ZONING CHANGE REVIEW SHEET

CASES:  C14-2018-0026 - E Riverside DR and S Pleasant Valley Rd Tract 4  
        C14-2018-0027 - E Riverside DR and S Pleasant Valley Rd Tracts 3 & 5  
        C14-2018-0028 - E. Riverside Dr and 1109 S. Pleasant Valley Road Tracts 1 and 2  
        C14-97-0010(RCT) - E. Riverside Dr. and S. Pleasant Valley Rd. Tract 4  
        C14-72-204(RCA4) - E. Riverside Dr and S. Pleasant Valley Rd. Tracts 1-5

DISTRICT: 3

ZONING REQUESTS FROM: East Riverside Corridor (ERC) district - Neighborhood Mixed Use (NMU) and Urban Residential (UR) subdistricts

TO: East Riverside Corridor (ERC) district – Corridor Mixed Use (CMU) subdistrict

ADDRESSES: 1600 Wickersham Lane, 1515 Wickersham Lane, 4700 E Riverside Drive, 4600 Elmont Drive, 1109 S Pleasant Valley Road

SITE AREA: 97.6 Acres

OWNERS: NRE Town Lake Property Owner LLC, Ballpark Austin LLC, BP Riverside West LLC, NRE Zone, NRE Edge

APPLICANT: Armburst & Brown, PLLC (Michael Whellan)

CASE MANAGER: Jerry Rusthoven, 512-974-3207 jerry.rusthoven@austintexas.gov

STAFF RECOMMENDATION:

For the geographic area of the zoning requests within one half mile of the intersection of Riverside and Pleasant Valley, as delineated by the private drive north of 1401 S Pleasant Valley Road (Dollar General Store), and south of 1109 S Pleasant Valley Road (the Town Lake apartments), Staff recommends:

• Amendment 1 – (ERC Plan, Figure 1-2, Subdistrict Map) – Change the ERC subdistricts of the properties from Neighborhood Mixed Use (NMU) and Urban Residential (UR) subdistricts to Corridor Mixed Use (CMU)

• Amendment 2 – (ERC Plan, Figure 1-6, Hub Map) Include designated area in the Hub boundary

• Amendment 3 – (ERC Plan, Figure 1-8, Bonus Height Map) Make designated area eligible for up to 160 feet of height, with development bonus

• Amendment 4 – (ERC Plan, Figure 1-4, Active Edge Map) – Extend active edges north on Pleasant Valley to Elmont, and on Riverside from Wickersham to Crossing Place

• Amendment 5 – (ERC Plan, Figure 1-7, Base Height Map) Amend to reflect changes to Figure 1-2 above, described in Amendment 1

• For the area of the rezoning requests beyond one half-mile from the intersection of Riverside and Pleasant Valley, Staff does not support zoning changes or changes to the ERC regulating plan.
Staff supports amending restrictive covenant C14-72-204(RCA4), to remove the subject properties from the restrictive covenant, which limits the number of dwelling units. Staff supports termination of restrictive covenant C14-97-0010(RCT), which requires one parking space per bedroom, and a six-foot fence around the property.

Staff recommends that the rezoning requests described in this report be subject to the conditions outlined in the attached traffic impact analysis (TIA) memorandum. Please see Exhibit L - TIA Memorandum.

Copies of the Figures listed above are attached with this report. Please see Exhibits C through H – Subdistrict Map, Active Edges Map, Collector Street Map, Hub Map, Base Height Map, Bonus Height Map.

For a summary of the basis of Staff’s recommendation, see page 10.

PLANNING COMMISSION ACTION / RECOMMENDATION:
June 11, 2019:

CITY COUNCIL ACTION:
August 8, 2019:

ORDINANCE NUMBER(S):
ISSUES:
The rezoning requests outlined in this Staff Report propose to rezone the subject tracts and amend to the East Riverside Corridor (ERC) Regulating Plan. When the ERC plan was adopted in 2013, the adopting ordinance established that any changes to Figure 1-2 (subdistrict designation) would then be reflected in Figures 1-7 (base height) and 1-8 (bonus height). These changes are subject to rezoning procedures, including notification and public hearings at Planning Commission and City Council.

Per scheduling requirements set out in City Code § 25-2-282 (E), the public hearings of these rezoning cases must be heard at the June 11, 2019 Planning Commission meeting.

City Code does not allow a rezoning request to cross public right-of-way (ROW), so the related rezoning requests have been filed under three separate applications. The associated restrictive covenant termination (RCT) and restrictive covenant amendment (RCA) requests also apply to several of the properties. The Staff Report for all five cases are combined into one, with distinctions made where appropriate. Please see Exhibits A and B- Tract and Application Map, Aerial Exhibit.

APPLICANT REQUEST:
The Applicant proposes redeveloping these properties as a cohesive mixed use development or activity center that would be built on a new street grid (See Exhibit I). The proposal as outlined in a letter provided by the Applicant includes the following elements:

- Approximately 4,709 multifamily units
- Approximately 600 hotel rooms
- Approximately 4,000,000 square feet of office
- Approximately 60,000 square feet of medical / dental office space
- Approximately 435,000 square feet of ground floor commercial space

In order to implement their proposal, the Applicant proposes the following changes to the current zoning on the properties:
• Change the ERC subdistricts of the properties from Neighborhood Mixed Use (NMU) and Urban Residential (UR) subdistricts to Corridor Mixed Use (CMU).

• Include the entire property in a Hub (a portion of the property that fronts on Riverside Drive is already within the Hub—(See Exhibit F) to allow participation in the density bonus/community benefits program.

• Allow a maximum of 160 feet in height through the density bonus program (a portion of the property that fronts on Riverside Drive is currently eligible for bonus height up to 65 ft).

• Terminate restrictive covenant C14-97-0010, which requires one parking space per bedroom, and a 6 foot fence around the property.

• Amend the restrictive covenant C14-72-204, which limits dwelling units and density; to remove the subject properties.

Additional requirements to any rezoning or site plan in the ERC area: Figure 1-5 in the ERC shows existing streets and required new collector streets (See Exhibit E). Relevant to this application are the extension of Lakeshore Boulevard east of Pleasant Valley, the extension of Elmont east of Wickersham to Crossing Place, and the extension of Wickersham north of Elmont to connect with the extension of Lakeshore Boulevard. The ERC also establishes minimum block lengths and perimeters for any new development. In consideration of this requirement the Applicant proposes a revised street grid and has submitted a preliminary plan subdivision for the same area. Per City Code, the preliminary plan may not be approved prior to the approval of the zoning case. Please see Exhibit J- Applicant Letter.

EXISTING CONDITIONS:

There are currently five apartment complexes located on the subject properties: The Ballpark North, Town Lake, and the Quad East, West, and South. These complexes include a total of 1,308 rental units which includes one, two, three, and four-bedroom units. A unit breakdown is shown in the table below. Altogether, there are a total of 3,702 bedrooms across the five existing developments.

The existing apartments were constructed between 1995 and 2003. For 2019, the median rent in the City of Austin is $1,170/month for a one-bedroom unit. The monthly rent for a one-bedroom unit at the existing complexes vary but are generally below the Citywide median. The units are not currently regulated in terms of rent; consequently, rents can rise at any time. The only avenue to ensure that the existing units remain affordable over the long term would be to purchase and/or subsidize the preservation of the units (at a likely cost of over $150 million). These properties are subject to the City’s Tenant Relocation Ordinance, which requires advance notification of demolition to residents, but does not require the payment of relocation expenses. Funds may be available from the City’s Tenant Relocation Assistance Program for tenant displacement.

</table>
If the properties are rezoned and the ERC density bonus program is utilized the properties could potentially result in the creation of 200 – 334 income-restricted affordable units [based on the Staff recommendation in addition to fees in lieu for affordable housing that would calculated at the time of site plan]. However, the creation of these affordable units or fees in lieu is dependent on the final proposed development, not the zoning entitlements granted.

The Applicant request proposes that the existing apartments be demolished and replaced with the new development to include buildings, roads, and infrastructure. The Applicant has stated that construction would begin in approximately 2023, and the full buildout could take as many as 20 years, to 2043.

SURROUNDING CONDITIONS:
The subject properties comprise approximately 97 acres in the ERC Regulating Plan area. The properties are located north of E Riverside Drive, east of South Pleasant Valley Road, south of Roy G. Guerrero Park, and West of Crossing Place. The properties have ERC district zoning. The area is within two different subdistricts – Neighborhood Mixed Use (NMU) for the area fronting on Riverside, and for the area south of Elmont Drive and west of Wickersham; and Urban Residential (UR) for the remainder.

