

Executive Summary

The 2022 Blueprint Scorecard and updated Progress to Date Scorecard sees Austin reach the halfway point of the ten-year period outlined in goals from the Strategic Housing Blueprint adopted in 2017. As we mark the progress made on Blueprint goals after five years, we see mixed results. While Austin is on track to meet or exceed goals aimed at preserving affordable housing and building new housing in growth areas identified in the Imagine Austin Plan, it is well behind the pace necessary to meet other goals related to the production of new housing affordable to households earning 80% or below of the Median Family Income (MFI1) and for new Permanent Supportive Housing (PSH) units for people experiencing homelessness.

Halfway Through: The Austin Strategic Housing Blueprint Plan

In 2017, the City of Austin adopted the Strategic Housing Blueprint, an ambitious housing plan aimed to comprehensively address affordable housing needs for the fast-growing Austin community by aligning resources, ensuring a unified strategic direction, and facilitating community partnerships to achieve a shared vision of housing affordability.2

The Blueprint identified five community values to guide the process, including:

- Prevent households from being priced out of Austin;
- Foster equitable, integrated, and diverse communities;
- Invest in housing for those most in need;
- Create new and affordable housing choices for all Austinites in all parts of Austin; and,
- Help Austinites reduce their household costs

Following the findings from a broad community input process and detailed analysis of national best practices, the Blueprint outlined aggressive goals for new housing production and preservation, including outlining other affordability initiatives.

The Blueprint set a goal of 135,000 new housing units over 10 years, including:

- 60,000 units for low-income households earning 80% Median Family Income (MFI)
- 75,000 units for middle to high-income households earning 81% MFI and above

The Blueprint Implementation Briefing Book also outlined goals for new affordable housing production within each City Council District. These District-specific goals were created based on the capacity for new housing within each District, alignment with focus areas outlined for future growth in the Imagine Austin Comprehensive Plan, and ensuring geographic dispersion of affordable housing throughout the city.

The Strategic Housing Blueprint proposed a wide array of new policy tools to allow for a multi-faceted and collaborative approach for producing and preserving affordable housing over the next ten years. At the same time the Blueprint acknowledged the need for innovative strategies to address challenges associated with limited resources, expanding regional coordination and partnerships, and legislative constraints. One core belief was related to the comprehensive land use reform through the Land Development Code Rewrite. The Land Development Code determines how land can be used throughout the city, including what can be built, where it can be built, and how much can (or cannot) be built. While the comprehensive rewrite effort has stalled, due to the 2022 court ruling and under City Council direction, the City is in the process of assessing options. City of Austin Planning Department staff are working on a variety of code amendments that would provide some expanded housing capacity.

As we reach the halfway point in the ten-year period outlined in the Strategic Housing Blueprint, it's important to remember the bold vision that the Blueprint outlined five years ago. Utilizing this comprehensive and aligned plan, the City of Austin has been able to approach addressing its affordable housing crisis with clear, community-oriented strategies.

- 1. The Median Family Income for a 4-person household was \$110,300 for the Austin-Round Rock MSA in 2022

Progress to Date Scorecard (2018-2022)

GOAL 1: Affordable Homes In Each District

OFF TRACK

As we surpass the halfway point since the adoption of the Blueprint, only one Council District is currently on pace to meet its ten-year goals for new affordable housing units. District 4 is the only Council District to meet at least 50% of its District-specific ten-year goal after five years, having constructed 1,551 affordable units, 51% of its ten-year benchmark (3,105 units). No other District has met more than 32% of its ten-year goal, with Districts 1 and 2 reaching 31% and 32% respectively of their overall goals after five years. Meanwhile, Districts 6, 8, and 10 have produced 5% or less of their ten-year affordable housing production goals at the halfway point. While Districts 1, 2, 3, 4, and 7 have at least 1,000 income-restricted affordable housing units currently under construction, Districts 6, 8, and 10 – the Council Districts furthest behind on their ten-year affordable housing goals – have only 540 income-restricted affordable units in the pipeline combined.

