HISTORIC LANDMARK COMMISSION

February 25, 2019 Demolition and Relocation Permits HDP-2019-0020 1117 Bluebonnet Lane

PROPOSAL

Demolish a ca. 1963 house designed by A.D. Stenger.

ARCHITECTURE

1117 Bluebonnet Lane is a single-story mid-century Modern house designed and built by A.D Stenger. It is a frame structure with a sweeping, angular roof reminiscent of the asymmetrical "wounded dove" design popular during the 1950s and '60s. A recessed entry, along with central clerestory windows and vertical wood siding, contrast with the home's dramatically horizontal form. 1117 Bluebonnet Lane is larger than many Stenger homes, with a total area of 1,706 square feet.

The structure next door at 1115 Bluebonnet Lane, also an A.D. Stenger home, appears to be more in keeping with Stenger's typical stone-clad designs (see also: 1111 Bluebonnet Lane), though it somewhat resembles its neighbor in roof form and height, setback, and massing. However, the attached carport's front-facing orientation at 1117 places more emphasis on the elongated façade. This house, with its low-slung gabled roof, is a good example of Stenger's often aircraft-inspired design sensibility.

1115 Bluebonnet Lane

1111 Bluebonnet Lane

Unlike Stenger's houses further down the west side of the block (1102, demolition approved 2017; 1106 Bluebonnet Lane), whose variable rooflines add interest to flatter lots, his designs for this section of the street mirror its gentle slope. This house is in the midst of a grouping of relatively intact mid-century resources, including other Stenger homes; the streetscape provides a glimpse of how the architect planned based on topography.

1102 and 1106 Bluebonnet Lane, March 2018

RESEARCH

1117 Bluebonnet Lane was built in 1963 by Arthur Dallas Stenger, a prominent mid-century modern designer and homebuilder in Austin. Stenger, the son of an architect, was born in Dallas, served in the Navy during WWII, and attended the University of Texas School of Architecture. After passing his professional licensing exam in 1950, Stenger left the program without graduating to take advantage of the post-war housing boom, as he struggled to make ends meet as a student with his meager G.I. Bill stipend.

Stenger was often compared to prominent California developer Joseph Eichler in the exterior design sensibilities and open living areas that characterize his residential designs. A typical Stenger home has a low-pitched roof, pronounced rafter tails, exposed beams and decking, and post-and-beam foundation with a conservative footprint. Stenger also often included walls of collected stone, clerestory windows, gable ends that terminate in a projecting point, and cantilevered structural systems.

Stenger was a builder as well as an architect. He typically purchased infill lots in South Austin, particularly the Zilker neighborhood where this home is located, before constructing and selling his designs. 1117 Bluebonnet Lane's permit history reveals that Stenger was the lot owner and applicant for the home's construction, like most of the Stenger homes on the block.

1117 Bluebonnet Lane was completed in 1963. Its first listing in City directories was in 1965 as a vacant house. Its first listed occupant was Mrs. Billie Passmore, a programmer at City National Bank. During the 1970s, the home was owned by Paul H. Gray, an associate professor of speech communication at the University of Texas, and his wife Caroline. Dr. Gray, a prolific author and leading scholar in his field, directed many of UT's chamber theater and oral performance productions during the 1970s, and currently serves as Professor Emeritus with the Communications Department. From 1985-1992, the home was owned by radio station salesman Fred Smith and his wife Beverly.

STAFF COMMENTS

The property is not listed in any City survey to date. The applicant has provided information about the condition of the house, indicating serious deterioration that is compromising the structural integrity of the house. Repairs to the house will likely require the removal and replacement of significant amounts of historic fabric.

STAFF RECOMMENDATION

Initiate historic zoning. This house has significance as an A.D. Stenger home that exhibits the architect's trademark mid-century design components, particularly the single-story horizontally-oriented form and dramatic roofline. These elements relate the house to both the topography of the landscape and to the other historic-era structures that define the streetscape. This house's association with the architect, as well as his purposeful design choices that link the property to its surroundings, render it eligible for designation under the criteria for architecture and historical associations.

If the Commission determines that the house is in too deteriorated a condition to warrant initiation of historic zoning, then staff recommends release of the permit upon receipt of a City of Austin Documentation Package, consisting of photographs of all elevations, a

dimensioned sketch plan, and a narrative history, for archiving at the Austin History Center. The Commission may take into consideration the condition of the building when making a decision about the feasibility of repairs without compromising exterior integrity of design, given the evidence of structural failure and resulting water infiltration.
