# The Online Application Process

Dougherty Arts Center

Artist Resource Center Professional Development Workshop Series

Exhibitions, festivals, residencies, and many other artistic calls-for-entry are now online.

### Tonight we will cover:

- The various websites for online applications
- How to create a profile
- Preparing and uploading images
- Other requested materials
- Submitting competitive proposals
- The process for applying to the Dougherty's Call for Artists for the 2019 gallery season

# There are various websites for online arts applications

- Submittable
- CaFe (CallForEntry.org)
- Slideroom
- Zapplication (mostly festivals and events)
- PublicArtist.org
- C4E (callforentries.com)

Some websites act as a catalog for call-forentries where you can peruse open calls and apply to multiple calls using the same profile.

# Other websites require you to enter through the organization's website

## Submittable <sup>0</sup>

This means the organization holding the call-for-entry will provide a direct link to the application.

This is the case with the Dougherty's call for artists: https://doughertyartscenter.submittable.com/submit

No matter how you get there, all sites will have you create an account

Make sure you remember your login information. You may need to complete your application in multiple sittings, use your account to apply to additional applications, or to edit or trouble-shoot.

Once you have created your account, you will start to add your materials and images.

### Each website may have different requirements for materials and images

Be sure to read all requirements carefully so you don't have to repeat work

- Codec: h.264, h.263, mpeg-1, mpeg-2, mpeg-4, Windows Media Video, and motion jpeg mpeg-1 muxed, Apple Lossless

You may have to edit and/or resize your images before uploading them Hopefully you are starting with a good source image. If you need to make adjustments, there are various programs and apps available.

A well lit artwork may not need color correction. Make sure your camera is set to the correct color balance to match your lighting. You may want to invest in a lighting kit and a backdrop for 3D works.

Various applications and websites may require your images to be a certain size (ex. -300 dpi, longest side 1920 pixels). This may not be the size of the original image from your camera and you will need to adjust it.

# Computer programs for editing images

Photoshop is the best all-around program for editing your images. You can adjust the levels, color, saturation, and size all in one program.

Photoshop is purchased through the Adobe Cloud. The Adobe Suite is offered as a resource of the Dougherty's Artist Resource Center by making an appointment.

There are many other free programs out there that are similar to Photoshop, including GIMP, Paint.NET, and Krita Desktop.

Cell phone photography is now high quality enough that you may not need an expensive camera

Cell phones now have cameras with high enough megapixels and quality lenses that you may be able to use your phone to take your images.

There are plenty of apps out there for editing images, but you may not be able to adjust everything in one app.

Some apps to consider:

- Photoshop Express
- Adobe Lightroom
- Snapseed
- VSCO
- Image Size

## Other Requested Materials

Applications often ask for additional materials besides your contact information and images.

#### This could include:

- Resume/CV
- Artist Statement
- Bio
- Proposal (for exhibits or residencies)
- References

Be sure to carefully read the requirements for the application to ensure you are not missing anything. Organizations will often not accept incomplete applications.

## Submitting and Confirmation

Most sites will give you the option to review your application before submitting it.

Review your application and make sure you have included all of the required material.

Some applications will require a fee and either have their own processing interface, or may redirect you to PayPal.

You should receive a confirmation email when your application is submitted. Be sure to keep you email, especially if there was a payment included. This can be used as a deduction on your taxes if you claim your artwork as a business.
