<b>Boards and Commission Action:</b>	August 8, 2018 - To be reviewed by the Water and Wastewater Commission.
<b>MBE/WBE:</b>	N/A

This contract will provide priority and regulated pollutant analysis of environmental water quality samples for the Laboratory Services Division of Austin Water on an as needed basis. These services will provide quantitative analyses for the pollutants in wastewater, wastewater sludges, soils, natural waters, industrial wastewater and drinking water samples. The analyses for samples may include all of the organic and inorganic chemicals named in the priority pollutant list of the Clean Water Act which are listed in 40 CFR 122 Appendix D Table II, III, and V., contaminants for the Resource Conservation and Recovery Act (RCRA) which are listed in 40 CFR Part 261.24, Table 1, as well as regulated (40 CFR 141) and unregulated compounds in the Safe Drinking Water Act.

These analyses are required as part of the City's compliance with the Federal Clean Water Act and Safe Drinking Water act mandates, applicable U.S. Environmental Protection Agency standards and under the Texas Pollutant Discharge Elimination System (TPDES) permits, to determine actions protective of the environment and the citizens of the City of Austin.

Various method requirements are beyond in-house capabilities. Contract laboratory services are required in order for the City to meet all State and Federal mandates. In addition, the contract laboratory services may be used for those analyses that are performed in-house when the instrumentation is out-of-service.
