#### Methodology

The Downtown Austin Alliance has conducted a count of all unsheltered persons, tents or makeshift structures, and inhabited vehicles within the Public Improvement District (PID), under the I-35 underpass, and the parkland along Lady Bird Lake. The count was conducted between 3AM and 6AM on the 3rd Thursday of the month using 10 teams to survey predetermined sub districts within the larger boundary. The count is limited to observation only and as a result a multiplier\*, used nationally and locally verified, is used to produce an estimated total number of individuals experiencing homelessness.
