MEMORANDUM

DATE: March 22, 2017

SUBJECT: 5016 1/2 E. Ben White Blvd Rezoning – Sunridge Drive extension

Austin Transportation Department (ATD) and the Austin Fire Department (AFD) request that the extension or prohibition of the extension of Sunridge Drive to connect to Ben White Boulevard for vehicular access be considered at the site plan stage for this development. A traffic impact analysis (TIA) has not been completed to date; therefore, there is not adequate information available to assess the safety and mobility concerns with this zoning case.

From ATD's perspective, transportation and mobility decisions should be made with appropriate analysis as part of an engineering study. For this zoning case, by agreement of ATD, the Texas Department of Transportation (TxDOT) and the applicant, the TIA has been deferred to site plan. There are benefits of increased connectivity, and it is my professional opinion that it is appropriate to study the impacts of this potential connection through a TIA prior to making a decision about the extension. We understand the community is reticent of this connection, but we believe it should still be considered with a proper engineering analysis. In the future site plan stage, any decision regarding the extension of Sunridge Drive will not be administrative. It will be heard by the Planning Commission, per City process.

AFD notes that greater street/roadway connectivity improves emergency response times and leads to more effective response and better outcomes. Firefighting is equipment and manpower intensive. Multiple fire apparatus must be able to reach the fire scene and have room to operate. A fire apparatus, as opposed to a smaller ambulance, will almost always be the first unit to arrive at the scene of a medical emergency. For these reasons, the City spends a lot of money to locate, equip and staff fire stations throughout the City. Connectivity allows for more efficient utilization of these resources providing a positive financial impact.