Need for Future Housing Production to Meet 10-year District Goals by 2028

Council District	Ten-Year District Goal for Affordable Units	Affordable Units Produced after Five Years	Percent of Ten-Year Goal Met after Five Years	Affordable Units Needed Every Year to Meet Goal by 2028	Affordable Income-Restricted Units Under Construction
District 1	7,086	2,175	31%	982	1,093
District 2	4,492	1,417	32%	615	2,608
District 3	6,295	1,498	24%	959	1,221
District 4	3,105	1,551	50%	311	1,063
District 5	4,473	935	21%	708	660
District 6	8,590	446	5%	1,629	326
District 7	6,651	1,427	21%	1,045	992
District 8	7,217	173	2%	1,409	168
District 9	3,635	791	22%	569	495
District 10	8,456	31	0.4%	1,685	46

Additionally, this year's Scorecard is the first to be impacted by the new City Council District boundaries that resulted from the redistricting process following the 2020 Census. Due to these changes, some units counted in prior Scorecards (2018 to 2021) have shifted to different Council Districts as reflected in Goal 1. The table below illustrates the changes in affordable housing units by District due to properties counted in previous Blueprint Scorecards changing Districts following redistricting.

Affordable Units counted in Previous Scorecard with District Changes due to Redistricting

Council District	Affordable Units Change
District 1	-25
District 2	0
District 3	13
District 4	100
District 5	-65

Council District	Affordable Units Change
District 6	0
District 7	-80
District 8	0
District 9	57
District 10	0

GOAL 2:

60,000 New Affordable Homes In 10 Years

OFF TRACK

Over the past five years, 10,444 units affordable to households earning 80% MFI or below have been built, just over one third of the 30,000 needed to keep pace with meeting the ten-year goal. None of the three housing production goals for households at different income levels below 80% MFI are on pace to meet even a third of the units outlined in the 10-year goal. While gains were made in 2022 to build more units affordable to households earning 31% to 80% MFI, the production of housing affordable to households with the lowest incomes continues to fall significantly short of its goals to build 20,000 units over ten years, with only 363 new units built over five years affordable to households at 30% MFI or below.

75,000 New Moderate- and High-Income Homes in 10 Years

PROGRESS UNDERWAY

Over the four years since the Blueprint was adopted, 32,145 units affordable to households earning 81% MFI and above have been produced, around 5,000 short of the 37,500 needed after five years to meet the overall goal of 75,000 new units for middle- and high-income households. However, production in the past three years (7,489 units in 2020, 7,473 units in 2021, and 7,582 units in 2022) has been just around the pace needed to meet the production goals for middle- and high-income homes. Meanwhile, the city is currently on track to surpass its goal to build 25,000 new housing units affordable to households earning 81% to 120% MFI, having constructed 14,143 such units after five years, 57% of the ten-year goal.

Progress to Date on Blueprint Production Goals After Five Years (2018 to 2022)

Affordability Level	Five Year Production Needed to Meet 10-Year Goal	Units Produced after Five Years	Percent of Five-Year Production Met
30% MFI or Below	10,000	363	4%
31% - 60% MFI	12,500	6,484	52%
61% - 80% MFI	7,500	3,597	48%
81% - 120% MFI	12,500	14,143	113%
121% MFI & Above	25,000	18,002	72%

The Progress to Date Scorecard also shows the percentage of new units built over the past five years affordable to households within each income category outlined in the Blueprint. Despite making up 17% of all households in Austin, households earning 30% MFI or below can only afford 0.9% of the new housing units constructed over the past four years. Meanwhile, middle- (81% to 120% MFI) and high-income (121% MFI and above) households can afford 58% and 100% respectively of all new units produced since 2018.

GOAL 4: Housing Units Within Each District

Data unavailable for this year.

GOAL 5:

New Housing near Imagine Austin Centers & Corridors and in High Opportunity Areas

PROGRESS UNDERWAY

Over the past five years, the city has been very successful in locating new units within a ½ mile of Imagine Austin Centers & Corridors and has had mixed results in locating income-restricted affordable units in High Opportunity Areas. At the current pace, the city would meet and far exceed its goal to locate 75% of new units near Imagine Austin Centers & Corridors, with 89% of new units built since 2018 located within a half-mile of Imagine Austin Centers & Corridors. However, more work is needed to improve upon the current rate of locating 16% of new income-restricted housing units built in the past five years within High Opportunity Areas to meet the goal of 25%.

