MBE / WBE: This contract will be awarded in compliance with Chapter 2-9 of the City Code (Minority-Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this solicitation.

This contract is for the purchase of four portable changeable message signs to be used for traffic control purposes during traffic accidents, construction, special events, and any other incidents that may require special traffic control devices. The Portable Changeable Message (PCM) signs support the Watershed Protection and Development Review Department's (previously TPSD) business plan goals of providing safe and efficient multi-modal transportation infrastructure and optimizing utilization of existing roadway capacity.

PCM signs are electrically operated by solar-powered battery. They are trailer mounted and used to alert drivers of the presence of a work area or hazard ahead. The signs utilize light emitting diodes (LEDs) to provide legible messages to the traveling public. The units are composed of an electrically-operated sign panel, a self-contained, solar-maintained power source, and an apparatus for raising and lowering the panel. The units also include a microwave detection option (speed radar monitor), which is a low power standard traffic radar unit operating in an approach only mode for on-coming traffic.

There is a companion item for two portable solar-powered or battery-operated advisory radio systems. Each system can be placed along thoroughfares to inform motorists to tune to certain radio frequencies for information about roadway and weather conditions.
