For More Information: Philip L. Salyers, 974-7144; Mike Boyle, P.E., 972-0252, Laura Bohl, 974-7064.

Boards and Commission Action: Recommended by the Water and Wastewater Commission.

Purchasing Language: Lowest of three bids received.

MBE/WBE: 15.34% MBE and 4.55% WBE subcontractor participation.

As one of the non state-mandated 1997 Annexation Program projects, the Davenport Wastewater Improvements Project was created in order to convey the wastewater generated by the Davenport Ranch service area into the City of Austin collection system. The Davenport Wastewater Improvements Project includes three projects:

Project 1: 4,600 linear feet wastewater line constructed via horizontal directional drilling (HDD), from the proposed lift station site to the high point along Loop 360.

Project 2: After wastewater is conveyed by the HDD force mains to a high point along Loop 360, Project 2 includes the construction of a 15-inch gravity wastewater line to convey the flow to the Crosstown Tunnel at FM 2222.

This RCA requests authorization for the construction of Project 3, which consists of construction of the following:

- Lift Station (1,200 gallons per minute lift station, one duty and one standby pump including Wet Well, Valve Vault, Flow Metering System, and chemical system)
- Electrical Control System and Building
- Emergency Standby Generator
- Demolition of existing Davenport Wastewater Treatment Plant.

Due to the complexity of this project and coordination required for the tie-in work with the other two construction projects and the potential for unknown conditions at the wastewater treatment plant during demolition, a 5% contingency in funding has been included to allow for the expeditious processing of any future change orders. The contract allows 300 calendar days for completion of this project.

No. 050306-A
**RECOMMEND EXECUTION OF A CONSTRUCTION CONTRACT WITH KEYSTONE
CONSTRUCTION, INC., AUSTIN, TX FOR THE DAVENPORT LIFT STATION
PROJECT STAA #9A3**
