---

Austin Energy requests authorization to issue a rebate for the installation of a high efficiency chiller, high efficiency motors and lighting equipment improvements in accordance with the City of Austin's Commercial Rebate program guidelines. The program is one element of Austin Energy's comprehensive Energy Resource Plan approved by Council in December 2003.

Samsung Austin Semiconductor is located at 12100 Samsung Blvd. The demand (kW) savings associated with this project is estimated at 265 kW. The high efficiency equipment installed as part of this facility's upgrade, are estimated to provide yearly energy (kWh) savings of 1,125,610 kWh.

The City will not exceed the rebate offer of \$67,500.21 should the final installed measures be eligible for a higher rebate at the time of the final inspection due to changes in quantity or efficiency of equipment.