Lakeshore Boulevard currently tees into Pleasant Valley Road – to the east of that intersection is the southwest corner of Roy G. Guerrero Park, which is zoned (P) Public. The Country Club Creek Trail ends at Pleasant Valley Road approximately 30 feet north of the subject property. Also to the north in this section of the park is part of a disc golf course. Further north are the Krieg baseball fields and Lady Bird Lake. The eastern edge of the 97 acres includes another section of the Country Club Creek Trail, and West Country Club Creek. Currently, this area is privately owned and is treated as part of the zoning case. However, this section is in the 100-year flood plain and Critical Water Quality Zone (CWQZ), and therefore no structures will be permitted in this area. Further east are tracts zoned MF-3-NP, and MF-2-NP, the site of two- and three-story multifamily complexes which take access to Crossing Place and Faro Drive. On the south side of Riverside, southeast of the subject properties are tracts zoned ERC-UR, the site of a two-story multifamily complex. Directly south of the subject property are tracts zoned ERC-NMU with a service station and food mart at the corner, and a three to four story multifamily complex in the rear. Fronting on Riverside, west of Wickersham and extending west to Pleasant Valley is a strip that is zoned ERC-CMU, which is the site of two and three-story multifamily apartments. At the northeast corner of Pleasant Valley and Riverside is a gas station. A pharmacy is at the southeast corner of Pleasant Valley and Riverside. On the west side of Pleasant Valley Drive and south of Elmont Drive are tracts zoned ERC-CMU. At the intersection of Riverside is an HEB grocery. North of the HEB is a lot that is currently vacant and appears to be used as a storage and staging area for construction. North of that is a five-story multifamily complex. West of Pleasant Valley and north of Elmont Drive is a tract zoned ERC-NMU, the site of a gas station and food mart at the corner, and two two-story multifamily complexes. North of these, and extending up to South Lakeshore Boulevard, is a tract zoned Public (P) that is the current site of the Parks and Recreation Department’s Central Maintenance Complex. North of Lakeshore Boulevard is park land, including a hike and bike trail, and further north is Lady Bird Lake.
APPLICABLE ADOPTED PLANS:

East Riverside Corridor Master Plan
The ERC Master Plan sets forth a vision for development along East Riverside Drive that will support mass transit and walkable development. The ERC Master Plan also establishes design guidelines that exceed basic Code standards for streetscapes, building articulation, active outdoor space and other elements that create a walkable and vital community. The plan supports the development of dense development and affordable housing through density bonuses which are available in the CMU areas at Activity Hubs. The properties addressed in this report are currently designated as the NMU and UR subdistrict on the on the future land use district map. The area is adjacent to the CMU subdistrict and just outside of a designated activity Hub area. A description of these subdistricts is provided below, as well as a table that compares some of the differing regulations among the subdistricts.

Urban Residential – UR is a residential subdistrict that allows for a range of housing types, including townhouses, rowhouses, condos, or multifamily dwellings. This subdistrict does not promote mixed use development; uses such as retail or office are not permitted but civic uses are. The majority of the proposed rezoning area is currently in the UR subdistrict. Development bonuses are not available in this subdistrict.

Neighborhood Mixed Use – The NMU subdistrict is intended to provide a transition between high-density activity hubs and lower density residential uses. The NMU subdistrict was envisioned to occupy the areas at edge and outside of a CMU district and allows opportunities for residential and smaller-scale commercial uses. The NMU area is intended to be denser than the predominantly single family residential districts and less dense than in the CMU district. Proposed uses include small commercial developments that would serve the local community, such as coffee shops. Recommended residential development includes townhouses, condos, or multifamily dwellings limited to 50 feet in height and a maximum density of 45 dwelling units per acre.

Corridor Mixed Use – This subdistrict is intended to be centered around primary transit stops along East Riverside Drive and generally coincides with the central core of the Hubs. It is the highest density district designation within the Corridor and ideally will contain buildings with multiple uses. Mixed use development is vital in this district. There is the potential for height and density bonuses within the hubs with the provision of community benefits.

Dense development in the ERC is intended to occur in development hubs where residential, commercial and mixed use developments will be in close proximity. The maximum density recommended by the plan is 55 dwelling units per acre. Additionally, it is envisioned by the plan that residents of these areas will be able to walk to a variety of nearby services. The site of the proposed zoning change is located about a half mile or less from the transit Hub on East Riverside that were planned for either rail or bus rapid transit. Any development in this area will have to provide pedestrian infrastructure to support greater walkability and access to transit. The ERC Master Plan identifies a significant need for more housing along the corridor, particularly more affordable housing. CMU areas allow additional entitlements provided that the developer builds or pays for affordable housing in the corridor area.

Imagine Austin

Imagine Austin addresses density, walkability, mobility, and transit on a Citywide scale. The plan has established goals and guidelines applicable to the ERC area. One of the primary themes of the IACP is to support the growth of Austin as a compact, connected city. Major challenges identified by the plan, and relevant to this case, include how to plan for additional population growth that is anticipated, how to increase housing supply near employment centers, and how to improve access to transit.

The Imagine Austin Growth Concept Map (IACP) identifies East Riverside Drive and South Pleasant Valley Road as suitable for High Capacity Transit. These corridors identify locations for rail or bus rapid transit that may provide transportation options and impact where businesses and people choose to locate. The map also identifies the East Riverside District as being within a Town Center. Town Centers are envisioned by the plan to be areas where people live and work as well as being important hubs in the transit network. Please see Exhibit K- Growth Concept Map.

The following Imagine Austin Comprehensive Plan policies are applicable to this case:

- **LUT P3.** Promote development in compact centers, communities, or along corridors that are connected by roads and transit, are designed to encourage walking and bicycling, and reduce healthcare, housing and transportation costs.
- **LUT P7.** Encourage infill and redevelopment opportunities that place residential, work, and retail land uses in proximity to each other to maximize walking, bicycling, and transit opportunities.
- **LUT P32.** Assure that new development is walkable and bikable and preserves the positive characteristics of existing pedestrian friendly environments.
HN P4. Connect housing to jobs, child care, schools, retail, and other amenities and services needed on a daily basis, by strategies such as:
- Directing housing and employment growth to sites appropriate for Transit Oriented Development.
- Coordinating and planning for housing near public transportation networks and employment centers to reduce household transportation costs and vehicle miles traveled.

HN P7. Reuse former brownfields, grayfields and vacant building sites to reduce negative impacts of vacancy and provide new mixed use and/or housing options.

The Imagine Austin policies referenced above and the Growth Concept Map support growth along High Capacity Transit Corridors.

PUBLIC INPUT

One of the conditions for rezoning in the ERC area is that a public meeting in the community is required, in addition to the public hearings at Planning Commission and City Council. Per Ordinance 20151015-086 a public meeting for this case was held on March 27, 2019 at the George Washington Carver Museum. Notification procedures were followed, and property owners, residents, and registered organizations within 500 feet of the property were notified of the meeting.

Planning and Zoning (PAZ) Staff delivered a presentation that covered information about the zoning process, the proposed rezoning, and the applicant’s proposal. Staff also offered options for attendees to ask questions or provide input on the case. Staff from several other departments were in attendance and available for questions. Please see Exhibits O and P- Comment Cards, Correspondence.

TRANSPORTATION:

The alignment for the proposed segment of Lakeshore Boulevard, east of Pleasant Valley has been reviewed by the Austin Transportation Department. ATD indicated a preferred alignment which would allow traffic to flow straight through the intersection, and not “jog.” This alignment would take the street first onto an existing unbuilt right of way which runs parallel to the property line, and then onto the subject property itself.

