

AGENDA

Recommendation for Council Action

Austin City Council	Item ID	72628	Agenda Number	8.
---------------------	---------	-------	---------------	----

Meeting Date:	8/17/2017	Department:	Communications and Technology Mgmt
---------------	-----------	-------------	------------------------------------

Subject

Authorize negotiation and execution of a 12-month interlocal agreement with the Capital Area Emergency Communications District for access to the Enhanced 9-1-1 Services database and Centralized Automatic Message Accounting Trunks services in an amount not to exceed \$14,000 with four 12-month extension options in an amount not to exceed \$14,000 each for a total contract amount not to exceed \$70,000.

Amount and Source of Funding

Funding in the amount of \$12,000 is available in the Fiscal Year 2017-2018 Proposed Operating Budget of the Communications and Technology Management (CTM) Department. Funding in the amount of \$2,000 is available in the Fiscal Year 2017-2018 Proposed Operating Budget of the Aviation Department. Funding for the extension options is contingent upon available funding in future budgets.

Fiscal Note

A fiscal note is not required.

Purchasing Language:	This interlocal agreement is exempt from the MBE /WBE Ordinance. This exemption is in compliance with Chapter 2-9C of the City Code (Minority –Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this contract.

Additional Backup Information

This interlocal agreement will supply the City with the needed access to the Enhanced 911 database to manage the station level information that will be delivered to the 9-1-1 service provider. That information is then forwarded, via selective routing, to the appropriate Public Safety Answering Position (PSAP).

The City has been utilizing Capital Area Emergency Communications District's Enhanced 911 database services (E911) since 2007. This database is maintained by the City. The information enables 911 PSAP call takers to identify the detailed location of the origination of a call (building address, street and floor) from any Communications and Technology Management supported Avaya administrative phone, and off of the Aviation Department Private Switch which is then automatically displayed on the 911 call taker's screen.
