

# Smart Austin Strategic Roadmap

Briefing to City Council, May 16

# What's Inside

1. Review Council Resolution
2. Common Definition of Smart Cities
3. Maturing our capability
4. Needs and Gaps
5. Recommendations

# Goals

# Progress

A common, Austin-centered definition of Smart Cities

A statement of vision about Austin's Smart Cities future

Challenges on which we should focus and prioritize

Potential opportunities to address those challenges

Key goals & outcomes operationally for the City and for residents' equitable quality of life

An inventory of practices to consider

Core needs, gaps, and capabilities to deliver

Potential resources and means for partnering and financing initiatives

A prioritized list of projects to pursue

# How would integrated technology & real time data help?

## Homelessness Outreach Street Team

4 agencies across 2 jurisdictions working together to reduce:

- duplication, repetition of effort
- application do-overs
- gaps in providing service

Each agency has a technology system.

But when together they must work on paper.

# Austin's Smart City Strategic Intent

We are a city that becomes increasingly efficient in solving real problems for real people by:

- (i) engaging stakeholders and users
  - (ii) leading collaboratively,
  - (iii) working across disciplines, departments, and city systems, and
  - (iv) using data and integrated technologies
- to transform services and improve quality of life with and for *all* Austinites, businesses, and visitors.

# BOSTON SMART CITY PLAYBOOK

---

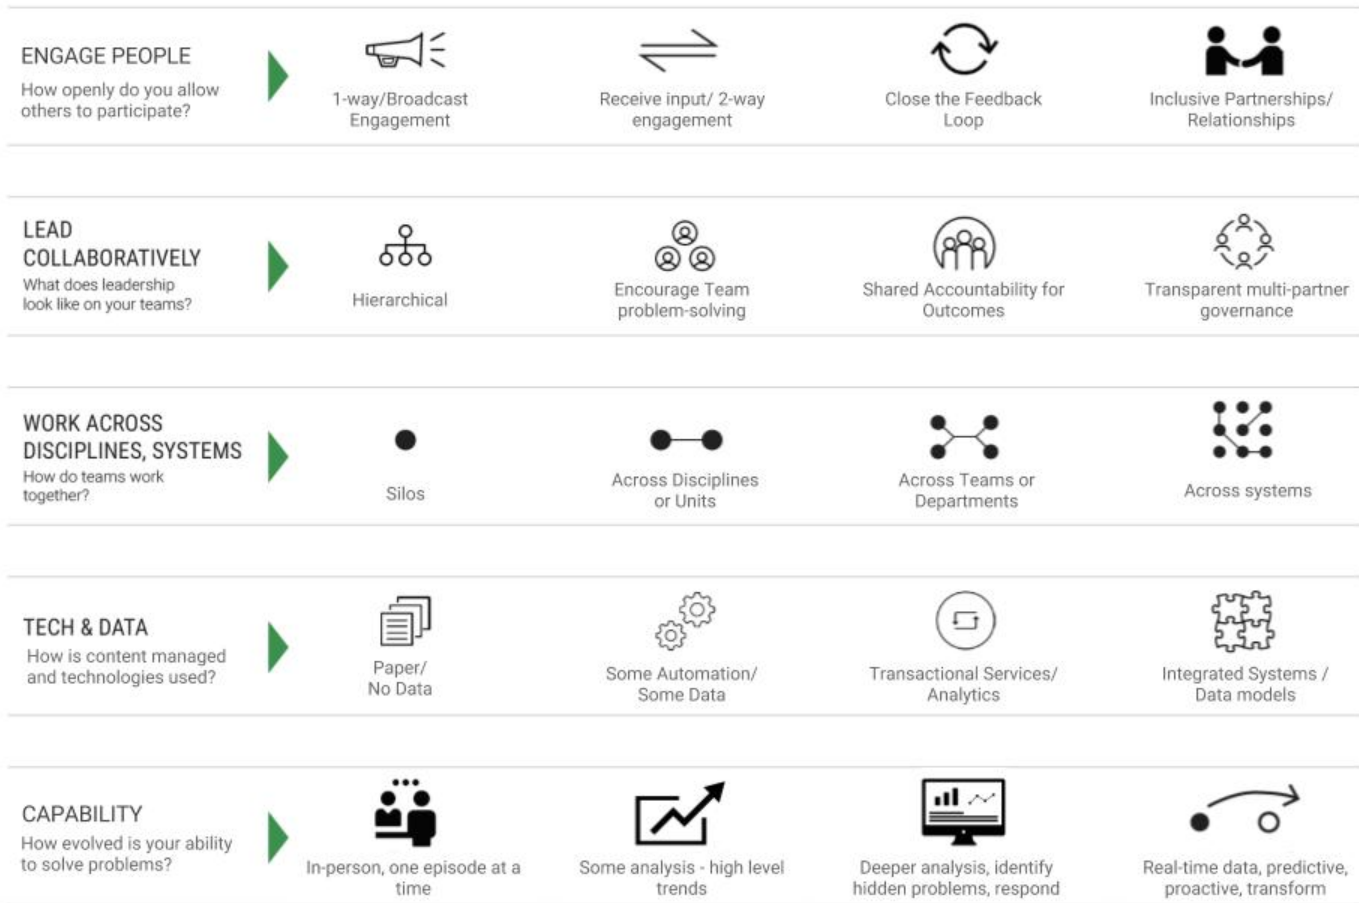

The age of the “Smart City” is upon us!

It's just that, we don't really know what that means. Or, at least, not yet.

So far, many “Smart City” pilot projects that we've undertaken here in Boston have ended with a glossy presentation, and a collective shrug. Nobody's really known what to do next, or how the technology and data might lead to new or improved services.

