| This is a request to authorize negotiation and execution of an interlocal agreement with Capital Area Emergency <br> Communication District (CAECD) in which the City will be reimbursed for 9-1-1 services provided within the region. <br> In 2013, the State of Texas created the Capital Area Emergency Communications District (CAECD) to establish and <br> maintain Next Generation 9-1-1 emergency communications services within the 10 county District. The City <br> established an interlocal agreement with CAECD at that time to continue maintaining the 9-1-1 database. |  |
| The 9-1-1 database is used in the Computer Aided Dispatch (CAD) system for identifying and locating emergency 9- <br> 1-1 callers throughout Travis County. The database contains landline and Voice over IP customer information, such <br> as address and phone number, as well as the appropriate fire, police and EMS responder for each customer. <br> The interlocal is nowexpiring. With Council approval of this agreement, the City will be reimbursed for the resources <br> used in maintaining the database, hence providing continued support to the Austin/Travis County 9-1-1 system. |  |
