Asian American population surge in Austin

Austin has highest percentage of Asian American Population in Texas (6.3% in 2012), even more than Houston (6.0%).

- *Greater Austin Chamber of Commerce*

Amazingly, by the middle of the next decade, the number of Asians in Austin will more than likely exceed the number of African Americans. While the general population of Austin doubles every 20 to 25 years, the number of Asians in Austin is doubling every ten years.

- *Austintexas.gov*

In many of the Austin neighborhoods the Asian population in elementary schools has risen to 10 and sometimes 15%.

ASIAN AMERICAN CULTURAL CENTER

11713 Jollyville Road

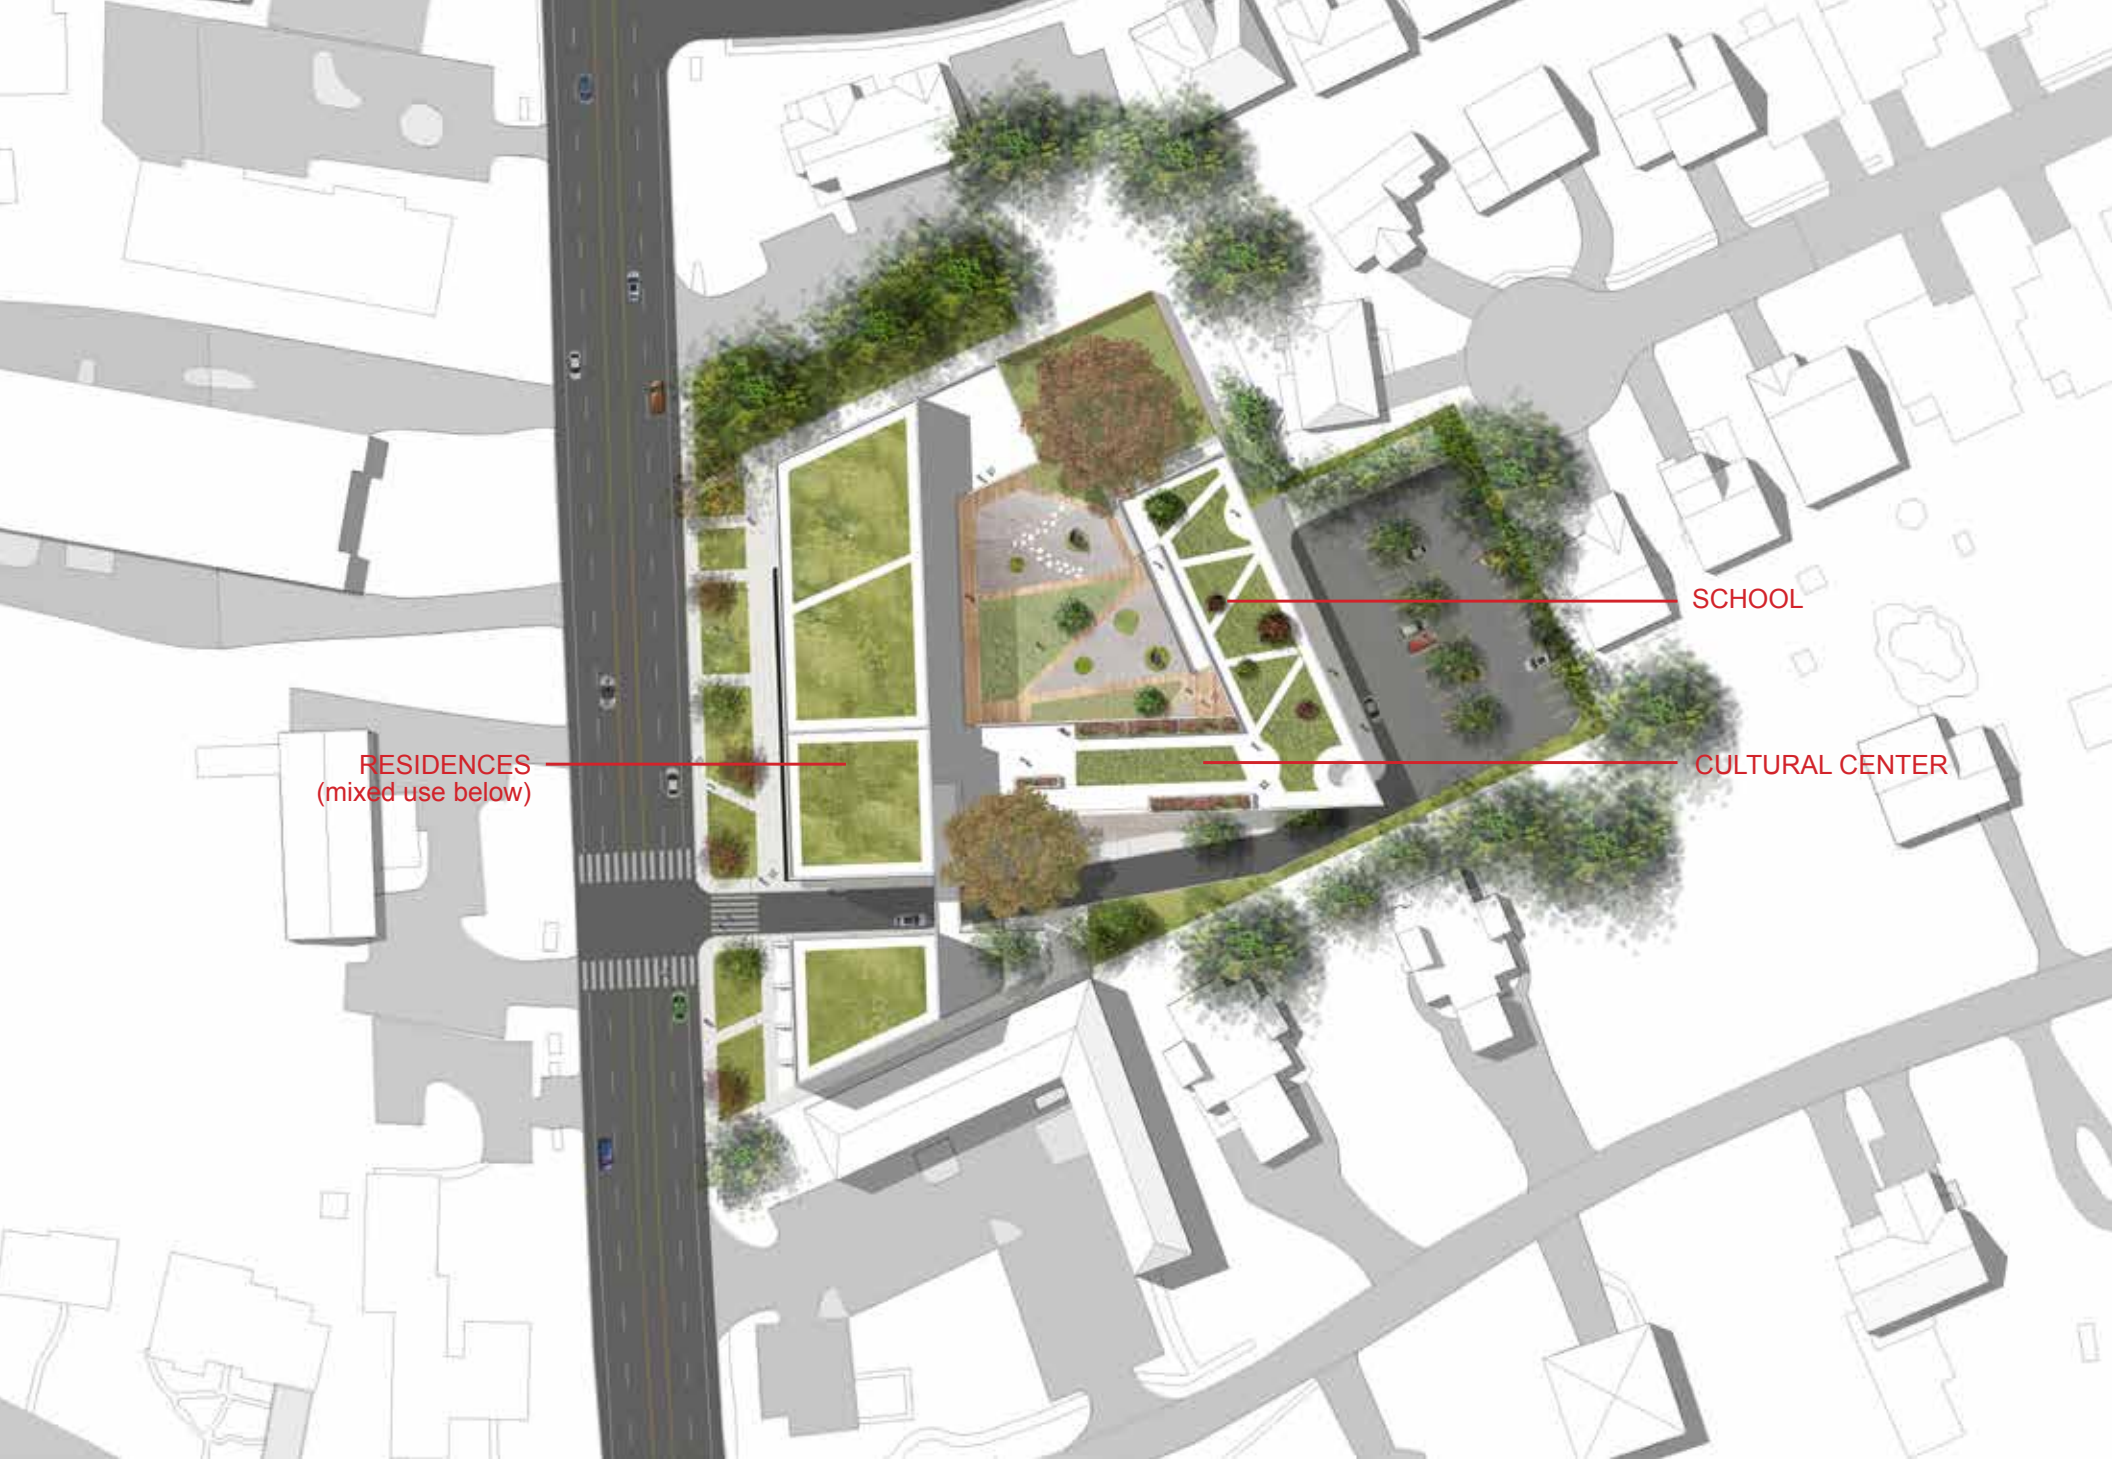

With this increase in population there has been a large increase in the number of elderly Asian Americans in Austin.

Through these needs, we are hoping to create a multi-cultural, multi-lingual, multi-generational facility that will serve the needs of our growingly-diverse Austin-area community.

ASIAN AMERICAN CULTURAL CENTER
11713 Jollyville Road

An architectural rendering of a proposed multi-story building, the Asian American Cultural Center, situated at a street intersection. The building is a modern, multi-story structure with a mix of white and grey facades and large windows. It is surrounded by a landscaped area with trees and a pedestrian walkway. The surrounding context includes existing residential buildings, a street with cars, and a park area with trees and a playground. The rendering is presented in a semi-transparent, light grey style.

Requests by the AACC:

- Zoning change from LO to GR-MU (GR-MU was conceptually supported by City staff);
- Height Variance - from 60' to 80' allowed;
- Height Variance - waiver from compatibility standards;
- FAR Variance - from 1:1 to 1.5:1