ATD first looked at the applicant’s full request for height and density and determined the type of street and intersection that would be needed. It was determined that more right of way would be needed beyond the existing 90 feet in width, primarily around the intersection, and totaling approximately 11,000 square feet. Because this area is within existing parkland - the Roy G. Guerrero Park - state law would require a Chapter 26 process to convert it to public right of way (Texas Parks and Wildlife Code, Title 3, Ch. 26). The Chapter 26 process is separate from zoning and goes to the Parks and Recreation Board, which makes a recommendation to Council. The Staff recommendation proposes less development than what the Applicant has proposed. ATD’s assessment of the Staff recommendation has therefore resulted in fewer estimated trip movements through the intersection. It was determined that, with Staff’s recommendation, a narrower cross section of roadway would be sufficient to accommodate projected traffic. This cross section would fit entirely within the existing 90’ public right of way, thus avoiding the need for a Chapter 26 process. In sum, if Staff’s recommendation, or some lower density, is approved, the Chapter 26 will be unnecessary.
A Traffic Impact Analysis (TIA) was performed for this set of zoning cases and a Staff TIA Memorandum is attached as Exhibit L. A key concept of the TIA is that any new development will have traffic impacts on the area in which it is located. The TIA considers the existing traffic patterns and volumes, and based on a model of the applicant’s proposal, compares the potential future traffic patterns and volumes. If these future volumes exceed certain thresholds, mitigation may be needed in order to improve the transportation network so that it can accommodate the projected level of use. This mitigation – in the form of specific projects - is then required of the applicant, in an amount that is roughly proportional to the level of impact. Also included as part of this TIA was a Transportation Demand Management Plan (TDM), which applies strategies to reduce or redistribute travel demand.

CASE MANAGER COMMENTS:

As shown in the tables above, CMU generally allows for higher buildings, a denser floor-area-ratio (FAR), and higher impervious cover allowances. The ERC density bonus program provides additional entitlements if utilized. The program is intended to:

- Encourage construction of projects with height or density greater than is allowed in the ERC Subdistrict in exchange for the provision of community benefits;
- Encourage the provision of affordable housing and mixed income communities;
- Encourage additional density while allowing new development to support public benefits that are important to achieve as the East Riverside Corridor area transforms into a pedestrian-friendly urban neighborhood. These public benefits include affordable housing, open space, improved bicycling facilities, commercial or office uses, and improved flood and water quality controls.

To be eligible for the development bonus described in Subsection 6.3.3, the Applicant must provide public benefits as described below:

- A minimum of 50% of the Bonus Area shall be earned through the provision of on-site affordable housing or payment of an in-lieu fee for affordable housing, as described in Subsection 6.4.1; and
- A minimum of 25% of the Bonus Area shall be earned through the provision of publicly accessible open space, as described in Subsection 6.4.2; and
- The remainder of the Bonus Area shall be earned through the provision of any combination of public benefit options for which the project is eligible, as described in Section 6.4.
- A project providing a public benefit that meets certain criteria will be granted cumulative Bonus Area for all benefits for which the criteria is met.

Restrictive Covenants

There are two restrictive covenants (RCs) being considered along with the zoning cases. Staff supports the requested termination and amendment of these RCs. Please see Exhibit M-Restrictive Covenants.

1. C14-72-204, originally dating from 1975, and applied to 497 acres, of which the subject properties are a part. The restrictive covenant limits the total number of units. The Applicant requests that their property be released from the restrictive covenant. This has been done in prior cases such as C14-72-204 (RCA3).
2. C14-97-0010, originally dating from 1997, concerns only Tract 4, at 1600 Wickersham Lane. The restrictive covenant requires a 6-foot fence around the entire property and one parking space for each bedroom. The Applicant has requested termination of this restrictive covenant, citing that with the redevelopment of the property, parking requirements would need to be followed and that fencing would not be needed.

**BASIS OF RECOMMENDATION:**

The first basis of the recommendations is that a rezoning should be consistent with the policies and principles adopted by the City Council or Planning Commission. The subject properties are located in an area identified for higher density through several planning efforts and adopted plans. In Imagine Austin, the area is within a town center, defined as areas where many people live and work as well as being important hubs in the transit network.

The East Riverside Corridor master plan and regulating plan indicate that the intersection of Riverside and Pleasant Valley is intended as a center or hub. Although the Hub is not drawn as a perfect circle around the intersection, close proximity to the existing Hub is a key factor to be considered.

The Strategic Housing Blueprint was adopted as the city’s 10-year housing policy in 2017. The blueprint calls for 135,000 new housing units, and to make 60,000 of these available to households earning 80% or below of Austin’s median family income. The blueprint also identifies preventing households from being priced out of Austin as a key community value. Here, the implications of this zoning decision must be carefully weighed; many people could potentially be displaced in this location. However, using the density bonus tools could result in the construction of new units that are required to remain affordable at levels described in the blueprint.

The second basis is that intensive multi-family zoning should be located on major arterials and highways; and that zoning should promote the policy of locating retail and more intensive zoning near the intersections of arterial roadways or at the intersections of arterials and major collectors. In the Austin transportation network, Riverside and Pleasant Valley are both designated as arterial roadways. In addition, the Austin Strategic Mobility Plan (ASMP) labels the roadways as Level 3 roadways, typically associated with increased need for transit.

The East Riverside Corridor master plan and regulating plan were developed between 2010 and 2013, when it was expected that a rail line would be constructed along Riverside Drive. Although the political will was not present for the rail to be approved and funded by the time of this writing, a rail line, bus rapid transit, or some other form of higher efficiency transit would make sense to go along Riverside, one of the main arterials south of the river and leading directly into downtown.

The third basis is that the rezoning achieves the compact and connected goals of Imagine Austin and the ERC Plan. This citywide plan and this small area plan both focus on provide safe and convenient opportunities for bicycle and pedestrian connectivity beyond standard City Code. The proposal also increases connectivity for vehicular access in the area that will provide route options. The mixed use nature of the rezoning will allow retail, service, and employment opportunities in close proximity to residences.

OTHER STAFF COMMENTS:

**Environmental- All Cases**

- The site is not located over the Edwards Aquifer Recharge Zone. The site is in the Country Club West Watershed of the Colorado River Basin, which is classified as a Suburban Watershed by Chapter 25-8 of the City's Land Development Code. The site is in the Desired Development Zone.

- Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

<table>

</table>

- Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

- Trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development’s requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 512-974-1876. At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

- Please be aware that an approved rezoning status does not eliminate a proposed development’s requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 512-974-1876.

- Under current watershed regulations, development or redevelopment requires water quality control with increased capture volume and control of the 2 year storm on site.

- At this time, no information has been provided as to whether this property has any preexisting approvals that preempt current water quality or Code requirements.

**Environmental- Specific Cases**

C14-2018-0026 - According to floodplain maps there is a floodplain adjacent to the project location.

C14-2018-0027 - According to floodplain maps there is a floodplain within the project location.

- According to GIS, there is a wetland CEF on site and associated buffer.

- A major Critical Water Quality Zone exist on site, the buffer extends 300’ from the creek centerline on both sides.

C14-2018-0028 - According to floodplain maps there is a floodplain within the project location.

- COA GIS indicates Critical Water Quality Zones located within the project location. Development is limited within the Critical Water Quality Zone per LDC 25-8-261 and 262.
Parks and Recreation – All Cases
PR1: FYI: The ERC requires parkland dedication at subdivision on large tracts. Due to the density being proposed, PARD will require parkland dedication in the form of pocket parks and urban plazas.

Parks and Recreation – Specific Cases
C14-2018-0028 - Due to the configuration required on ERC pedestrian priority collector streets, it is assumed that building edges in these tracts will face the park. Please provide more information about potential building frontages along the new Wickersham between Colorado River Park and the northernmost buildings.

PR4: FYI: Aligning Wickersham with Lakeshore Blvd would require a Chapter 26 process to be approved by the City Council. ATD would be the sponsoring department. PARD would require mitigation for the taking of parkland to be determined during the Chapter 26 process.

Site Plan- All Cases
This site will be subject to the site development standards of the East Riverside Corridor’s Corridor Mixed Use (CMU) Subdistrict (see Figure 1-9 of the ERC Regulating Plan).

Austin Water Utility
The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, offsite main extensions, water or wastewater easements, utility relocations and or abandonments required by the proposed land use. Depending on the development plans submitted, water and or wastewater service extension requests may be required. Water and wastewater utility plans must be reviewed and approved by Austin Water for compliance with City criteria and suitability for operation and maintenance. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fees once the landowner makes an application for Austin Water utility tap permits.

Austin, Texas 78704

Re: Applications Related to 97.09 acres at E. Riverside Dr. and S. Pleasant Valley Rd.

Dear Greg:

The rezoning applications attached to this letter seek to modify the zoning from a variety of categories with different site development regulations and, in some cases, no opportunity for a density bonus with affordable housing, to Corridor Mixed Use with the opportunity for additional height and a density bonus as provided in the Regulating Plan for the East Riverside Corridor Zoning District. See attached chart. The project goal is to establish a consistent set of site development standards that will allow for the creation of an urban village with housing, including affordable units pursuant to the regulating plan, ground floor retail, general office, medical/dental office, and hotel uses.

