

- Department home page:**
The main goal was to eliminate unnecessary spacing and tighten up the overall layout.
1. Aligned search and action menu.
 2. Aligned top of menu with department banner image.
 3. Eliminated slight indent and adjusted spacing between header and paragraph. This change in particular helped pair headers with paragraphs more appropriately and helped tighten up page layouts throughout the site.
 4. Tightened up spacing in events.
 5. Corrected odd spacing.
 6. Eliminated gray text-header for small promos.
NOTE: This will likely require many departments to replace small promos that do not have text on them, or rework text.
