¹ Data provided for 2012 are preliminary data. The data provided for 2011 were generated on August 8, 2012 and 2012 data were generated on November 14, 2012.

² Yearly data provided are based on MMWR year and not calendar year.

³ Data by month of report may not include all cases for that MMWR year. All data are pulled by MMWR year and not calendar year. As a result, there are some instances in which cases are reported with a MMWR year in one year but the actual report was received the following calendar year. Consequently, the annual totals may not equal the exact total number of cases when each month's totals are summed.