GOAL 6: Preserve 10,000 Affordable Housing Units Over 10 Years

ON TRACK

Since 2018, 5,725 units of affordable housing have been preserved, ensuring that they would remain affordable for residents over the coming decades. This amount represents the first time since the adoption of the Blueprint that the city is on track to meet its goal to preserve 10,000 affordable housing units over ten years.

Develop 1,000 Permanent Supportive Units Over Three Years

OFF TRACK

While the Strategic Blueprint originally set goals for the development of 1,000 units of Permanent Supportive Housing (PSH) over 10 years, the rapid rise in the cost of housing and the heightened health and safety crisis during the COVID-19 Pandemic has required substantial and immediate investment to increase the amount of housing available to those experiencing homelessness in Austin. Following the convening of a workgroup which featured a coalition of public officials, service providers, and housing advocates (the Summit to Address Unsheltered Homelessness), the Austin City Council set new short-term goals in May 2021 for the provision of 3,000 additional homes available to people experiencing unsheltered homelessness within three years, including a goal to develop 1,000 new units of Permanent Supportive Housing. To reflect this new directive set by the City Council, the Blueprint Scorecard has been adjusted to match the new goal for 1,000 units of Permanent Supportive Housing developed in three years.

Since the goal to develop 1,000 units of Permanent Supportive Housing within three years was set in 2021, the Progress to Date Scorecard only reflects the 184 PSH units developed in 2021 and 2022 so far. While the 184 PSH units produced over the two years falls short of the 333 units needed every year to meet this goal, the timeline outlined in the Summit to Address Unsheltered Homelessness to meet the 1,000 unit goal anticipated a delayed response, with the development of PSH units increasing over time throughout the three year period.

Annual Blueprint Scorecard (2022)

GOAL 1: Affordable Homes In Each District

OFF TRACK

In 2022, only 2 of the 10 Council Districts - Districts 3 and 4 - met their one-year goal for affordable housing production. Meanwhile, two Districts 8 and 10 produced zero new units of housing affordable to households earning 80% of Median Family Income (MFI) or below. However, half of the ten City Council Districts completed over 75% of the affordable units their annual goal, an increase from 2021 when only 1 District completed 75% of the annual goal.

GOAL 2: 60,000 New Affordable Homes In 10 Years

In 2022, more affordable housing units affordable were built than in any single year in the five years since the Blueprint was adopted, with 3,305 new units affordable to households earning 80% MFI or below completed. Still, this falls short of the annual goal to build 6,000 new units of affordable housing (80% MFI or below).

20,000 Housing Units Affordable to Households earning 30% MFI or Below

OFF TRACK

Only 3% of the annual goal to build 2,000 units affordable to households with the lowest incomes in Austin, earning 30% MFI or below, was met in 2022. The 68 units affordable to households at 30% MFI or below produced in 2021 was a decrease from the 87 units produced in 2020, the second lowest annual production of units at this affordability level since the Blueprint was adopted.

25,000 Housing Units Affordable to Households earning 31% to 60% MFI

PROGRESS UNDERWAY

The city produced 1,707 units affordable to households earning 31% to 60% MFI in 2022, 69% of its annual goal to build 2,500 units. This is the second highest annual production of units affordable to households at 31-60% MFI since the Blueprint was adopted and a 61% increase from the 1,060 units produced in 2021.

15,000 Housing Units Affordable to Households earning 61% to 80% MFI

ON TRACK

With 1,530 new units of housing affordable to households earning 61-80% MFI completed in 2022, the city exceeded its annual goal to build 1,500 such units. This represents a significant increase from the 472 units affordable to households earning 61% to 80% MFI built in 2021, and is the highest single annual production of units affordable to households earning 61-80% MFI since the Blueprint was adopted. Part of this significant increase results from lower rents in new market rate rental developments that were built in 2022 when compared to rents offered in new developments that opened in 2021.

