

October 5, 2004

To: ACC and Austin City Council

WE, The residents of the Govalle neighborhood, are not in favor of a the proposed parking lot addition to the ACC Eastview site plan. We feel strongly that the ACC campus should not cross the tributary that provides a buffer between the new college and the community that has lived here for decades. We feel this proposed parking lot disregards the needs of the community that lives here. Paving the green space this would harm the neighborhood's safety, value, and beauty, and the increased traffic would be an unwelcome intrusion into a quiet residential area. The parking that exists at the Millenium Quest Youth Center should be utilized, or a parking garage should be built up on land already paved. The streets surrounding the college are zoned residential, and should be posted for residential parking only.

Thank you for your consideration.
