Travis County Epidemiological Summary of Salmonella Cases

2013 Salmonella Case Counts

Total	6	100.0%
Confirmed	6	100.0%
Probable	0	0.0%

Gender Distribution

Male	2	33.3%
Female	4	66.7%

Median Age

8.5 Months

Age Range

1 Month - 70 Years

Age Distribution

Under 1 Year	3	50.0%
1-3 Years	1	16.7%
4-8 Years	0	0.0%
9-14 Years	1	16.7%
15-24 Years	0	0.0%
25-34 Years	0	0.0%
35-44 Years	0	0.0%
45-54 Years	0	0.0%
55-64 Years	0	0.0%
65 Years and Older	1	16.7%

Data presented in this report includes both confirmed and probable cases of Salmonella reported in Travis County. This report includes completed case investigations only. All 2012 and 2013 data are preliminary. The data provided for 2012 and 2013 was generated on February 13, 2013.

Austin/Travis County Health and Human Services Department Epidemiology and Health Statistics Unit

The number of Salmonella cases varies over time in Travis County (Figures 1 and 3). Preliminary 2012 data is available and seems to suggest that there might be a slight decline in the number of Salmonella cases since 2011 (Figures 1 and 3). In 2013 to date, we have 66.7% of all Salmonella cases occurring in individuals eight years old and younger (Figure 4). However, data is not complete and preliminary results should be interpreted with caution. The true impact of Salmonella on the community will be determined from finalized data.

¹ Data provided for 2012 and 2013 are preliminary data. The data provided for 2011 was generated on August 8, 2012. Data for 2012 and 2013 was generated on February 13, 2013.

² Yearly data provided is based on MMWR year and not on calendar year.

³ Data by month of report may not include all cases for that MMWR year. All data are pulled by MMWR year and not calendar year. As a result, there are some instances in which cases are reported with a MMWR year in one year but the actual report was received the following calendar year. Consequently, the annual totals may not equal the exact total number of cases when each month's totals are summed.