The 97.09-acre site at E. Riverside Dr. and S. Pleasant Valley Rd. currently has 1,308 apartment units. Because of the site’s proximity to the Oracle campus, additional office space will create an independent employment node outside of downtown on a key transit corridor. In fact, this dense node outside downtown will complement the efforts to bolster E. Riverside Dr. as a transit corridor. A Traffic Impact Analysis will be submitted that reflects the improving transit and multi-modal opportunities due to the site’s favorable location.

The redevelopment also has the potential to meaningfully boost Del Valle Independent School District’s tax base. Based on a preliminary analysis, this redevelopment has the potential to provide up to tens of millions in tax revenue for Del Valle ISD. The Del Valle ISD school budget is a total of approximately $95 mm in revenue (of which $49 mm is from “local, intermediate and other sources”), and approximately $109 mm is total expenditure; therefore, the potential payment to Del Valle ISD would represent at least 10% of the “local, intermediate and other” revenue.

Significant portions of the 97.09-acre site sit along Country Club Creek and is currently developed with impervious cover and buildings in the water quality transition zone and the
floodplain. Upon full redevelopment, up to 9 acres of impervious cover within the water quality transition zones and floodplain may be removed. At the time these lots were developed, only tracts 1 and 2 were required to include water quality facilities; in contrast, the redevelopment will allow for the application of current environment code provisions, including water quality facilities adjacent to Country Club Creek. Moreover, because of the site's proximity to Ladybird Lake and trails, additional trail connections and parkland will help interconnect the City's trail system and public park space in the area.

Ultimately, the site could have up to 4,709 multi-family units, 600 hotel rooms, approximately 4,000,000 ft.² of office, 60,000 ft.² of medical/dental office space, and approximately 435,000 ft.² of ground floor commercial space. This urban village setting will create opportunities for seamless connectivity to Oracle and multimodal connections to key corridors.

In addition to the rezoning applications, there are two applications to modify or release the property from restrictive covenants; in particular, a 1975 restrictive covenant that limits the number of dwelling units on each tract and a 1997 restrictive covenant concerning fencing and parking.

Of course, as the zoning application process unfolds, we will be available to answer questions.

Very truly yours,

Michael J. Whellan

MEMORANDUM

Date: June 4, 2019
To: Joi Harden, Zoning Case Manager, Division Manager, Planning and Zoning Department
CC: Bobak Tehrany, P.E., BOE Consulting Services, LLC
     Michael Whellan, Armbrust & Brown, PLLC
     Eric Bollich, P.E., PTOE, Austin Transportation Department
     Upal Barua, P.E., P. Eng., PTOE, Austin Transportation Department
Reference: 4700 E Riverside Dr (97 Acres) (E Riverside Dr and S Pleasant Valley) – Transportation Impact Analysis Final Memo

Summary of the Transportation Impact Analysis (TIA):

The Austin Transportation Department (ATD) has thoroughly reviewed the "97 Acres TIA" dated May 7, 2019, prepared by BOE Consulting Services LLC (BOE Consulting). The development covers about 97 acres at the northeast corner of E Riverside Drive and S Pleasant Valley Road, in southeast Austin. The development is anticipated to be completed in five phases.

The Applicant has submitted a TIA (dated May 7, 2019) which assumes the intensity proposed by the applicant and that is beyond staff's recommended intensity. Therefore, the TIA submitted by the Applicant considers more trips than are recommended by City of Austin (COA) staff. COA Transportation staff considered this while reviewing the TIA and prepared the following memo summarizing the transportation recommendations based on the staff recommended (reduced) intensity.

Below is a summary of our review findings and recommendations:

1. The Applicant shall design and construct and fund 100% of the off-site improvements identified in Attachment C as part of their site development applications, as identified for each tract. Off-site improvements should be included within the first site plan for each identified tract. No temporary certificate of occupancy (TCO) shall be issued until the construction of the identified improvements is complete. Note: Cost estimates should not be assumed to represent the maximum dollar value of improvements the applicant may be required to construct.
2. Fee in-lieu contribution to the City of Austin is recommended to be made for the improvements identified in Attachment D totaling $4,006,000.00, before third reading at City Council.

3. The Applicant is required to achieve a vehicle trip reduction per phase as described in Table 5. The Applicant commits to implement the Transportation Demand Management (TDM) plan submitted with the TIA. Site plan applications submitted under this zoning should provide a letter demonstrating compliance with the TDM plan. Annual monitoring reports should also be submitted for the site to ensure compliance. If reduction targets are not met, site plan permits under all three zoning cases may be held based on the criteria described in the TDM plan.

4. The Applicant shall construct all on-site, public roadways to meet requirements of the ERC and required cross sections based on the results of the TIA.

5. The Applicant shall construct the Country Club Trail through the site to the cross section identified in the TIA.

6. Development of this property should not vary from the approved uses or deviate from the approved intensities and estimated traffic generation assumptions within the finalized TIA document, including land uses, trip generation, trip distribution, traffic controls, driveway locations, and other identified conditions. Any change in the assumptions made to the TIA document shall be reviewed by ATD and may require a new or updated TIA/addendum.

7. The Applicant shall provide two copies of the final, updated version of the TIA before 3rd reading, matching Council’s approved intensity recommendation.

8. The findings and recommendations of this TIA memorandum remain valid until five (5) years from the date of this memo, after which a revised TIA or addendum may be required.

Below are the notable differences in staff’s recommendation from the applicant’s TIA based on staff’s recommended intensity:

1. Staff’s recommendation reduces the number of trips generated.
2. A 26% overall TDM reduction target should be applied instead of proposed 37%.
3. The circulator shuttle service is not required to achieve the TDM reduction.
4. The Lakeshore Boulevard extension cross section will not require right-of-way (ROW) in the parkland and therefore would not require a Chapter 26 process.

Site Location and Existing Conditions

The proposed 97 acres site is located at Pleasant Valley Road and East Riverside Drive. See Attachment A for the site location map. The surrounding roadways are described further below.

East Riverside Drive is a six-lane divided major arterial that provides east-west movements in the vicinity of the Project. The posted speed limit on East Riverside Drive between IH 35 and South Pleasant Valley Road is 35 miles-per-hour (mph), and between South Pleasant Valley Road and State Highway (SH) 71 is 40 mph. Based on traffic counts collected as part of the analysis on November 7, 2018, East Riverside Drive, east of Willow Creek Drive, experiences 19,783 vehicles per day (vpd) traveling eastbound and 22,750 vpd traveling westbound for a total of 42,533 vpd. The roadway is classified as Level 3 in the Austin Strategic Mobility Plan (ASMP)
South Pleasant Valley Road is a four-lane divided major arterial that provides north-south movements in the vicinity of the Project. The posted speed limit on South Pleasant Valley Road is 45 mph. Based on data collected as part of the analysis on November 7, 2018, South Pleasant Valley Road, south of East Riverside Drive experiences 7,603 vpd traveling southbound and 8,362 vpd traveling northbound for a total of 15,965 vpd. The roadway is classified as Level 3 in the ASMP.

Oltorf Street is a four-lane divided major arterial. The posted speed limit on Oltorf Street is 35 mph. The roadway is classified as Level 3 in the ASMP.

Lakeshore Boulevard is a two-lane City Collector that provides mobility between East Riverside Drive and South Pleasant Valley Road. The posted speed limit on Lakeshore Boulevard is 35 mph. The roadway is classified as Level 2 in the ASMP.

Elmont Drive is a two-lane City Collector that provides mobility between Tinnin Ford Drive and South Pleasant Valley Road. The roadway is classified as Level 2 in the ASMP.

Wickersham Lane is a two-lane City Collector that provides mobility between Elmont Drive and East Riverside Drive. The roadway is classified as Level 2 in the ASMP.

A trip generation study was conducted to determine the number of vehicle trips for the existing land uses. The existing land uses can be found in Table 1.

Assumptions:

1. The development will build out over five phases. The buildout of Phase 1 is anticipated to be complete in 2023 with another phase every 5 years, until final buildout in Phase 5 (2043).
2. Transportation Demand Management (TDM) measures will reduce trips by 26%.
3. Based on TxDOT AADT volume data, a two (2) percent annual growth rate was assumed from the existing condition to Phase 2 (2028) and then 1% form Phase 3 (2033) to project buildout (2043).
4. Considerations were made for the following projects in the analysis found in Table 2 below.

