Additional Backup Information

The Planning Commission granted two requested compatibility setback waivers on a narrow commercial lot to allow the applicant to construct a hotel with a small pool. The adjacent landowner, the Church of Austin, (Tym Seay) has filed a site plan appeal of this decision and wishes it to be reconsidered by City Council.

The applicant for the site plan proposes to construct a 79-room hotel on the 1.5 acre lot and requested the waivers due to the difficult narrow configuration of the lot and to preserve existing large trees on the lot.

Both the hotel site plan lot and the adjacent church lot are zoned CS-V-CO-NP for the front half of the properties closest to Congress Avenue. The rear half of the hotel site is zoned GR-V-CO-NP, and the rear portion of the adjacent church property is zoned SF-3. The properties to the back property line of both lots are zoned SF-3. The SF-3 zoned properties trigger compatibility requirements to the south and west sides of the subject hotel property.

Staff recommends denial of the appeal, and approval of the variance request.
