Section 1: Applicant Statement

Street Address: 7236 and 7240 Dancing Wind

Subdivision Legal Description:

Stoney Ridge Phase C, Section 3 Subdivision

Lot(s): 9A and 9B Block(s): Block B

Outlot: _____ Division: _____

Zoning District: MF-2 - Limited Purpose Jurisdiction

I/We Michele Rogerson Lynch on behalf of myself/ourselves as
authorized agent for Lennar affirm that on
Month March, Day 2, Year 2022, hereby apply for a hearing before the
Board of Adjustment for consideration to (select appropriate option below):

☐ Erect ☐ Attach ☐ Complete ☐ Remodel ☒ Maintain ☐ Other: _____

Type of Structure: Single Family Attached Residential

Portion of the City of Austin Land Development Code applicant is seeking a variance from:

25-2-492 (Site Development Regulations) - MF-2 - 25 foot front yard setback. Seeking relief of 8.5 feet to allow a 16.5 foot front yard setback for an existing single family attached residential dwelling.

Section 2: Variance Findings

The Board must determine the existence of, sufficiency of, and weight of evidence supporting the findings described below. Therefore, you must complete each of the applicable Findings Statements as part of your application. Failure to do so may result in your application being rejected as incomplete. Please attach any additional supporting documents.

NOTE: The Board cannot grant a variance that would provide the applicant with a special privilege not enjoyed by others similarly situated or potentially similarly situated.

I contend that my entitlement to the requested variance is based on the following findings:

Reasonable Use

The zoning regulations applicable to the property do not allow for a reasonable use because:

The property is located in the City's Limited Purpose Jurisdiction and is subject to both 25-2-492 for MF-2 site development regulations as well as 30-2-233 for single family attached use in the ETJ per approved plat. The plat is being partially vacated and replatted to remove the 30-2-233 setback restriction. The single family attached dwelling was nearing final construction as part of an entire subdivision when it was discovered that the structure was 8.5 feet into the 25 foot required setback.

Hardship

a) The hardship for which the variance is requested is unique to the property in that:

The setback deviation is minor and is specific to this particular set of lots.

b) The hardship is not general to the area in which the property is located because:

The entire subdivision of 94 single family attached dwelling units and 47 lots is nearly completed and this is one of only two single family attached dwellings that will have slightly less than the 25 foot setback for MF-2 site development regulations.

Area Character

The variance will not alter the character of the area adjacent to the property, will not impair the use of adjacent conforming property, and will not impair the purpose of the regulations of the zoning district in which the property is located because:

As noted above the subdivision is nearly completed and this is only one of two single family attached dwellings that will have a slight deviation from the MF-2 setback regulations that were discovered by the owner in the field. The modified setback will not alter the character of the area as it is not noticeable in comparison to adjacent dwelling units as it is on a curved cul-de-sac and does not conflict with any easements. The subdivision plat is also being revised to remove the conflicting Title 30 setback provision for single family attached dwellings.

Parking (additional criteria for parking variances only)

Request for a parking variance requires the Board to make additional findings. The Board may grant a variance to a regulation prescribed in the City of Austin Land Development Code Chapter 25-6, Appendix A with respect to the number of off-street parking spaces or loading facilities required if it makes findings of fact that the following additional circumstances also apply:

1. Neither present nor anticipated future traffic volumes generated by the use of the site or the uses of sites in the vicinity reasonably require strict or literal interpretation and enforcement of the specific regulation because:

2. The granting of this variance will not result in the parking or loading of vehicles on public streets in such a manner as to interfere with the free flow of traffic of the streets because:

3. The granting of this variance will not create a safety hazard or any other condition inconsistent with the objectives of this Ordinance because:

4. The variance will run with the use or uses to which it pertains and shall not run with the site because:

Section 6: Additional Space (if applicable)

Please use the space below to provide additional information as needed. To ensure the information is referenced to the proper item, include the Section and Field names as well (continued on next page).

Lennar is the owner and builder of all subdivision lots. Lennar discovered in the field after the single family attached dwelling was constructed that there was a 8.5 foot encroachment into the 25 foot setback due to a survey error. The dwelling had already passed multiple inspections. The dwelling is also under contract to be sold. Pictures provided demonstrate that the minor

Additional Space (continued)

