**Additional Backup Information:**

These contracts are for the supply of hot mix asphaltic concrete used by the City for asphalt pavement overlays, pavement repairs, temporary driveways, and utility cut repairs. These contracts also provide the City with cold mix asphaltic concrete, which is used for temporary patching of excavated trenches, spot repairs, and other temporary pavement repairs on City streets after repair services are completed. Failure to maintain, service, or extend the lifecycle of existing roadways may expose the City to added liabilities and safe routes for emergency vehicles and citizens will be degraded.

The City issued a solicitation with the intent to award a primary and alternate contract. The alternate contract will only be used in the event the primary contractor's plant is down or overbooked and paving work or repairs must be completed. Both contracts will supply the City with the exact same materials.

These contracts will combine and replace three existing contracts expiring in mid-December 2018. The requested authorization amounts were determined using departmental estimates based on historical spend and upcoming projects.