**Trip Generation and Land Use:**

A custom trip generation for the site was used based on traffic counts obtained at existing driveway locations for apartment and hotel land uses. Other land use's trip regenerations are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual (9th Edition). The development will generate approximately 53,036 unadjusted average daily vehicles trips (ADT) at full build out.

Due the significant number of vehicle trips and the anticipated traffic load on the roadway network, the applicant has committed to a Transportation Demand Management (TDM) Plan to reduce their site vehicle trips by 26%. Table 3 shows the adjusted trip generation by land uses for the proposed development.

**Proposed Conditions**

**Intersection Traffic Operations:**

The nature of this development and its potential impact on traffic operations requires us to evaluate the site in an urban context. The East Riverside Corridor (ERC) regulating plan as outlined in the Imagine Austin Plan and Project Connect envisions a connected corridor, with a neighborhood center with ample access to multiple transit and multi-modal options in the area.

Metrics for traditional Level of Service (LOS) analysis used for a suburban context are not directly applicable to this development's site context. Table 4, below, lists each study intersection and identifies if traffic operations are acceptable in suburban and urban context. Acceptable suburban traffic operations follow the traditional LOS definition. In an
urban context, vehicle traffic must be functional to be considered acceptable and other modes of transportation must also be considered. The recently adopted Austin Strategic Mobility Plan (ASMP) tasks the City to include all modes when assessing a development's impact, and therefore, it is improper to use LOS as the only metric to evaluate the development's impact.

The traffic analysis considered 34 intersections. Of the 34 intersections, 27 require infrastructure improvements to achieve adequate traffic operations in a suburban context. However, only 14 intersections require further vehicular improvements if we consider an urban context. Of these 14 locations, 7 have been identified to be improved by the developer.

</tbody>
</table>

Of the locations identified, the developer shall be required to construct improvements on seven locations based on the pro-rata share of the development's impact. The proposed development would have direct impacts on these seven locations. Hence, it would be...
essential for the Applicant to construct improvements that would ensure safe and efficient traffic operations.

There are other locations that were identified for improvements. However, those improvements did not appear feasible from an engineering perspective, or had less of an impact from the proposed development (low pro-rata share). Some of these improvements would be implemented by Mobility 35 Project or by 2016 Mobility Bond Project in the near future.

Transportation Demand Management (TDM) Plan

The ASMP identifies TDM as an important strategy to encourage sustainable modes of transportation and discourage driving alone. Additionally, the site location and changing transportation environment along the East Riverside Corridor will allow TDM to be an effective way to reduce the demand on transportation infrastructure.

The Applicant has committed to a TDM plan to meet certain vehicle trip reduction targets. In the TDM plan the Applicant may select from a ‘toolbox’ of TDM measures which can be implemented to achieve the required vehicle trip reduction. This allows the development to tailor measures based on specific land use and provide flexibility as technology and transportation change over the life of the project. Annual reports are required to ensure that the development is reducing the number of vehicle trips.

Additionally, the Applicant is required to implement the following key TDM measures to achieve the goals of the TDM plan:

- Parking maximum at full buildout: 80% of LDC requirements; and
- Unbundled parking for all land use types

The Applicant has also committed to create, or act as, a Transportation Management Association (TMA), to coordinate the TDM plan across the entire development. The Applicant may then use the toolbox of measures to achieve the vehicle trip reduction targets established by phase. Trip benchmarks are shown in Table 5.

</tr>
</tbody>
</table>

If the site is not in compliance with the required trip reductions in the zoning ordinance, site plan permits may be held until the applicant revises their TDM plan, provides additional mitigations, or commits to more TDM measures. Specific compliance criteria and stages of compliance are described in more detail in the TDM plan included in the TIA report.
If the Applicant fails to set up a coordinated TMA, provide a letter of support, and/or provide ongoing annual reports for the overall site, each individual site shall be required to meet a 26% vehicle trip reduction percentage and meet the requirements of the TDM plan, unless an addendum to the TDM plan is submitted and approved by ATD. If the site cannot meet the requirements of the TDM plan, a new TIA or a revision to the TIA may be required.

Internal Roadway Connections and Construction Requirements:

1) The East Riverside Corridor (ERC) Regulating Plan, identifies the following Level 2 roadways for construction, including:
   a) Extension of Lakeshore Boulevard from Pleasant Valley Road to Proposed Wickersham Lane;
   b) Extension of Wickersham Lane from Elmont Drive to Proposed Lakeshore Boulevard;
   c) Roadway connection across Country Club Creek. See Attachment B.
2) The ERC identifies connecting local streets to be constructed based on block length criteria. The proposed blocks can be seen in Attachment B.

Transit:

Transit is an important and critical component for the proposed development to fully leverage TDM measures and to provide alternate mode options to road users. Additionally, the East Riverside Corridor Plan and Imagine Austin Comprehensive Plan rely on transit to facilitate growth and establish 'Town Centers' and activity corridors for people to live and work. Project Connect, CapMetro's long range future planning effort, aims to increase transit service and ridership in the area. Also, the ASMP identifies the need for higher frequency transit and better amenities at transit stops to increase transit ridership.

CapMetro has identified several needs in the area to achieve both the City of Austin's and CapMetro's goals and have identified the proposed Bus Rapid Transit (BRT) line along Pleasant Valley as a critical improvement. To help facilitate transit, TDM plans, and alternative modes in the area, a contribution of $1,606,000.00 fee in-lieu is recommended towards the Project Connect improvements along the Pleasant Valley BRT Light transit line.

Additionally, CapMetro staff identified several other needed transit improvements in the area. A pro-rata share of these improvements was determined and $150,600.00 of improvements have been identified to be constructed by the Applicant. The identified improvements can be seen in Attachment C and Attachment D.

Improvements to Active Modes (Pedestrian and Bicycle Infrastructure):

Improvements to active modes infrastructure is required to fully leverage the TDM plan and to provide alternate mode options to all road users. Additionally, there are several trails and parks located around the project. The ASMP aims to identify and eliminate significant infrastructure gaps in the bicycle system. Therefore, the analysis identified many active modes infrastructure needs. The following were identified as needs in the area based on City identified plans and studies:

1. All-Ages Bike Facilities:
   a. East Riverside Corridor
b. Tinnin Ford Road  
c. Elmont Drive  
d. Lakeshore Boulevard Extension  
e. Wickersham Lane Extension  
2. Longhorn Pedestrian and Bike Bridge  
3. Shared use path connections on along Pleasant Valley Rd.  
4. Country Club Trail improvements; to include both pedestrian and bike trails connection through the site.  
5. Pedestrian connectivity as required by the ERC.  
6. Grade separated pedestrian access across Pleasant Valley Rd at Lakeshore Blvd.  

Staff Recommendations:  

1. The Applicant shall design and construct and fund 100% of the off-site improvements identified in Attachment C as part of their site development applications, as identified for each tract. Off-site improvements should be included within the first site plan for each identified tract. No temporary certificate of occupancy (TCO) shall be issued until the construction of the identified improvements is complete. Note: Cost estimates should not be assumed to represent the maximum dollar value of improvements the applicant may be required to construct.  
2. Fee in-lieu contribution to the City of Austin is recommended to be made for the improvements identified in Attachment D totaling $4,006,000.00, before third reading a: City Council.  
3. The Applicant is required to achieve a vehicle trip reduction per phase as described in Table 5. The Applicant commits to implement the Transportation Demand Management (TDM) plan submitted with the TIA. Site plan applications submitted under this zoning should provide a letter demonstrating compliance with the TDM plan. Annual monitoring reports should also be submitted for the site to ensure compliance. If reduction targets are not met, site plan permits under all three zoning cases may be held based on the criteria described in the TDM plan.  
4. The Applicant shall construct all on-site, public roadways to meet requirements of the ERC and required cross sections based on the results of the TIA.  
5. The Applicant shall construct the Country Club Trail through the site to the cross section identified in the TIA.  
6. Development of this property should not vary from the approved uses or deviate from the approved intensities and estimated traffic generation assumptions within the finalized TIA document, including land uses, trip generation, trip distribution, traffic controls, driveway locations, and other identified conditions. Any change in the assumptions made to the TIA document shall be reviewed by ATD and may require a new or updated TIA/addendum.  
7. The Applicant shall provide two copies of the final, updated version of the TIA before 3rd reading, matching Council's approved intensity recommendation.  
8. The findings and recommendations of this TIA memorandum remain valid until five (5) years from the date of this memo, after which a revised TIA or addendum may be required.
If you have any questions or require additional information, please contact me at 512-974-1449.