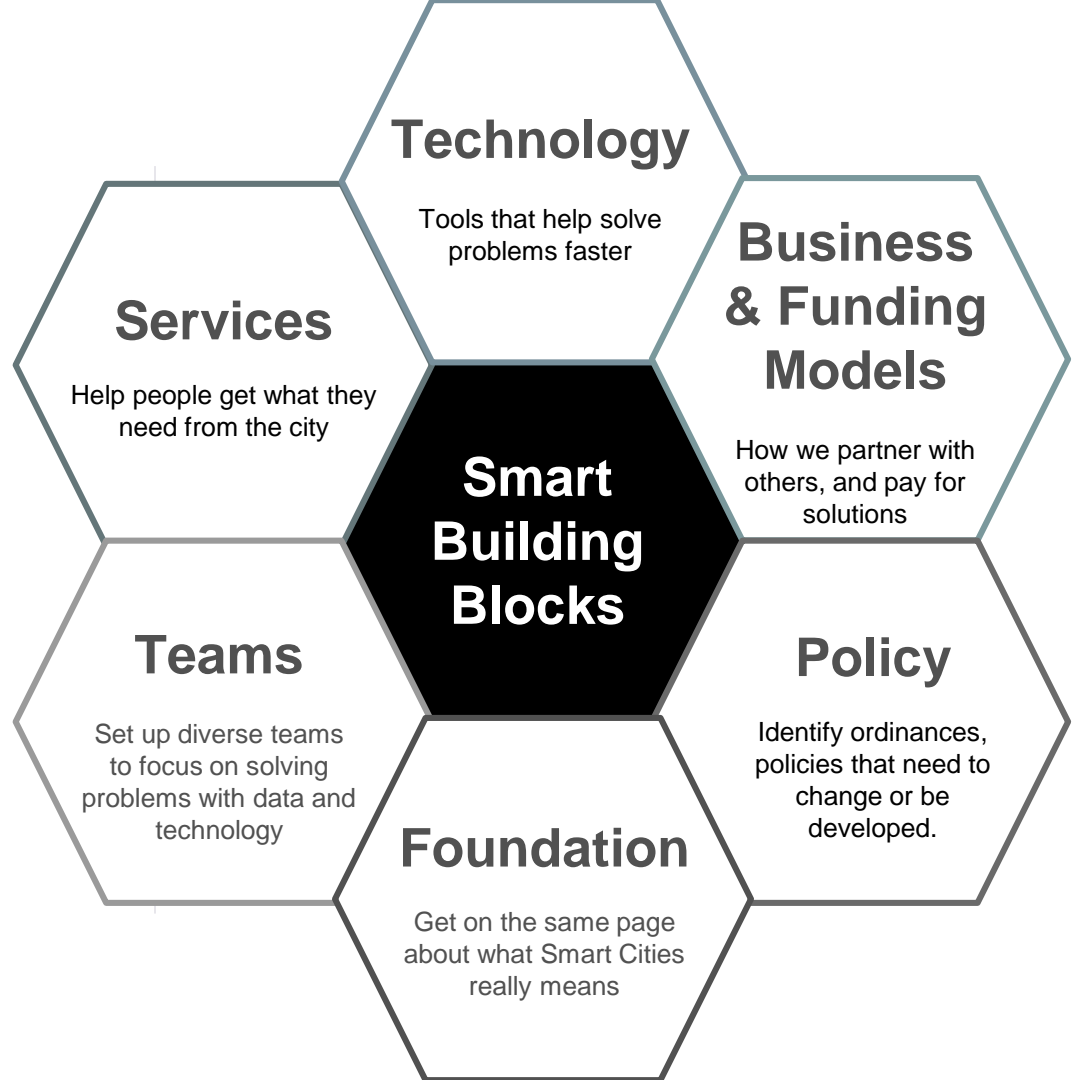

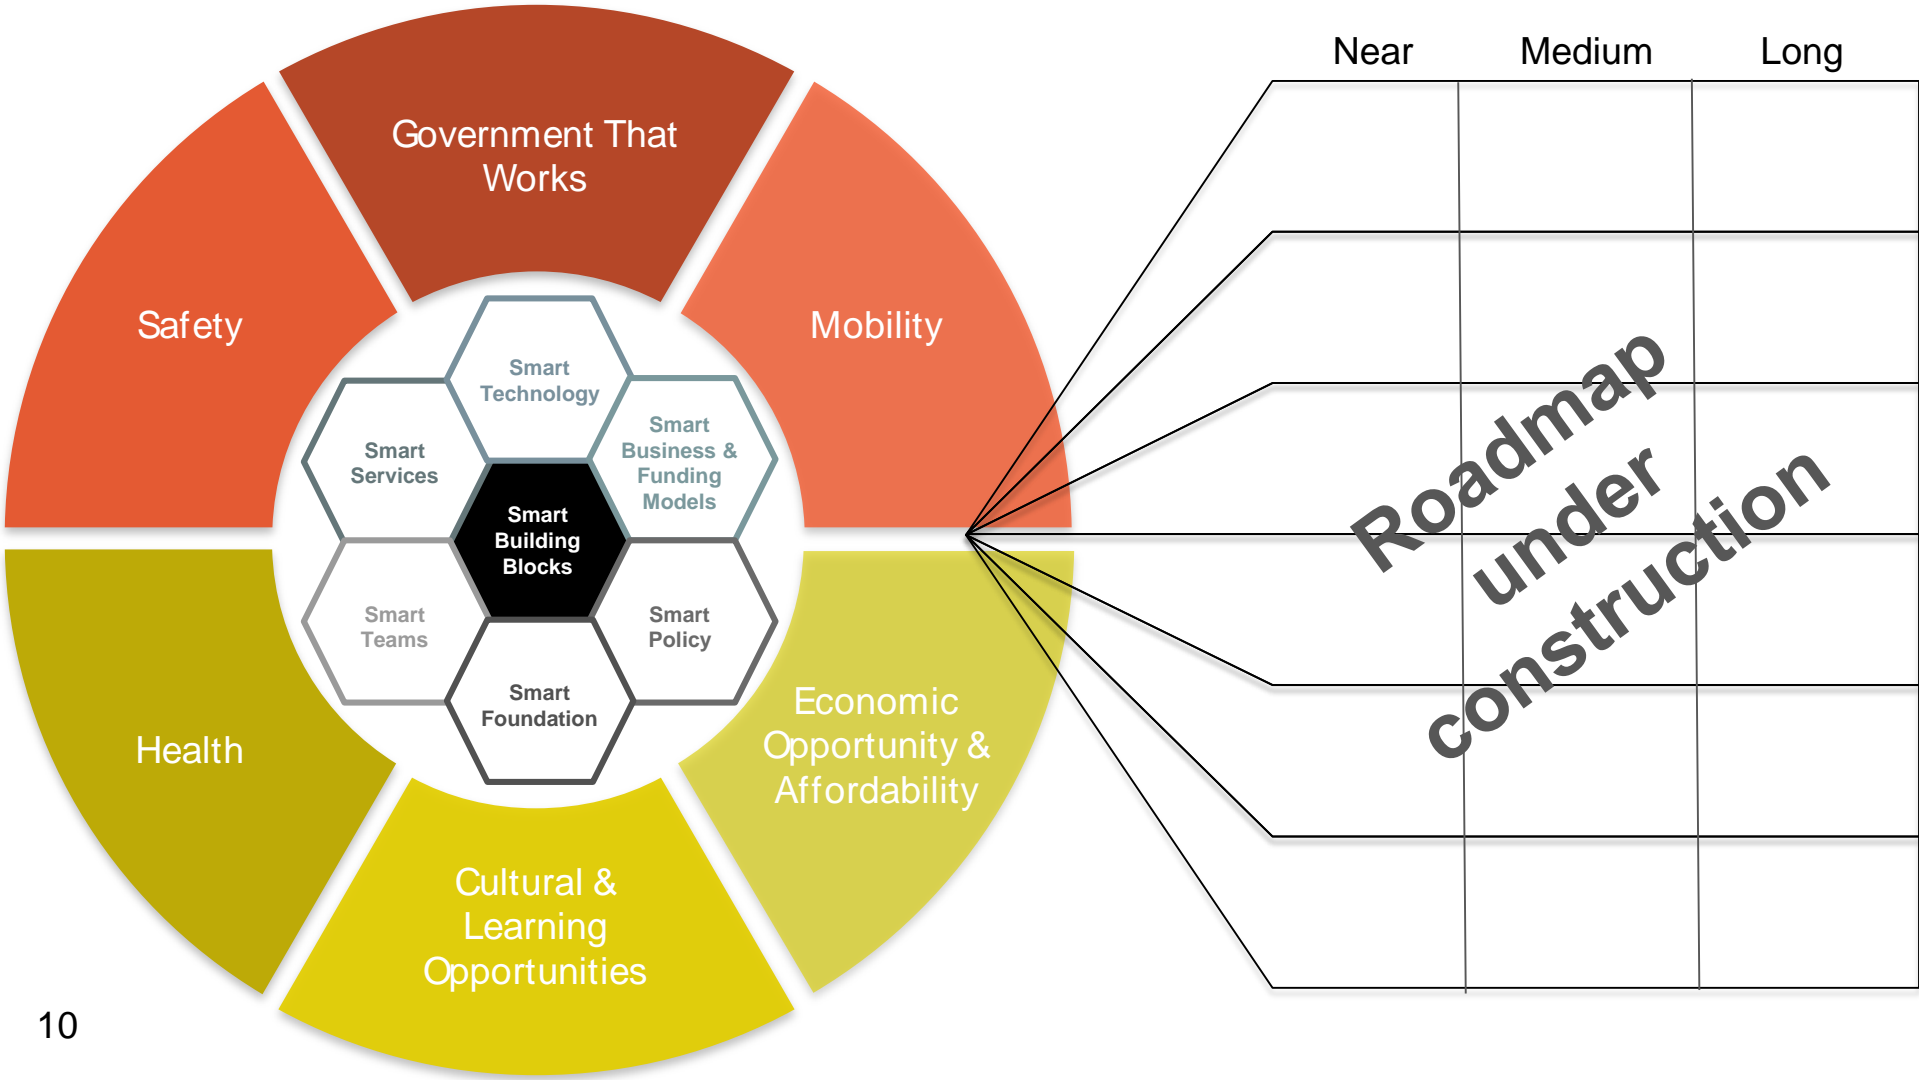

# Smart Cities Maturity Model

# Core needs, gaps, capabilities to deliver

# The hype cycle

## Open Data in San Francisco:

### *Institutionalizing an Initiative*

#### Phase 1:

The  
Executive  
Edict

This period is usually characterized by the creation of an Open Data Policy. Some groups are excited, some are skeptical. Most don't know how to start.

#### Phase 2:

The  
Publishing  
Scramble

During the publishing scramble a few or even many datasets are released with great fanfare. Some are high value and make a splash. Metadata needs and data quality may not be addressed.

#### Phase 3:

The  
Period of  
Stagnation

After the publishing scramble, low hanging fruit is hard to find. Tough issues, like timely data publishing arise. Some may recognize that those initial datasets have problems.

#### Phase 4:

The  
Resource  
Reckoning

New challenges emerge and the initiative lacks a clear path forward. Some recognize that no one "owns" the program and the need to dedicate resources emerges.

#### Phase 5:

The  
Integration of  
the Initiative

Open data is a part of doing business. Resources are allocated and data governance, roles and responsibilities, and standards are created and in practice.

Fiscal Year ⓘ

2016

2017

What am I looking at?

This dashboard reports the progress of the Austin Transportation Department's Annual Signal Timing Program. Beginning in 2017, traffic signal engineers will re-time approximately 1/3 of the city's 1,000+ signals each year, with the goal of ensuring signals are timed for optimum safety and performance. # Homelessness Outreach Street Team

Multi-agency team proactively meeting the needs of people living on the streets in downtown Austin.

