City of Austin Aquatic Master Plan Parks and Recreation Board Presentation

May 23, 2017

Master Plan Purpose

- Develop a planning tool to guide the 20 year vision for Austin's Aquatic System
- The Master Plan provides:
 - A tool to evaluate the suitability of existing and potential pool sites for current or future aquatic facilities
 - A process to establish sustainability benchmarks to determine the short and long term recommendations for pool operations & facilities
 - A long range plan based upon public engagement and a long term sustainable model
 - Model aquatic amenities and features to meet the current and future needs of Austin residents
 - Recommendations for environmental and fiscal sustainability

Public Engagement - Phases I-III

13,000

PARD Aquatic Division: Vision, Mission, & Goals

Vision

Lead the Aquatic Industry with the highest quality aquatic standards for safety, facilities, programming, and staffing

Mission

Provide a sustainable and equitably distributed system of outstanding aquatic facilities and programs

Goals

- Financially Sustainable System
- Diverse Facilities
- Year-Round Facilities
- Progressive, Responsive Programming

- Enhanced Operational Support
- Foster Partnerships
- Recruit & Retain High Performance Staff
- Environmental Sustainability

Proposed Aquatic Facility Classifications

Classification	Service Area	Pool Square Feet Sizes	Features
Neighborhood Pool	20-minute walk 5-minute drive	3,000 – 5,000 S.F. Zero depth entry; 25 m x 6-8 lanes	Recreation and Activity Pools
Community Pool	10-minute drive	5,000 – 7,000 S.F. Zero depth entry; 25 m x 6-8 lanes	Recreation and Activity Pools
Regional Aquatic Center	15-minute drive	7,000 – 12,000 S.F. 25-50 m long x 6-8 lanes	Interactive water play features, party/staff training room, youth fitness, may have 50 m length
Year-Round Basic Indoor Facility	15-minute drive	5,000 – 7,000 S.F. 25 yards x 6-8 lanes	Designed for training, fitness, and program use
Year-Round Premier Indoor Facility	30-minute drive	Over 10,000 S.F. 50 yards x 25 meter; Warm water pool; diving well	Designed for optimum training, fitness, competition, and program use

Process for Determining Site Suitability

- Establish a methodology to rank the suitability of:
 - 1. existing aquatic facilities;
 - 2. potential sites for development;
 - 3. renovation, expansion, consolidation, maintaining, or decommissioning (closure) of aquatic facilities.
- Will be used as a guide regarding future decision making policies on status of aquatic facilities

Suitability Ranking Categories

- Demographics (14 Elements)
- Site (7 Elements)
- Location (11 Elements)
- Accessibility (9 Elements)
- Infrastructure (9 Elements)
- Environmental (11 Elements)
- Regulatory (12 Elements)
- Operations (5 Elements)

Higher Weight

Lower Weight

Ranking Example

Aquatic Facility Site			
Criteria	Facility Potential	Weight	Givens
SITE SUITABILITY	Neighborhood	100%	64
RATING SCORE	Communty or Regional	100%	61
RANKING AS AN	Neighborhood		11
UPDATED OR	Community		9
EXPANDED POOL ²	Regional		8

Score out of 100 – Range 42-81 Score out of 100 – Range 49-71 Ranking out of 34 sites Ranking out of 18 sites Ranking out of 9 sites

<u>Score</u> – A higher number = more suitable for renovation, redevelopment or expansion. <u>Rank</u> – Rank compared to the others, with 1 being the highest/best

What is a Sustainable System?

Facilities

- Equitably accessible
- Within functional life span (25-30 years)
- Environmentally sustainable and energy efficient
- Up to current codes/standards
- Conserves water

Budget/Cost

- Operate within approved budget
- Generates revenue to established goals

• Staffing

- Manageable number of staff
- Comfortable working environment
- Promotes retainage of institutional knowledge
- Plans for succession and upward mobility

Maintenance/Operations

- Clean and safe pool environment
- Plans and budgets for scheduled equipment maintenance and replacement
- Centralized maintenance and storage
- Standardizes pool equipment
- Computerized, remote monitoring
- Minimizes unexpected major repairs

Programming

- Facilities conducive to programs
- Indoor year-round pools for training and programming
- Partnerships to promote water safety, programs, and to enhance outreach
- Instills a value of aquatics to future generations

Aquatic Facility Sustainability

Classification
% Deviation Above Baseline

Recommended Action

Evaluation Period

Sustainable

0% - 15% Deviation

Maintain operations; address all repair work to maintain at a sustainable level

Annual

Monitor

16% - 30% Deviation

Maintain operations; address minor repair work; consider options to maintain functionality for 1 season within sustainable range

Semi-Annual

Constrained

31% - 50% Deviation

Consider minor repair work needed to allow operation for 1 season within sustainable range; evaluate major repair work.

Monthly

Faulty >50% Deviation

Evaluate major repair work and develop repair estimate; consider repair if it results in additional 5 years at sustainable level; if not achievable, follow Master Plan recommendation

Monthly

Draft Master Plan -

Next Steps

- Complete Recommendations that include:
 - A. System of various sizes of facilities to serve Austin
 - B. Pool classification based upon ranking system and analysis of the criteria elements
 - C. Methods to achieve a more sustainable system
 - D. Capital cost projections and implementation plan
 - E. Maintenance and Operations recommendations
 - F. Program Recommendations

Final Public Input on Process and Preliminary Recommendations -

- Master Plan Team Meetings Aquatic Staff, Technical Advisory Group, District Representatives Group, & Aquatic Advisory Board Meeting
- Parks Board briefing of Master Plan
- Master Plan development update with Preliminary Recommendations
- Revisions to the draft recommendations
- Final Master Plan (June 2017)
