

Impact Fee Advisory Committee
November 14, 2017
Item E1 – Draft Recommendation Language

Whereas it is in the best interest of the public to have as much influence as possible in how street impact fees are spent,

It is the recommendation of the Impact Fee Committee to form a new committee, the “SIF Oversight Committee,” that has oversight of the Austin Transportation Department as well as the Capital Improvement Plan and how those dollars may be allocated towards future projects. Authority to recommend to approve or deny projects that will be incorporated into the CIP will be specifically reserved for the SIF Oversight Committee or the Austin City Council.

It is encouraged by the committee that in the Capital Improvement Plan, technology be incorporated as much as possible in the growth of Austin’s transportation projects.