Austin Jones, P.E.

WHEREAS, Dickson Properties and Roberta Dickson, as owners of approximately 497 acres in the City of Austin, Travis County, Texas, according to field notes prepared by S. A. Garza, Registered Professional Engineer, on August 1, 1972, a copy of which is attached marked Exhibit "A", by agreement with the City of Austin impressed upon said 497 acres certain covenants and restrictions dated January 3, 1973, wherein the development of said 497 was restricted.

WHEREAS, said covenants and restrictions require that any modification, amended or termination of said agreement be by joint action of both (a) a majority of the members of the City Council of the City of Austin, or such other governing body as may succeed the City Council of the City of Austin, and, (b) by the owners of the above described property at the time of such modification, amendment, or termination.

WHEREAS, the owners have presented to the City of Austin a revised conceptual plan for the development of the 497 acres dated October 3, 1973, a copy of which is attached hereto and marked Exhibit "C".

WHEREAS, the Capitol National Bank as Trustee and Roberta Dickson, Dickson Properties, Inc., and Mark Eight Associates, a Texas Limited Partnership as beneficiaries were the owners of said 497 acres as of the date of said revised conceptual plan and are presently owners of approximately 402 of said 497 acres and Austin Country Club Estates, a Texas Limited Partnership has purchased 94.984 acres of said 497 acres, said 94.984 are described in the field notes prepared by Jeryl D. Hart, Registered Professional Engineer, on November 2, 1973, a copy of which is attached marked Exhibit "B", and is presently owner of said 94.984 acres as described, and these owners hereinafter shall be referred to as Owners.
Whereas, the City of Austin and the Owners have agreed that the covenants and restrictions dated January 3, 1973 should be terminated and that the above described property should be impressed with certain other covenants and restrictions running with the land and desire to set forth such agreement and such covenants and restrictions in writing.

Now therefore, the Owners for and in consideration of One and No/100 Dollars ($1.00) and other good and valuable consideration in hand to the undersigned paid by the City of Austin, the receipt of which is hereby acknowledged, does hereby agree with respect to said property described above, such agreement to be deemed and considered as a covenant running with the land and which shall be binding on them, their successors and assigns, as follows, to wit:

1. The total number of dwelling units for the described 497 acres shall not exceed a total of 4,658.

2. The conceptual plan dated October 3, 1973 which shows the property divided into designated areas referred to as Tracts and numbered as Tracts 1 through 25, a copy of which is attached hereto and marked as Exhibit "C", is the official plan approved by the City of Austin and supersedes and replaces any and all previously adopted plans.

3. Those Tracts 1 through 25 which relate to residential uses on said official plan shall be restricted to the approximate densities and number of dwelling units shown thereon, the total of which shall not exceed 4,658 and subject to the following conditions:

4. The number of acres designated to each tract is approximate and adjustments to the total number of dwelling units for a specific Tract will be made based upon the true number of acres contained within a tract as shown on the preliminary plat and the total dwelling units for a specific tract will be shown on said preliminary plat and will be based upon the number of acres multiplied by the designated density provided for said tract as indicated above. The preliminary plat will indicate the density requirements as indicated above and all final subdivision plans must be in conformance with these density restrictions and must be so designated on the recorded plan(s). Although adjustments because of approximation as to acreage shall be allowed as set forth above the overall density limitation of 4,658 units shall not be exceeded unless otherwise agreed to by the City of Austin and the Owners.
5. If any person, persons, corporations or entity of any other character shall violate or attempt to violate the foregoing agreement and covenant, it shall be lawful for the City of Austin, a municipal corporation, its successors and assigns, to prosecute proceedings at law, or in equity, against said person, or entity violating or attempting to violate such agreement or covenant and to prevent said person or entity from violating or attempting to violate such agreement or covenant.

6. If any part or provision of this agreement or covenant herein contained shall be declared invalid, by judgment or court order, the same shall in no wise affect any of the other provisions of this agreement, and such remaining portion of this agreement shall remain in full force and effect.

7. The failure at any time to enforce this agreement by the City of Austin, its successors and assigns, whether any violations thereof are known or not, shall not constitute a waiver or estoppel of the right to do so.

8. This agreement may be modified, amended or terminated only by joint action of both (a) a majority of the members of the City Council of the City of Austin, or such other governing body as may succeed the City Council of the City of Austin, and, (b) by the owners of the above described property at the time of such modification, amendment, or termination.

9. The purpose of this Covenant is to limit the development of the areas as to density and shall in no way be construed as a dedication of any street or area for specific use.
EXECUTED this 31st day of January, A.D. 1975.

JUL 24 1975

[Signature]
COUNTY CLERK,
TRAVIS COUNTY, TEXAS
DECLARATION OF RESTRICTIVE COVENANT

STATE OF TEXAS

COUNTY OF TRAVIS

KNOW ALL MEN BY THESE PRESENTS:

THIS DECLARATION OF RESTRICTIVE COVENANT (this "Declaration") is made on the 21st day of January, 1997, by SK PROPERTIES, L.P., a Kansas limited partnership ("Declarant").

WITNESSETH:

A. Declarant is the fee simple owner of that certain approximately 19.128 acre tract of real property situated in the City of Austin, Travis County, Texas, more particularly described on Exhibit A attached hereto and incorporated herein by reference (the "Property"). Declarant currently intends to construct a multi-family project on the Property (the "Project").

B. Declarant desires for the restrictive covenant described herein to be established with respect to the Property.

NOW, THEREFORE, and in accordance with the doctrines of restrictive covenants and implied equitable servitude, Declarant, intending to bind itself, its assigns and successors, and all other persons hereafter having interest in the Property, does hereby declare, impose and subject the Property as follows:

1. Fence Restriction. Declarant hereby agrees to construct and maintain a fence around the Project which is at least six (6) feet in height and is constructed of decorative metal and/or masonry columns or provides substantially equivalent security and aesthetics. In no event shall a chain link fence comply with the foregoing requirement.

2. Parking Restriction. Declarant hereby agrees that it will provide at least one (1) parking space on the Property for each bedroom contained within the Project.

3. Binding Effect: Third Parties. It is intended that the provisions of this Declaration shall run with the land. No rights, privileges or immunities, however, shall inure to the benefit of any adjoining property owner or other third party as a result of this Declaration, nor shall any adjoining property owner or other third party be deemed to be a beneficiary of any of the provisions contained herein.

4. Modification. This Declaration may be modified, amended, or terminated only by joint action of both (a) a majority of the members of the City Council of the City of Austin and (b) the owner(s) of at least seventy-five percent (75%) of the gross land area of the Property at the time of such modification, amendment or termination.
5. **Enforcement of Declaration.**

   (a) If any person or entity shall violate or attempt to violate this Declaration, it shall be lawful for the City of Austin to prosecute proceedings at law or in equity against such person or entity violating or attempting to violate this Declaration to prevent the person or entity from such actions, and to collect damages for such actions.

   (b) If any part of this Declaration is declared invalid, by judgment or court order, the same shall in no way affect any of the other provisions of this Declaration, and such remaining portion of this Declaration shall remain in full effect.

   (c) If at any time the City of Austin fails to enforce this Declaration, whether or not any violations of it are known, such failure shall not constitute a waiver or estoppel of the right to enforce it.

IN WITNESS WHEREOF, Declarant has caused this Declaration of Restrictive Covenant to be executed as of the date and year first above written.

“Whatever it Takes”

MEMORANDUM

TO: Michael Whellan
FROM: Bill Myers
DATE: 3/15/2019
SUBJECT: Riverside Drive

Mr. Whellan,
Thank you for forwarding the information on the proposed Riverside Drive Development. Currently Baty elementary school is near capacity, so any additional housing units will have an educational impact on the district. We will review attendance boundaries next spring and it may become necessary to zone some neighborhoods in that area away from nearby schools to those on the outer edge of the district. Developers need to be aware of this so that they do not give out incorrect or misleading information to potential tenants. We also ask that in the planning of the Development that a Safe route to the school or to the bus pickup is considered.

Do you have any forecast of completion timelines on this project you can share?

