## Additional Backup Information

In the FY 2015-16 Budget, Council approved funding for the Austin Transportation Department to secure a consultant to conduct the technical analysis required to develop a Street Impact Fee. Impact fees are authorized under Chapter 395 of the Texas Local Government Code. In Texas, impact fees are limited to water, sewer, streets, and drainage.

In order to assess an impact fee, Land Use Assumptions must be developed to provide the basis for residential and employment growth projections within a geographic boundary (Service Area). As defined by Chapter 395 of the Texas Local Government Code, these assumptions include a description of changes in land uses, densities, and development in the service area.

For roadway facilities, a Service Area is a sector within the city limits and cannot exceed six miles. Street Impact Fees collected in a Service Area can only be used to pay for capital improvements specified in the Roadway Capacity Plan for the service area within 10 years.
