

Samsung Boulevard Right-of-Way Vacation Briefing

Urban Transportation Commission
December 8, 2020
Austin Transportation Department

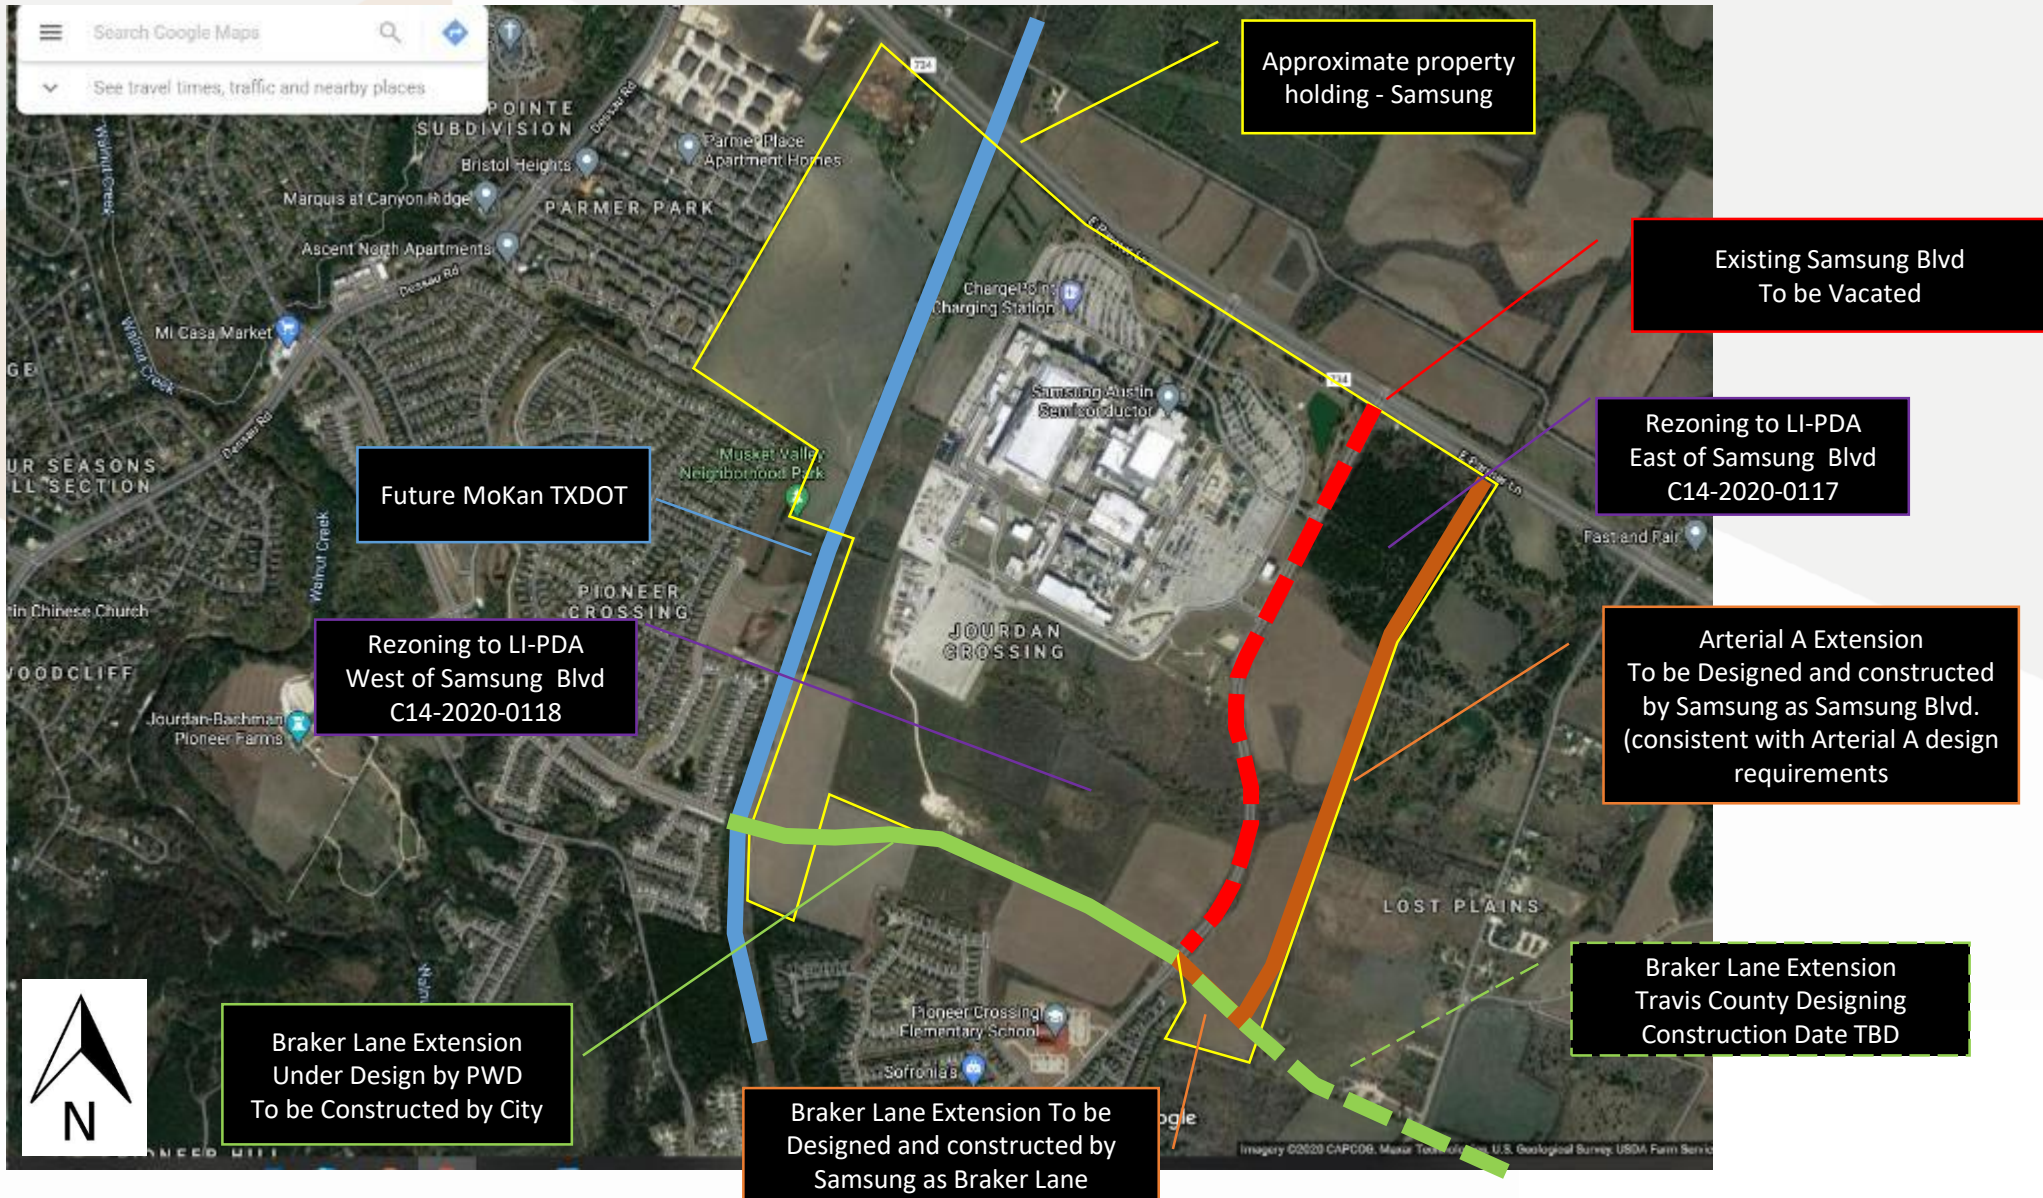

Overview

- COA departments have reviewed Samsung's two applications to vacate the street ROW of Samsung Blvd
 - **We are asking for UTC to recommend approval**
 - **We are taking the requests to Council for approval in January**
- Samsung will relocate Samsung Blvd and reconstruct it as a portion of the future parallel regional Arterial A facility
- Approvals are contingent on public utility and access easements being retained until the new Samsung Blvd designed to serve as Arterial A, is dedicated, constructed, and accepted
- COA departments support the requests if existing utilities are left in place until moved at the applicant's expense

Overview

- COA is designing and constructing the extension of Braker Ln from its terminus to the location of new Samsung Blvd (future Arterial A)
- Road projects in the Samsung area will expand the transportation network consistent with the adopted ASMP
- Projects will benefit Samsung as a major trip generator and the surrounding residential uses lacking an existing grid network
