Communications and Technology Management RECOMMENDATION FOR COUNCIL ACTION

ITEM No. 10

Subject: Authorize the negotiation and execution of an Interlocal Agreement with the City of New Orleans, LA for a 12-month lease of 28 square feet of the Waller Creek Building, 625 East 10th Street for the City of New Orleans' installation, operation, and maintenance of a temporary disaster recovery data center in the amount of \$2868.95 with two 12-month extension options in an amount not to exceed \$2868.95 per extension option for a total lease amount not to exceed \$8,606.85.

Amount and Source of Funding: Revenue in the amount of \$2,868.95 will be included in the Fiscal Year 2005-2006 Approved Operating Budget of Communications and Technology Management. Revenue from the extension options is contingent upon execution of the extension options.

Fiscal Note: There is no unanticipated fiscal impact. A fiscal note is not required.

For More Information: Peter Collins, Chief Information Officer/974-2344

Purchasing Language: Interlocal Cooperative Agreement.

This Interlocal will allow the City to lease building space to the City of New Orleans to establish a temporary data center or "hot site" in Austin for disaster recovery services. A hot site is a fully operational offsite data processing facility equipped with both hardware and system software to be used in the event of a disaster or for disaster recovery. If there is a disaster in New Orleans and its emergency communications are inoperable, the City of New Orleans will have this location as a back up for its critical municipal systems and public safety systems. This agreement will include floor space, cooling, fire suppression, power connection and a demarcation point for networking.

The scope of the agreement includes design of the hot site based on the City of New Orleans' specifications, implementation and use of the hot site.

This Interlocal will allow the City to lease building space for the City of New Orleans to establish a temporary data center or “hotsite” in Austin for disaster recovery services. A hotsite is a fully operational offsite data processing facility equipped with both hardware and system software to be used in the event of a disaster or for disaster recovery.