Thanks again for the information,

Bill Myers
Office 386-3124
Bmyers@dvisd.net
Question or Comment:

I walk in Ray Guerrero park everyday. You will seriously impact this parkland, and arguing that it's a small piece of land doesn't negate what you're doing. This is the last affordable area close to town with public land and you are taking it AWAY.

Would you like someone to contact you with a response to your question? Yes / No

If so, please write your name and contact info:

Question or Comment:

I am strongly opposed to the demolition of student and low-income housing to build high-rise luxury apartments in the heart of our city. Moreover, we must not cede a single square foot of our beautiful, wild public park land for the sake of personal profit or heedless development. To do so would be to short-change and betray our children and grandchildren, and would be a violation of the values that we claim to hold dear as Austinites.

Would you like someone to contact you with a response to your question? Yes / No

If so, please write your name and contact info:
Question or Comment:

Love the changes being made to the Riverside area. I am a homeowner in the area and have lived here for many years. I have lived in Austin for over 30 years and know it is an expensive place to live. I have struggled at times myself and have lived in all parts as a renter and owner. What can help those less fortunate?

Would you like someone to contact you with a response to your question? Yes / No

If so, please write your name and contact info:

Question or Comment:

New zoning is required to handle the growth of the city. I hope the project goes through. Please, think about micro-mobility (bikes, scooters, transit).

Would you like someone to contact you with a response to your question? Yes / No

If so, please write your name and contact info:
Question or Comment:
As elected representatives, you'll have a responsibility to us, the people of Austin. How does displacing so many family units, driving up rent prices and pricing out the people you represent benefit the people you're supposed to serve?

Would you like someone to contact you with a response to your question? Yes / No

If so, please write your name and contact info:

Question or Comment:

AUSTIN'S INDOOR PARKLANDS ARE A NON-RENEWABLE RESOURCE. PLEASE WORK HARD TO MINIMIZE IMPACTS TO THE PRODUCTION OF PARKLANDS.

Would you like someone to contact you with a response to your question? Yes / No

If so, please write your name and contact info:
Question or Comment:

When are the residents of those apartments affected supposed to go? I live at one of the Quads and I've been lucky to have affordable housing this close to work without a car. I'm not convinced that this redevelopment has a plan for where these many students are supposed to move to. I feel like I'm being used off a timeless time before having to pack my bags and be pushed again throughout town, or worse, out of Austin all together.

Would you like someone to contact you with a response to your question? Yes / No

If so, please write your name and contact info:

---

Question or Comment:

Given the recent flap regarding taking parkland for private development, how can you ever consider taking parkland for this development?

Would you like someone to contact you with a response to your question? Yes / No

If so, please write your name and contact info:
Question or Comment:

I am strongly opposed to the demolition of student and low-income housing to build high-rise luxury apartments in the heart of our city. Moreover, we must not lose a single square foot of our beautiful, wild public parkland for the sake of personal profit or heedless development. To do so would be to steal from and betray our children and grand children, and would be a violation of the values that we claim to hold dear as Austinites.

Question or Comment:
In a city lacking in beds in homeless shelters & sustainable post-shelter dwellings (homes for families or at the 38% rate) how can the city justify knocking down vital affordable housing stock to an equally vital low barrier to entry? I work at the intersection of affordable housing & immigration, partnered with refugees & asylum seekers. The housing in the Ballpark & on Noverse is an tantamount resource in an asylum to help folks get out of detention & start life, stability, in America. If we lose this housing stock we lose an urgent resource in one toolbox to keep asylum-seekers stay safe.

Dear Mr. Grantham,

I am an Austin resident, an advocate for low-income housing and racial equity, and a regular visitor to the Roy G. Guerrero park.

I strongly oppose the rezoning of East Riverside. This is a neighborhood that has been home to people of color and low-income folks for decades. In recent years, as the cost of housing has risen astronomically, families have been forcibly displaced to make way for luxury and market rate housing.

Furthermore, destroying any part of the invaluable park land and wild spaces of Roy G. Guerrero Park is a step backwards from which our city will not recover. That habitat has been preserved through the hard work of many of Austin's communities, and every square foot of it must be protected.

A "new Domain" is not what District 2 or Riverside needs, and is not a part of the Austin I want to live in. I strongly oppose the proposed rezoning.

Thank you,
Julia Von Alexander

Subject: Concern about development in East Riverside

Follow Up Flag: Follow up
Flag Status: Flagged

Hello,
I am a concerned citizen and former resident of the East Oltorf and Riverside area and would like to express my concerns about the further development of public land for luxury housing developments which have plagued East Austin for the last decade and displaced numerous long time residents of the area. I am especially concerned about the Presidium Group's plans to continue the progress on their developments on Riverside and the potential harm that could be done to the Roy G. Guerrero Park, which is a public community space that is vital to local residents. I am also very concerned about the damage that this would do to local residents and students in the Ballpark, Quad and other apartments in the area with rising rent prices and property taxes for residents, as well as outright displacement.

I am writing that you pass my concerns on to the planning commission and that I urge them to vote against this rezoning and accommodation of developers of the interests of Eastside residents.
Thank you,
Leticia Urieta

Mr. Grantham,

I am writing to urge you to deny the permit to build another Domain in the Riverside neighborhood. As a resident of Austin for the past 20 years, I can say that we have more than enough shopping districts, and a dearth of affordable housing. This development would pave over the affordable housing this city desperately needs - please deny this permit.

Sincerely,

Amanda Cavazos Weems

Statement on Proposed Road Construction through Roy Guerrero Park  
City of Austin Community Meeting  
Wednesday, March 27, 2019

This project should not be allowed to continue without a complete and thorough review by an environmental board. This review should certainly include a full-scale environmental impact report. In the proposal to extend Lakeshore Boulevard through Roy Guerrero Park, the city has yet to acknowledge a number of environmental effects that the road would have on the species of Roy Guerrero Park, and on the surrounding landscape. Likewise, before any further construction planning of the road happens, the city has a responsibility to acknowledge and account for health costs, pollution costs, and hidden economic costs.

We should first acknowledge that the construction of the road would lead to habitat destruction of many species in Roy G Park. Building the road would necessitate the clearing of dozens of trees -- the exact amount is unknown until the city produces the necessary tree inventory. These trees house many of the 230 bird species found in Roy G Park (Pfeil, 2018). Destruction of these trees will result in a loss of habitat for these species, causing ecosystem disruption as they’re forced to relocate and build new nests.

We also risk future destruction of habitat through the creation of impervious surface. With the construction of the road, rainfall that would normally seep into the ground is now blocked from doing so. This water is expected to runoff to the Colorado River, causing higher-than-typical amounts of erosion. This erosion will likely compromise the habitat of a number of ground-dwelling species in Roy G Park.

The creation of impervious surface is also dangerous because it compromises the health of aquatic ecosystems and our own water supply. The proposed road would be built to connect “Lakeshore Road” -- aptly named, as it lies literally on the shore of Town Lake, a primary water source of Austin. Articles from the Journal of Contaminant Hydrology estimate that up to 20% of pollutants emitted from vehicles are brought to water sources via stormwater on impervious surfaces (Göbel, 2007). These include road surface abrasion, tire abrasion, brake pad abrasion, drip loss from fuel, oil, antifreeze, and others. All of these contaminants would appear in our water at higher rates than they do now if the road is built. This isn’t even to acknowledge the runoff into the water that would surely happen from the actual construction of the road, with the use of soil-breaking technologies. There can be no doubt that the construction of this road would lead to further contamination of the Colorado River, both in toxic chemicals and sediments. There can likewise be no doubt that this would consequently increase the strain on our water filtration
systems. After our city's water crisis of October 2018, a crisis which primarily affected the exact people who this development project seeks to displace, we should surely be more aware of issues pertaining our water sources. We at least require the due diligence of having a full report to document what impacts the construction of the road would have on Town Lake.

The proposed road would impact not only water pollution, but also air pollution. Given the enormity of the proposed development in the 97 acres south-southwest of the park, it's expected that this road would be heavily trafficked, especially during rush hour times. The vehicular organic compound emissions from automobile traffic in this area would not only impact the nearby park wildlife, but also the families living in the 97 acres and visitors to the park. Our best science to date suggests that this would significantly increase cases of asthma, bronchitis, and other respiratory afflictions among those living within a few hundred feet of the road (Kim, 2004). This increases economic strain on the city via increased healthcare costs for those living in the East Riverside Corridor.

