

- Resident home page:**
1. Updated background color to white.
 2. Aligned the action menu with the logo
 3. Made the bottom of the navigation and the feature banner box square, instead of rounded corners, to match the content boxes below them.
 4. Changed the corners of outside box square to match the headers inside the box. Adjusted the margins/spacing around the header boxes to fit within the outside box consistently.
 5. Made time fall directly under the event title
 6. Eliminated background image, but maintained background color and added a colored border to the top.

Business page:

Changes made to the Resident page are reflected here.

Development page:

Changes made to the Resident page are reflected here.

Additional changes:

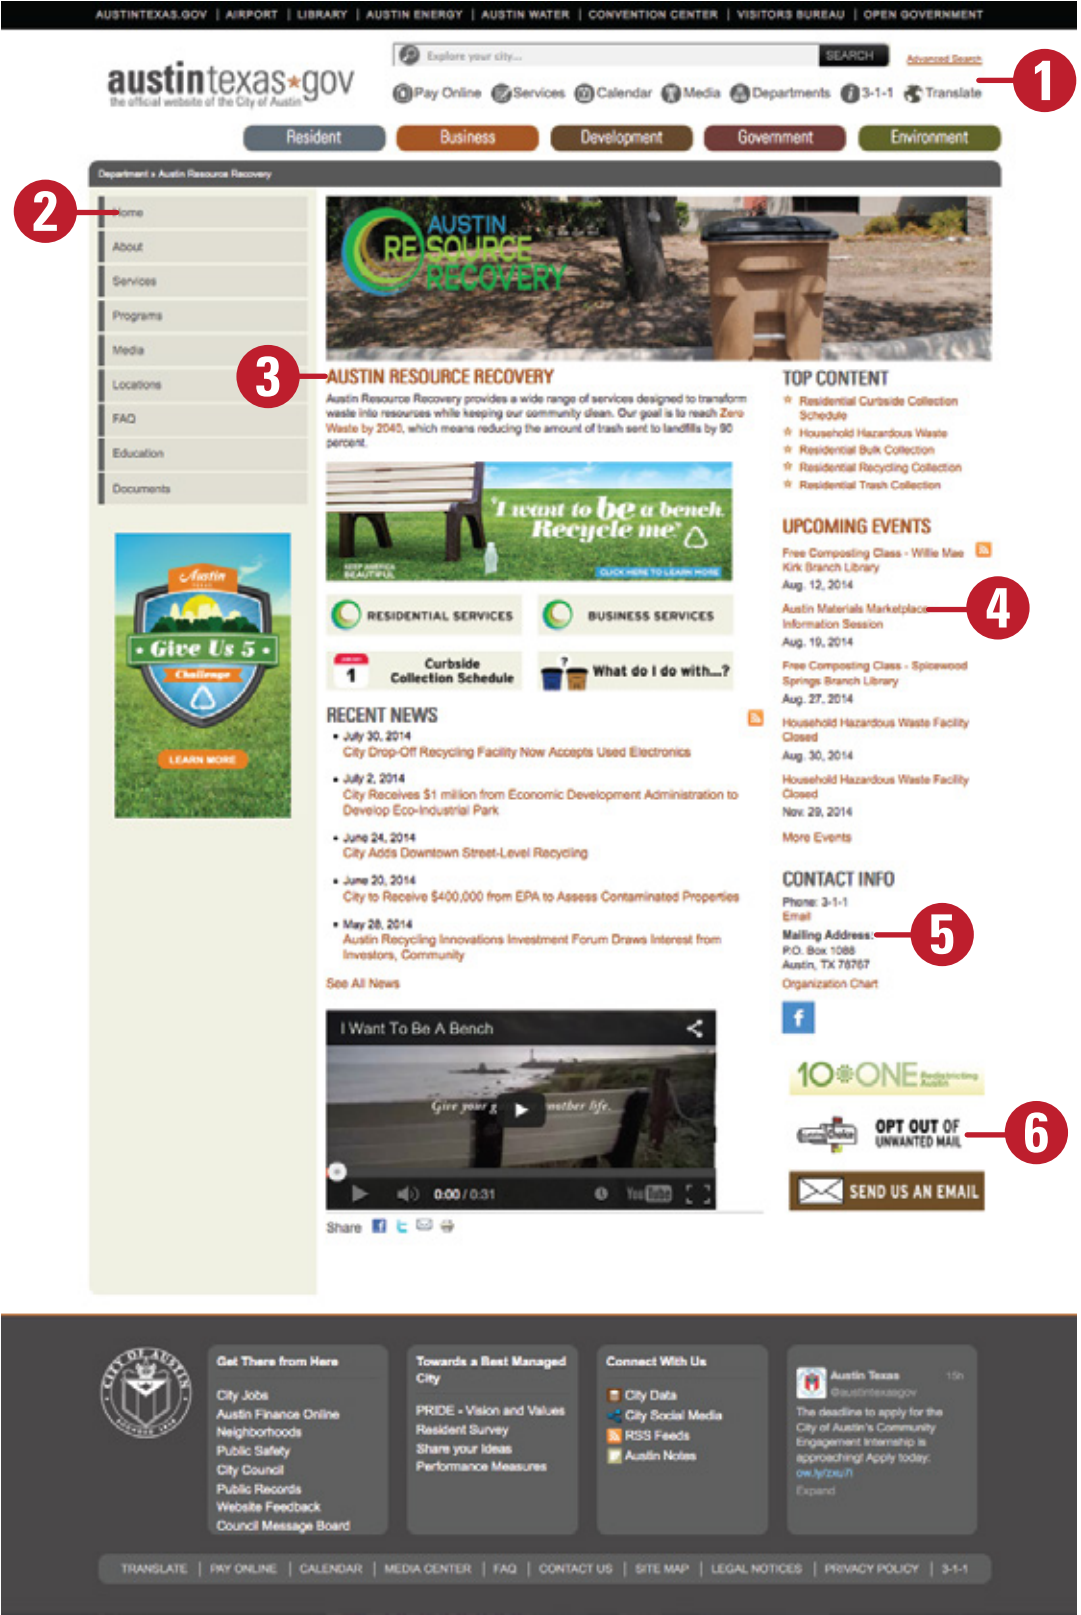

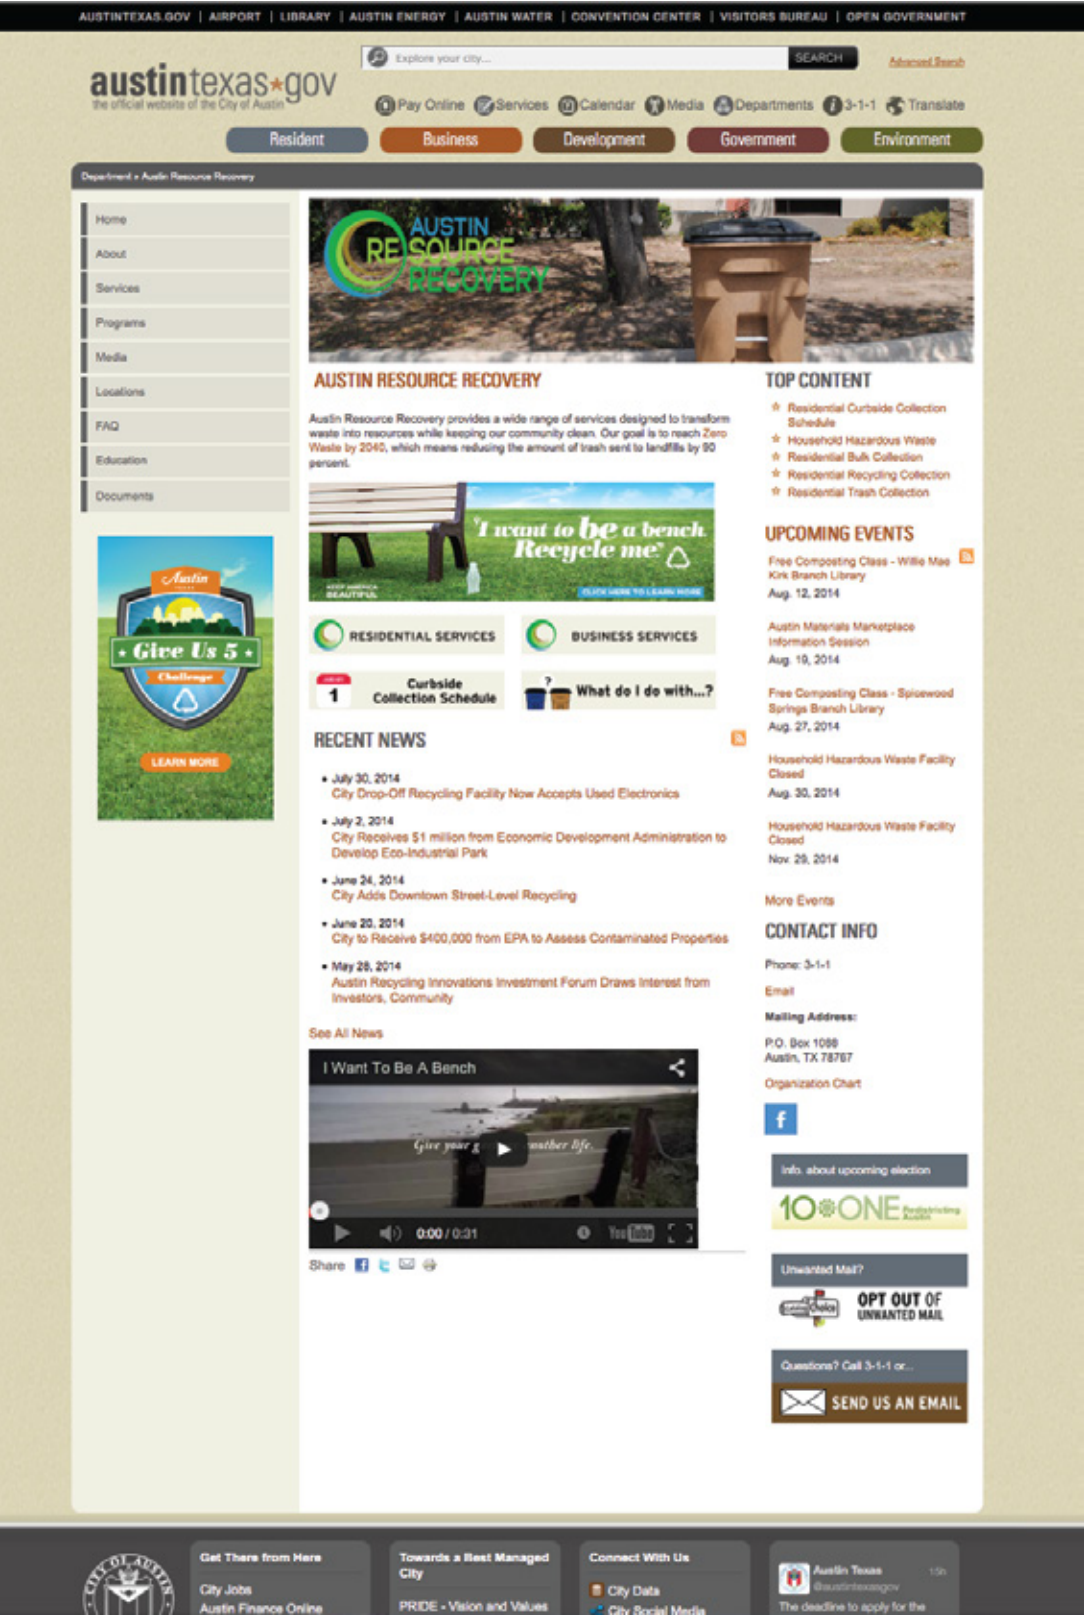

- 1. Updated PDR search box style.

Government page:

Changes made to the Resident page are reflected here.

Environment page:

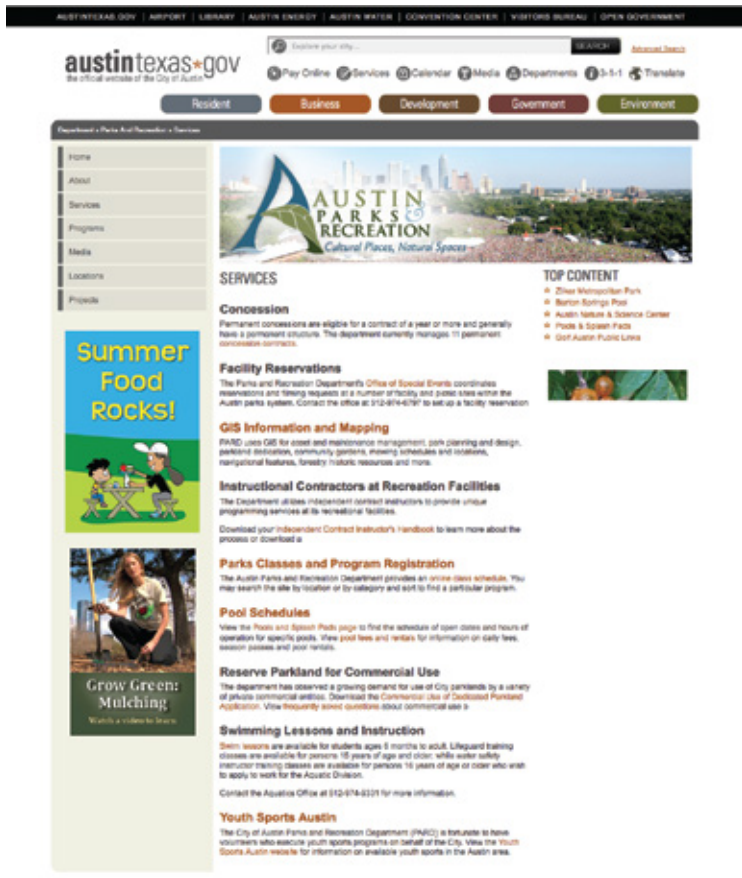

Changes made to the Resident page are reflected here.

Department home page:

The main goal was to eliminate unnecessary spacing and tighten up the overall layout.

1. Aligned search and action menu.
2. Aligned top of menu with department banner image.
3. Eliminated slight indent and adjusted spacing between header and paragraph. This change in particular helped pair headers with paragraphs more appropriately and helped tighten up page layouts throughout the site.
4. Tightened up spacing in events.
5. Corrected odd spacing.
6. Eliminated gray text-header for small promos. NOTE: This will likely require many departments to replace small promos that do not have text on them, or rework text.

Department services and programs pages:

Header/paragraph spacing fix noted in #3 of the previous page. Other changes noted in previous pages are also reflected here. These changes remain consistent throughout additional, internal pages.

Other fixes

Department custom menu:

A few custom menus throughout the site had some spacing issues. These have been corrected.

PDR Search:

Updated style.
