Section 1: Applicant Statement

Street Address: 1612 Newton St. Austin, Texas 78704

Subdivision Legal Description:

THE SOUTH 55 FEET OF LOT 10, BLOCK B GUS F. BECKER'S SUBDIVISION OF SWISHER ADDITION

Lot(s): _____ Block(s): _____

Outlot: _____ Division: _____

Zoning District: SF-3-NP

I/We Anthony Brown on behalf of myself/ourselves as
authorized agent for myself affirm that on

Month December, Day 10, Year 2019, hereby apply for a hearing before the
Board of Adjustment for consideration to (select appropriate option below):

☒ Erect ☐ Attach ☐ Complete ☐ Remodel ☐ Maintain ☐ Other: _____

Type of Structure: single family residence

Portion of the City of Austin Land Development Code applicant is seeking a variance from:

I am seeking a variance to decrease the minimum lot size requirement of section 25-2-492 (D) from 5,750 square feet to 3,575 square feet in order to erect a single family residence in a SF3-NP

Section 2: Variance Findings

The Board must determine the existence of, sufficiency of, and weight of evidence supporting the findings described below. Therefore, you must complete each of the applicable Findings Statements as part of your application. Failure to do so may result in your application being rejected as incomplete. Please attach any additional supporting documents.

NOTE: The Board cannot grant a variance that would provide the applicant with a special privilege not enjoyed by others similarly situated or potentially similarly situated.

I contend that my entitlement to the requested variance is based on the following findings:

Reasonable Use

The zoning regulations applicable to the property do not allow for a reasonable use because:

The lot size is 3,575 square feet and does not comply with the code and therefore a variance is required to build a single family dwelling. The home will keep within the existing code requirements and without the approval of this variance the land will remain unbuildable.

Hardship

a) The hardship for which the variance is requested is unique to the property in that:

Currently this property cannot be built upon as it does not comply with the code. The current configuration of this lot has been the same and has not changed. A home was built on the property in 1946 with City of Austin Electric, Water tap and Gas service.

b) The hardship is not general to the area in which the property is located because:

This lot was the same configuration since 1946 and there was a home present here before.

Area Character

The variance will not alter the character of the area adjacent to the property, will not impair the use of adjacent conforming property, and will not impair the purpose of the regulations of the zoning district in which the property is located because:

The plans are to build a single family home in line with the existing homes in the neighborhood. The single family residence will not change the character of the neighborhood, or impair adjacent or surrounding properties.

Parking (additional criteria for parking variances only)

Request for a parking variance requires the Board to make additional findings. The Board may grant a variance to a regulation prescribed in the City of Austin Land Development Code Chapter 25-6, Appendix A with respect to the number of off-street parking spaces or loading facilities required if it makes findings of fact that the following additional circumstances also apply:

1. Neither present nor anticipated future traffic volumes generated by the use of the site or the uses of sites in the vicinity reasonably require strict or literal interpretation and enforcement of the specific regulation because:

N/A

2. The granting of this variance will not result in the parking or loading of vehicles on public streets in such a manner as to interfere with the free flow of traffic of the streets because:

N/A

3. The granting of this variance will not create a safety hazard or any other condition inconsistent with the objectives of this Ordinance because:

N/A

4. The variance will run with the use or uses to which it pertains and shall not run with the site because:

N/A

RealAVM™ (1):	\$658,200	Confidence Score (2):	60
RealAVM™ Range:	\$513,396 - \$803,004	Forecast Standard Deviation (3):	22
Value As Of:	01/11/2020		

- (1) RealAVM™ is a CoreLogic® derived value and should not be used in lieu of an appraisal. This represents an estimated sale price for this property. It is not the same as the opinion of value in an appraisal developed by a licensed appraiser under the Uniform Standards of Professional Appraisal Practice.
- (2) The Confidence Score is a measure of the extent to which sales data, property information, and comparable sales support the property valuation analysis process. The confidence score range is 60 - 100. Clear and consistent quality and quantity of data drive higher confidence scores while lower confidence scores indicate diversity in data, lower quality and quantity of data, and/or limited similarity of the subject property to comparable sales.
- (3) The FSD denotes confidence in an AVM estimate and uses a consistent scale and meaning to generate a standardized confidence metric. The FSD is a statistic that measures the likely range or dispersion an AVM estimate will fall within, based on the consistency of the information available to the AVM at the time of estimation. The FSD can be used to create confidence that the true value has a statistical degree of certainty.

It is not the same as the opinion of value in an appraisal developed by a licensed appraiser under the Uniform Standards of Professional Appraisal Practice.
- (2) The Confidence Score is a measure of the extent to which sales data, property information, and comparable sales support the property valuation analysis process. The confidence score range is 60 - 100. Clear and consistent quality and quantity of data drive higher confidence scores while lower confidence scores indicate diversity in data, lower quality and quantity of data, and/or limited similarity of the subject property to comparable sales.
- (3) The FSD denotes confidence in an AVM estimate and uses a consistent scale and meaning to generate a standardized confidence metric. The FSD is a statistic that measures the likely range or dispersion an AVM estimate will fall within, based on the consistency of the information available to the AVM at the time of estimation. The FSD can be used to create confidence that the true value has a statistical degree of certainty.

Subject: Case C15-2020-0004
1612 Newton Street

Board Members,

The applicant, Anthony Brown, has not come before the Bouldin Creek Zoning Committee with his variance request but you should be aware of why Bouldin Creek did not adopt the Small Lot Amnesty Infill Tool in our Neighborhood Plan in 2002. Our neighborhood includes both the East and West Bouldin Creek Watershed and when the NP was written we had numerous properties being affected by lot to lot and creek flooding. That situation is more acute today with Atlas 14 and the increased density the LDC Rewrite is projected to bring to the neighborhood.

We don't know what hardship Anthony Brown is claiming as justification for his request, but we wanted you to be aware of why the Small Lot Amnesty Tool is not incorporated in our NP.

Thank you for your service.

Sincerely,