Noise pollution is another item that an environmental committee will need to take a look at. Noise pollution is considered by the World Health Organization to be the third most hazardous type of pollution, yet we have failed to account for it in the proposed building of this road (Khilman, 2004). Roy Guerrero Park's main attraction point for visitors is the feeling of total separation one has from the urban landscape we live in. Noise pollution infringes on this feeling of separation. A study done in the journal of urban planning shows that the presence of a road near parkland increases the noise in the park by several decibels (Merchan, 2014). An analysis of this trend in the same article showed that this increase in noise greatly decreased visitor satisfaction with their park experience. This noise pollution will likely disrupt other animal species living near the border of the park, and has the potential to impact mating and behavior patterns of certain species. We will not know the full impact of the noise pollution from the road until the city necessarily researches it and reports on the findings.

The city cannot move forward with this project until full-scale impact reports are completed. To say that the only environmental impact of the road is the few acres of park it replaces is to be ignorant of the many other far-reaching ecosystem impacts we know will occur. The city is so eager to get the 97 acres development done that we've been neglecting its true costs, whether they be environmental, health-related, or economic. Citizens have a right to know all the impacts this road will have on their park, their communities, their water, and their health. At the very least, there should be more than a single community meeting about the topic. More discussion and research is required before anything regarding this road gets done.

Dear Scott Grantham,

This is a message, not just to you, but for all workers of the city of Austin. I want to remind you of who you’re affecting when you make your decisions. I want to remind you of the people who are struggling to survive at the place we’ve called home for so long. I want you to see the faces of the people you’re actually supposed to work for. We are the workers that keep Austin running, us, not the developers, not the tech executives, and, sure as hell, not the CEOs. Our homes are being destroyed, our communities are being pushed further and further out from the city, the lives people have known for decades have been left to decay and now are being replaced because they’re no longer profitable.

Primarily communities of color face a city that is becoming ever more hostile to them, with the cost of living rising, our communities left to rot, and the ever-present police that label us as criminals. I ask you today, do you have any humanity? If you answered yes, show it. If you answered no, then get the hell out of our city. We are the people making sure Austin, and the world, keep running, we will not be silenced, we will no longer be crushed under the foot of capital. We will fight for our homes, our communities, and our lives, and nothing can stop our power.

Sincerely,

Austin native Carly Lucas-melanson
Hello Scott, I am a supporter of the Defend Riverside campaign and I do not want to see 4,000 people displaced. The rezoning of the Ballpark Apartments will have a negative affect on the community. Deny the application!

Brief Statement Regarding the Proposed Road through Guerrero Park

The proposed plan to build a new road through the Roy G. Guerrero park as a result of the new housing development plan on the East Riverside Corridor is one that should be reviewed and (in my opinion) revised going forward.

Housing Plan:

The road intends to abate traffic in the riverside area for the new housing plan proposed by a developer from California (which would construct 5,000+ new housing units). This housing plan would displace close to a thousand Austin families living in affordable East Austin housing, demolishing a housing complex known to many native Austinites as ‘The Ballpark’. Not only this, but this complex would bring an enormous amount of population density to an area already struggling with great amounts of traffic and car pollution.

Guerrero Park:

The Roy G. Guerrero public park park is an important part of Austin’s urban ecosystem, containing over 500 recorded plant species and 230 unique Bird species. This public space serves not only as a unique, thriving and green habitat to this abundance of Austin species, but also serves as a metropolitan recreational space. The park provides baseball fields, disc golf, hike and bike trails, and bird watching opportunities to the local Austin community. This is a unique public space in a city of Austin’s size that deserves to be preserved.

Proposed Road:

The proposed road would cut directly into the public parkland of Guerrero Park, and I would like to make the case that this is problematic. This project raises a whole host of concerns from an Environmental standpoint. The effects of the introduction of an increase of traffic in wildlife sensitive areas have been shown to increase the rates of wildlife fragmentation and loss;
this is caused by pollution from traffic (light, noise and emissions based), traffic and animal collisions, among many other road related factors. The introduction of streets and roads have been cited to be among the most devastating factors in regards to environmental habitat degradation and fragmentation (Ree, et. al, 2011).

In conclusion, this project deserves to have a deep review done by both the community and the City of Austin. The environmental and wildlife effects to Roy Guerrero park, and the surrounding Colorado River ecosystem, could be irreversible and as such need deserve serious research and consideration.

Hello Scott!

Hey it's been over a year and all seems to have settled out a little bit at pilots knob. The easement was never officially activated or used and I'm still kinda confused as to what might happen with that in the future. Anyways, thanks for engaging in that in 2016. Still cleaning up flood debris and rebuilding. It's been very difficult to reclaim that space from nature.

I also just wanted to say a quick few words on the issue of development on east riverside. I grew up in Del Valle, and had my first jobs on riverside dr. Thundercloud subs! The domain style riverside development plans would really tear that community apart and forever change the proud working class and student vibe and history, of ballpark apartments and riverside in general. I know there's more money in razing and rebuilding a new tech playground OZ style palace. But please consider all the families and businesses that will be priced out. Also consider the unfair, sometimes clearly classist and seemingly racist gentrification of east Austin in general. We're rooting for the city planners and folks in yalls positions to make the calls that forever determine the neighborhoods we live in and want to share with our children. Hope yer on the right side of the votes, plans, history etc.

Thanks
Nick turkette

Statement Regarding the Importance of Roy G. Guerrero Park on Historically Oppressed Residents  
City of Austin Community Meeting  
Wednesday, March 27th, 2019

Austin, TX is well-known for its harmonious melding of urban and natural environments. In a 360 degree turn, you can see the hustle and bustle of Downtown, 6th Street, and South Congress, as well as the beautiful serenity of Lady Bird Lake, Zilker Park, and Auditorium Shores. However, Austin has also gained notoriety for its absurd rising housing costs and inequality, consistently making top ten lists for the most gentrified cities in America.\(^1\) It is more and more evident every day that Austin tends to cater to the white and the wealthy, and this proposed “development” of Riverside from NRE ION LLC (97 Acre Zoning Cases: C14-2018-0026, 0027 & 0028) is a perfect exemplification of this skewed partiality. This private developer wants to demolish 1,308 affordable housing units and has proposed putting a road through the Roy G. Guerrero park. This is a blatant disregard for people of lower socioeconomic status (who are also typically of Hispanic/Chicano/Latinx origin) by displacing those residents and creating new, more expensive, multi-family units, hotel rooms, and office space through this high density project. The people that are not directly being dislocated from their affordable living arrangements will still be affected, as this proposed project will cause exorbitant price hikes in rent and other living costs to nearby areas as more developers frantically land-grab and perpetuate the driving out of people of color, much like Austin has historically since the early 1900’s with the segregation associated with I-35.

Not only are private developers like NRE ION LLC aiding and abetting the racism and inequality ingrained in Austin’s housing market, but they are also attacking the biggest public park land available to these same disadvantaged

---

groups. Roy G. Guerrero park is a place of solace for many people of lower socioeconomic status, and even the smallest intrusion into this park would be a slap in the face to those already facing so much adversity.

The physical, social, and mental health benefits are abundant with regards to accessibility of green spaces and exposure to nature. A plethora of research and studies have been conducted on this association and it is well known in the scientific community that contact with nature reduces stress, improves attention, increases longevity, reduces the risk of cardiovascular diseases and obesity, and provides a vast assortment of other restorative effects.³ Just existing in nature encourages physical activity, brings about mental peace, and fosters social cohesion, all of which facilitates a healthier, happier life than one without greenness.⁴ Our human connection to the environment has been well known for decades; Edward O. Wilson described this innate tendency to seek connection with nature and other forms of life in the biophilia hypothesis, which he proposed and popularized in 1984.⁵ Similarly, the term nature deficit (and moreso, nature deficit disorder), coined by Richard Louv in Last Child in the Woods describes the detrimental physiological and neurological conditions like obesity, attention disorders, and depression is partly due to a decrease in people's (particularly children's) lack of exposure to nature.⁶

To impede upon the residents of East Austin/Riverside's access to physical and mental health as well as social capital via the destruction/alteration of Roy G. Guerrero park would be a disgrace. This park (and these affordable housing units) are important to people, and Austin needs to support communities, not capitalism. Enough is enough - listen to the people affected by this “development” (i.e. gentrification) and save both Riverside and Roy Guerrero Park.
