**Additional Backup Information:**

This project will upgrade the four-mile Circuit 811 transmission line from 69kV to 138kV to provide redundancy and increase reliability of the electric service system.

Additional easement widths are necessary for safety and clearance requirements pursuant to the National Electric Safety Code, and for access and maintenance of Circuit 811. Austin Energy identified 103 easement tracts necessary for this upgrade project. To date, 34 property owners have accepted appraised values; 19 are unwilling to accept the appraised values; and 53 are in negotiations.

The current fair market value of the 8151 North Lamar, L.P. tract, as determined by an independent, third-party appraiser, is \$32,291. The City attempted to purchase the needed property for this amount however; the City and the property owner were unable to agree on the value of the tract. The Law Department requests authorization to file an action in eminent domain on behalf of the City of Austin.