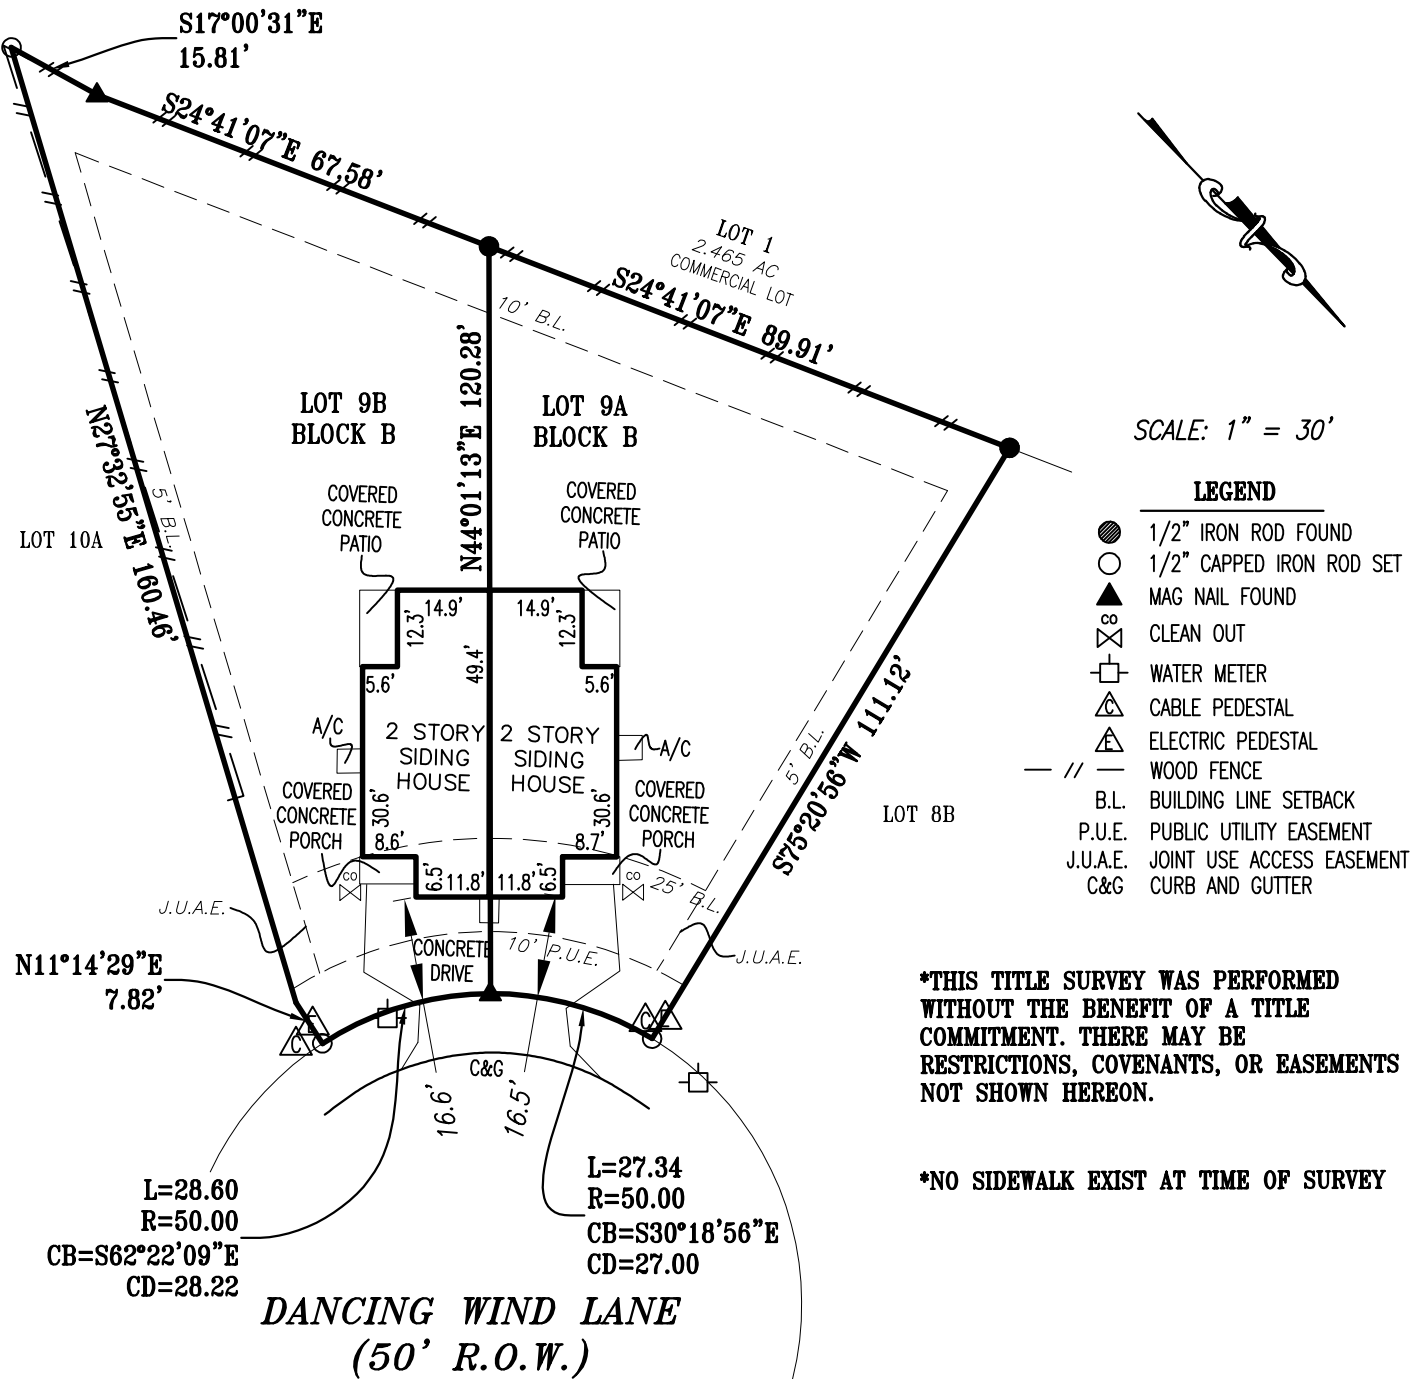

encroachment is minor in comparison to the adjacent dwelling units under construction. This is a unique and unfortunate circumstance for only two attached dwellings in the entire subdivision. Due to time constraints with the dwelling under contract, we respectfully request the minor deviation be allowed.
