### MEET MELISSA

Having never had insurance as an adult, Melissa enrolled in Marketplace insurance by phone. She got tax credits but missed out on subsidies that would have reduced her deductible from \$6,450 to \$0. Soon after, she went to the ER and left with a hefty hospital bill and a referral to an oncologist.

### HOW WE HELPED

**EDUCATED** Melissa on health insurance basics and specifically how her plan worked. Served as a resource for Melissa throughout the year.

**ADVOCATED** for Melissa by setting up payment plans with providers. Armed Melissa with questions to ask before her next surgery to avoid unexpected costs.

**ENROLLED** Melissa's family in a 2017 plan that covers their doctors and claims all the subsidies, so they now pay \$31.87/month with \$0 deductible and \$1,700 maximum.

### THE HAPPY ENDING

After being diagnosed with kidney cancer in 2016, Melissa is now cancer-free.
