Salmonellosis Data Profile, Travis County^{1,2}

2014 Salmonellosis Case Counts

Total	72	100.0%
Confirmed	67	93.1%
Probable	5	6.9%

Gender Distribution

Male	31	43.1%
Female	41	56.9%

Median Age	23 Years
Age Range	5 months - 78 Years

Age Distribution

Under 1 Year	6	8.3%
1-4 Years	11	15.3%
5-9 Years	5	6.9%
10-19 Years	10	13.9%
20-29 Years	9	12.5%
30-39 Years	6	8.3%
40-49 Years	11	15.3%
50-59 Years	5	6.9%
60 Years and Older	9	12.5%

Data presented in this report includes both confirmed and probable cases of Salmonellosis reported in Travis County. This report includes completed case investigations only. All 2013 and 2014 data are preliminary. The data provided for 2014 was generated on July 9, 2014.

The number of Salmonellosis cases varies over time in Travis County (Figure 1). In 2014 to date, approximately 31% of all Salmonellosis cases occur in individuals eight years old and younger (Figure 3). However, data is not complete and preliminary results should be interpreted with caution. The true impact of Salmonellosis on the community will be determined from finalized data.

Map 1. Travis County Reported Cases of Salmonellosis 2014^{1,2}

Data presented includes both confirmed and probable cases of Salmonellosis reported in Travis County. This map only includes cases in which investigations are complete, any pending reports and investigations for Salmonellosis are not included. All 2014 data are preliminary. Data in this map were generated on July 9, 2014.

Unable to map cases with Post Office Boxes. All reported cases are included in the map above.

This map does NOT reflect the location of where individuals acquired their infection. This is a map of the residence of the cases at the time of report.

This map has been produced by the Austin/Travis County Health and Human Services Department for the sole purpose of geographic reference. No warranty is made by the City of Austin regarding specific accuracy or completeness.

¹ Data provided for 2013 and 2014 are preliminary data. The data provided for 2013 was generated on February 12, 2014 and the data for 2014 was generated on July 9, 2014. Prior years of data are finalized.

² Yearly data provided is based on MMWR year and not on calendar year.

³ Rate per 100,000 population.

⁴ Travis County Population Estimates for 2003-2009 obtained from the Texas Department of State Health Services Center for Health Statistics and Travis County Population Projections for 2011-2013 obtained from the Texas State Data Center, Population Estimates and Projections Program using the 0.5 migration scenario. Travis County Population for 2010 obtained from Census 2010, from the U.S. Census Bureau.

⁵ Population Estimates and Population Projections are produced by different methods. If data are to be used in trend analysis, or other comparative treatments, unexpected results may be obtained if data from both estimated and projected series are used.

⁶ Data by month of report may not include all cases for that MMWR year. All data are pulled by MMWR year and not calendar year. As a result, there are some instances in which cases are reported with a MMWR year in one year but the actual report was received the following calendar year. Consequently, the annual totals may not equal the exact total number of cases when each month's totals are summed.

⁷ When the number of reported cases is less than 20, rates may not be considered reliable. Rate calculations for 2014 will be provided at the completion of the year.
