AMTEX & AMCAL – DETAILED CORPORATE OVERVIEW

AMTEX is one of several companies, affiliated with common ownership, that together develop and build residential housing to achieve the company’s core mission of improving the lives of residents and enhancing their futures. The AMTEX affiliated group of companies includes: Acquisitions, Development, General Contracting and Asset Management divisions. The AMTEX advantage is a seamless delivery of real estate solutions, from selecting the best site all the way through the lease-up and operations of vibrant, well-designed housing in strong communities. The AMTEX companies operate together in a cohesive manner with impressive results. Each new project is guided by a dedicated and professional Project Team including an Acquisition Manager, Project Manager, Construction Manager, Asset Manager and a Project Accountant. AMTEX’s Senior Management Team provides experienced oversight to every project, ensuring success by implementing quality standards, reviewing the details of building design and material selection, and providing the long term planning necessary to build value for community stakeholders and investors alike.

The goals and incentives of the employees working at AMTEX on site acquisition, planning, financing, construction and asset management are all aligned towards delivering the highest quality development in the most efficient manner to ensure that development projects are the best in the industry. AMTEX holds the entire team accountable for delivering these objectives through extensive planning, communication and project monitoring. What this means for our partners is a greater efficiency in processing development projects through entitlements, permitting and construction with a unified AMTEX team in place with open lines of communication. For example, AMTEX General Contractor’s Division with its in-house expertise can quickly assess the constructability and feasibility for a new project at the earliest phases of design development and entitlements.

Efficiency translates to cost efficiency, which ultimately translates to greater success in securing the financing needed for the development. The successfully financed project allows AMTEX to secure better construction pricing during the bid process with our subcontractors by keeping them involved in several projects continuously when possible.

AMTEX’s expertise in all phases of development allow us to provide solid returns to our investors based on our in-house expertise which includes an Asset Management Department that oversees more than 65 developed projects that are carefully monitored to enhance asset financial performance resulting in higher values and returns to investors. AMTEX has a close pulse on the return thresholds required by real estate investors, understands the underwriting parameters required by lenders and is constantly in tune with market constraints and trends.