GOAL 3: 75,000 New Moderate- and High-Income Homes in 10 Years

While production of affordable housing units fell behind annual production goals, the current rate of market-rate housing production is currently near or on pace to meet ten-year housing for new units affordable to households earning 81% MFI or above.

25,000 Housing Units Affordable to Households earning 81% to 120% MFI

ON TRACK

For the third year in a row, the city met and exceeded its 2,500 unit-goal of homes affordable to households earning 81% to 120% MFI (middle-income households) as 3,209 homes affordable to middle-income households were built. The 3,209 units affordable to middle-income households produced in 2022 was a decrease from the production of units affordable to households earning 81-120% MFI in 2021 and 2020.

50,000 Housing Units Affordable to Households earning 121% MFI or Above

PROGRESS UNDERWAY

The 4,373 units produced for households earning 121% MFI or above (high-income households) in 2022 was the largest annual production in any income category since the Blueprint was adopted in 2017. Still, the 4,373 new units produced fell short of the annual goal to build 5,000 new units affordable to high-income households. Between the two affordability levels encompassing middle- and high-income households, the 7,582 overall new units affordable and available to households earning above 81% MFI exceeded the combined 7,500 unit annual goal for middleand high-income households.

As households earning 121% MFI or above have the broadest housing choice, such households can afford all of the units newly completed in 2022. Meanwhile, households earning 30% MFI or below have the fewest housing choices, with only 1% of new units affordable to households with these incomes. However, households with incomes ranging from 31% MFI to 80% MFI are able to afford more of the new units built in 2022 compared to 2021. Households in the 31% to 60% MFI category can afford 16% of all new housing units constructed in 2022, an increase from only being able to afford 13% of the units produced in 2021. Similarly, households earning 61% to 80% MFI are able to afford 30% of all new units produced in 2022, nearly double the percent they could afford in 2021.

GOAL 4: Housing Units Within Each District (DATA UNAVAILABLE FOR THIS YEAR)

Data unavailable for this year.

GOAL 5:

Imagine Austin Centers & Corridors & High Opportunity Areas

New Housing near Imagine Austin Centers & Corridors

ON TRACK

The city continued to meet its goal to locate at least 75% of new housing units within a half mile of centers and corridors targeted for growth in the Imagine Austin Comprehensive Plan, as 81% of the new housing units produced in 2022 were located within ½ mile of the Imagine Austin Centers & Corridors. However, this is the lowest percentage of units located within a ½ mile of the Imagine Austin Centers & Corridors in any single year since the Blueprint was adopted. The city has met this goal every year since the Blueprint was adopted, locating at least 89% of new units within a half mile of Imagine Austin Centers & Corridors in every previous year.

New Housing near High Opportunity Areas

OFF TRACK

Only 5% of new income-restricted units produced in 2022 were located in High Opportunity Areas, marking the third year in a row where the city has fallen short on its goal to locate at least 25% of income-restricted affordable housing units within areas of high opportunity. The percentage of new units located within High Opportunity Areas in 2022 decreased by 5% from the 10% of new income-restricted units located in High Opportunity Areas in 2021.

GOAL 6: Preserve 10,000 Affordable Housing Units Over 10 Years

ON TRACK

Successful efforts to preserve affordable housing in 2022 have again far exceeded the annual Blueprint goal of 1,000 affordable units preserved by nearly 100%. For the second year running, the 1,862 units preserved in 2022 represents the largest amount of affordable housing preserved in a single year since the Blueprint was adopted, building on the 1,550 preserved in 2021. The number of homes preserved has increased every year since 2018, when only 371 affordable units were preserved.

GOAL 7: Develop 1,000 Permanent Supportive Units Over Three Years OFF TRACK

In 2022, 47 units of Permanent Supportive Housing were developed, stalling progress on the three-year goal to build 1,000 PSH units in an effort to unlock 3,000 homes for Austinites experiencing homelessness. However, there are multiple projects that include PSH units in the pipeline, with an anticipated date of completion within the next two years.

