---

This contract is for security system equipment and services for three projects at the 2nd Street Garage Office and at the Austin Convention Center. These projects include: 1. re-wiring of the current security system at the 2nd Street Garage Office to allow the Austin Convention Center control center to monitor alarms. This includes 600 ft of wire, seven hours of programming, testing and installation; 2. installation of five new PTZ (pan, tilt, zoom) cameras to replace existing still cameras, and to relocate existing cameras to improve security coverage at the ACC; and 3. replacement of the existing VHS camera recording system and installation of digital video recording equipment associated with existing cameras at the Convention Center control center.

The existing security system is from Simplex Grinnell. The Simplex Grinnell Secure System is a proprietary system, and all equipment, reconfiguration and programming must be provided by authorized Simplex Grinnell personnel. The equipment must be the same brand at both locations for compatibility and standardization of these systems at Austin Convention Center sites.
