emissions.

These new energy improvements will together generate an estimated 3,051,640 kWh per year— enough to power 270 average Austin homes for a year. This project is estimated to prevent the production of the following emissions each year: 2,020 tons of Carbon Dioxide (CO₂); 2,547 pounds of Sulfur Dioxide (SO₂); 2,816 pounds of Nitrogen Oxide (NO_x); and 1,957 pounds of Carbon Monoxide (CO). These emissions reductions are equivalent to planting 47,075 trees or 2,354 acres of forest in Austin's parks or the removal of 4,114,168 vehicle miles or 351 cars from Austin roadways.

The Austin City Council launched Austin Energy's original solar photovoltaic (PV) rebate incentive program in 2004 (Resolution No. 040527-06) to benefit Austin residents and utility customers by: promoting the use of an environmentally-friendly and energy efficient renewable energy resource; promoting economic development for the development, recruitment and retention of renewable energy enterprises; and ensuring that Austin remains a local, national and international leader in the development and use of renewable energy.

In 2010, City Council approved Resolution No. 20100204-003, revising Austin Energy's solar program for commercial customers by replacing the upfront rebate with "performance-based" payments. The PBI solar program offers commercial customers payments based on the metered solar production of their approved PV system for the first 10 years of operation. Payments are made as a monthly billing adjustment to the customers' electric account.

MBE / WBE:	<p>This solicitation was reviewed for subcontracting opportunities in accordance with City Code Chapter 2-9C Minority Owned and Women Owned Business Enterprise Procurement Program. For the services required for this solicitation, there were insufficient subcontracting opportunities; therefore, no subcontracting goals were established.</p>			
Additional Backup Information				

These contracts will provide weatherization services for Austin Energy. Austin Energy's weatherization program provides home energy improvements to customers with low to moderate incomes living in single-family homes. The improvements provided under this contract reduce customers' energy costs while creating a more comfortable and safe living environment. Austin Energy performs an initial audit of a home's energy performance prioritizing improvement measures necessary to increase the home's efficiency level. The weatherization services provided include: sealing the building structure to address air infiltration; duct repair or replacement; installing attic insulation, solar screens, smoke detectors, carbon monoxide detectors, and high efficiency lighting; tuning up existing air conditioning systems; and through a partnership with Austin Water, installing low-flow shower heads and aerators. Additional measures may be provided through partnerships with and referrals from entities such as the Austin Housing Repair Coalition and other non-profit organizations, Texas Gas Service, and the Neighborhood Housing and Community Development Department.

The current contracts expire on April 30, 2017 with a total authorization amount of \$2,800,000 per year and an average spend of approximately \$2,668,000 per year. The increase in requested authorization reflects the amount of unspent weatherization funds carried over from last fiscal year, the addition of three new services (air conditioning diagnostic testing, tune-up, and minor repair, and an increase in the number of homes to be weatherized. Austin Energy weatherized 778 homes in Fiscal Year 2015-2016 and anticipates weatherizing up to 1,000 homes per year under the new contracts, contingent on funding in future budgets.

An evaluation team with expertise in this area evaluated the offers and scored all recommended vendors as the best to provide these services based on pass/fail evaluations of minimum requirements including pricing, experience, personnel qualifications, and references.

A complete solicitation package, including a response list, is on file in the City's Purchasing Office and is available on the City's Financial Services Austin Finance Online website. Link: [Solicitation Documents](#)
