"Austin, Texas, April 5, 1928.

Mr. Adam R. Johnson,
City Manager,
Austin, Texas.

City Council of the
City of Austin, Texas.

Gentlemen:

Dr. Z. T. Scott and his architect, Mr. George Louis Walling, have personally requested me to have a building line established for the corner of 7th and Brazos Streets. About 14 years ago the City of Austin established center lines for both 7th and Brazos Streets. I would like to see all established center lines used as the basis for all new buildings, but in previous instances, the present Council has adopted the policy of making practical adjustments respecting the present use of the City streets as evidenced by existing buildings. In accordance with this policy, I recommend that the building line for the west side of Brazos Street shall be established as 40 feet distant from and parallel to the established line of Brazos Street, and that the building line be established on the north side of 7th Street, the same to be an extension of the building line as now evidenced by the Stephen F. Austin Hotel.

For the purpose of explaining the existing conditions, Dr. Scott has had a private surveyor prepare maps which are presented for your consideration at this time. I have also prepared a map showing the line which I recommend as an extension of the Stephen F. Austin Hotel building line, together with comparisons of the amount of land which the property owners will gain and the amount of the street which the City will lose.

In the event the property owner should attempt to contend that he has established limitation rights in this street, I recommend that this matter be referred to the City Attorney, granting him ample time to make a study of the legal phases of the conditions as presented.

Respectfully submitted,

(Sgd) Orin E. Metcalfe,
City Engineer."

Mayor McFadden laid before the Council the following report of the Safety Committee:

" Austin, Texas, April 4, 1928.

Mr. Adam R. Johnson,
City Manager,
Austin, Texas.

Dear Sir:

The Safety Committee wishes to report that an inspection of the temporary bracing of the plaster ceilings in annex rooms previously inspected at the Baker School has been made and that same seems to be satisfactory, and that no further collapse is likely to take place between now and the termination of the school year providing care is taken to see that none of the supports are moved and that wooden blocks at the base of supports are kept tightly wedged.

We are informed by Mr. Mueller of the School Board that immediately upon the termination of the school year, steps will be taken to provide ample anchorage of the metal lathe and plaster to ceiling joists and render the ceilings safe in all respects. It seems that this is a satisfactory way of handling the matter and at the same time allow school activities to continue uninterrupted for the remainder of the school year.

Yours very truly,

SAFETY COMMITTEE

(Sgd) J. E. Woody,
Fire Chief.

R. F. Rockwood,
Fire Marshal.

Orin E. Metcalfe,