2 Austin Police officers, 1-2 EMS community health paramedics, 3 Integral Care behavioral health specialists, 1 Downtown Austin Community Court case manager

**Goal:** Streamlined, accelerated collaborations between public safety agencies and service providers enable the *right intervention* with the *right resource* at the *right time* to:

- protect vulnerable individuals at risk of deteriorating
- interrupt hostile/aggressive behaviors
- prevent crisis and crime

in a way that supports access to services and housing.

How will we up our game?

**| A healthy and smart future - level 4**

# Seeds of transformation

- Dell Medical School
- Design Institute for Health
- Community Health Paramedics
- Homelessness Outreach Street Team
- Pay for Success Task Force
- Sobriety Center

Focus on the vulnerable

Integrated teams, “whole person” focus

Data Integration

New practices, operations, technologies

Optimum use of resources

Better outcomes

## Smart City Plays

1. Stop sending sales people
2. Solve real problems for real people
3. Don't worship efficiency
4. Better decisions, not (just) better data
5. Platforms make us go ~\\_(\ツ)\\_/~
6. Towards a "public" privacy policy

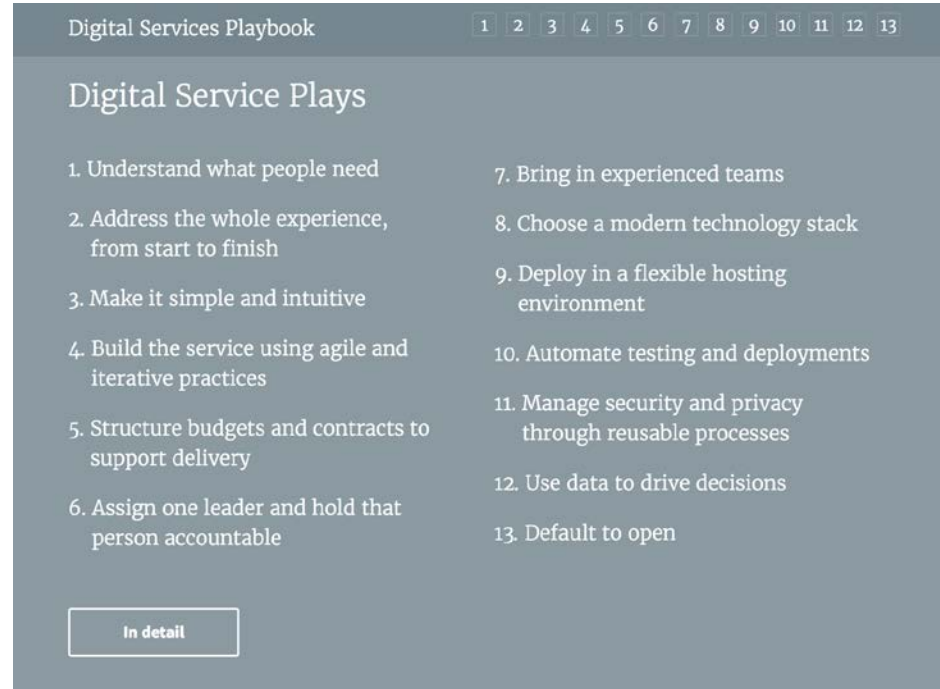

**In detail**

# Next steps to make change

1. Align to Council priorities
2. Budget for discovery to understand user needs
3. Budget for technology
4. Build or buy technology

## This is how you change things

Digital Services Playbook

1 2 3 4 5 6 7 8 9 10 11 12 13

### Digital Service Plays

1. Understand what people need
2. Address the whole experience, from start to finish
3. Make it simple and intuitive
4. Build the service using agile and iterative practices
5. Structure budgets and contracts to support delivery
6. Assign one leader and hold that person accountable
7. Bring in experienced teams
8. Choose a modern technology stack
9. Deploy in a flexible hosting environment
10. Automate testing and deployments
11. Manage security and privacy through reusable processes
12. Use data to drive decisions
13. Default to open

# Recommendations

1. Accept Smart City definition and maturity model
2. Invest in Smart Foundation Projects
  - Web Redesign
  - Paperless Initiative
  - Security Operation Center and Network Operation Center
3. Continue to assess department needs and projects
4. Provide update to Council early Fall

Questions?