Conclusion

As we reach the midpoint in the Strategic Housing Blueprint's ten-year timeframe, much has been accomplished toward reaching the goals set out in 2017, but much more work is necessary to meet them. At the current rate, Austin is on track to meet or exceed goals for affordable housing preservation, locating new housing within areas targeted for growth in the Imagine Austin Plan, and to produce new housing affordable to middle- and high-income households. However, the production of housing units affordable to households with incomes at or below 80% of Median Family Income, including building units dedicated to permanent supportive housing for those experiencing homelessness, remains off the pace necessary to meet ten-year goals. Meanwhile, only Council District 4 is currently on pace to meet District-specific goals for affordable housing development throughout the whole city. As the chart below suggests, in order to meet the ten-year goals for production of housing units affordable to households at or below 80% MFI, the Austin community will need to significantly increase its rate of development of affordable homes.

Need for Future Housing Production to Meet 10-year Goals by 2028

Affordability Level	Ten-Year Goal	Units Produced over Five Years	Units Needed Every Year to Meet Goal by 2028	If Average Annual Rate of Production since 2018 is Maintained, Number of Units Produced after 10 Years
30% MFI or Below	20,000	363	3,927	726
31% - 60% MFI	25,000	6,484	3,703	12,968
61% - 80% MFI	15,000	3,597	2,281	7,194
81% - 120% MFI	25,000	14,143	2,171	28,286
121% MFI & Above	50,000	18,002	6,400	36,004

The positive movement in 2022 toward greater housing production for households between 31% and 80% MFI suggests that, with significant focus on comprehensively addressing affordable housing, the Blueprint goals can still be achieved in the next five years. However, much work remains to reach the goals set in 2017. The next five years will require unified community efforts and focused action to meet the Blueprint goals and allow Austinites greater opportunities to live with safe, accessible, and affordable housing in all parts of Austin.

Checking in on the Strategic Housing Blueprint after Five Years

In 2017, Austin City Council adopted the Austin Strategic Housing Blueprint detailing goals to reach 135,000 housing units over the next ten years (2018-2028). The Blueprint includes District-specific goals to ensure that there is affordable housing throughout the city, as well as overall goals for the construction of housing units affordable to households at all income levels. This Progress to Date scorecard provides a snapshot of Austin's overall progress during the past 5 years toward achieving its 10-year affordability goals outlined in the Blueprint.

A Holistic Approach to Affordable Housing

In 2017, Austin City Council adopted the Austin Strategic Housing Blueprint detailing goals to reach 135,000 housing units over the next ten years (2018-2028). The Blueprint includes goals for affordable housing in every City Council District to ensure that there is affordable housing throughout the city. It also includes goals for the construction of 60,000 housing units affordable to households at 80% median family income (MFI) and below, and another 75,000 units for households earning greater than 80% MFI broken into specific goals for households at different income levels.

PRESERVE 10,000 AFFORDABLE HOUSING UNITS OVER 10 YEARS

Preservation: Maintain existing homes affordable to community members through acquisition and rehabilitation, creating supportive financial environments, and advancing new ownership models.

GOAL 7: PREVENT HOMELESSNESS

PRODUCE 1,000 PERMANENT SUPPORTIVE HOUSING (PSH) UNITS IN 3 YEARS

Permanent Supportive Housing: New units that provide housing and supportive services to extremely low-income households who are experiencing chronic homelessness and face multiple barriers to housing stability.

Blueprint Scorecard

The citywide Housing Scorecard analyzes and tracks progress toward achieving the seven goals that are key to implementing the Blueprint. This scorecard can help Austin track its efforts to sustainably achieve affordability goals, expand housing opportunities throughout town, and to ensure Austin remains a welcoming city for all. Austin has made considerable progress towards achieving its strategic housing goals, but significant work remains. Achieving these goals will require leveraging existing funding sources, increasing future funding opportunities, ensuring that existing regulations and programs align with affordability goals, and expanding collaborations with non-profit and private sector partners. Continued progress also depends on a strong community commitment to address the needs of the most vulnerable and create a more equitable and inclusive Austin.
