Notes -

- 1. Incident volume reflects ALL incidents, regardless of cancellation status or response code
- 2. District information represents only activity within Full-Purpose areas (no limited purpose or ETJ)
- 3. Approximately 1-3% of incident are assigned to multiple Districts and excluded in above totals
- 4. Due to missing data, results should be used for general trends -- not detailed analysis or outcomes
- 5. Emergency incidents defined as an incident which had a Code 3 response, valid timestamps by a frontline unit
- 6. Response times include timestamps from all first-arriving frontline fire units, regardless of agency (AFD and ESDs units)
