CODE  **NEXT**

PART 1

PROCESS

What sort of city
do we want
Austin to be?

2009

The imagine Austin Comprehensive Plan was adopted by Austin City Council in June 2012

Imagine Austin
lays out our citizens' vision for a complete community that responds to the pressures and opportunities of our growing modern city.

2012

Core Principles for Action

Grow as a compact, connected city

Integrate nature into the city

Provide paths to prosperity for all

Develop as an affordable and healthy community

Sustainably manage water, energy and other environmental resources

Endorse innovation and creativity throughout the city

In 2013, the City engaged the help of both national and local experts to work with elected officials, staff, appointed representatives, and the community at large on how best to align our land use standards and regulations with the goals of Imagine Austin.

Draft Code

Past reports and documentation of the CodeNEXT process can be reviewed at austintexas.gov/codenext

Top 10 Issues

1 Ineffective Base Zoning Districts

2 Competing Layers of Regulations

3 Complicated "Opt-in, Opt-out" System

4 Lack of Household Affordability and Choice

5 Auto-Centric Code

6 Not Always In Line with Imagine Austin

7 Lack of Usability and Clarity

8 Ineffective Digital Code

9 Code Changes Adversely Affect Department Organization

10 Incomplete and Complicated Administration and Procedures

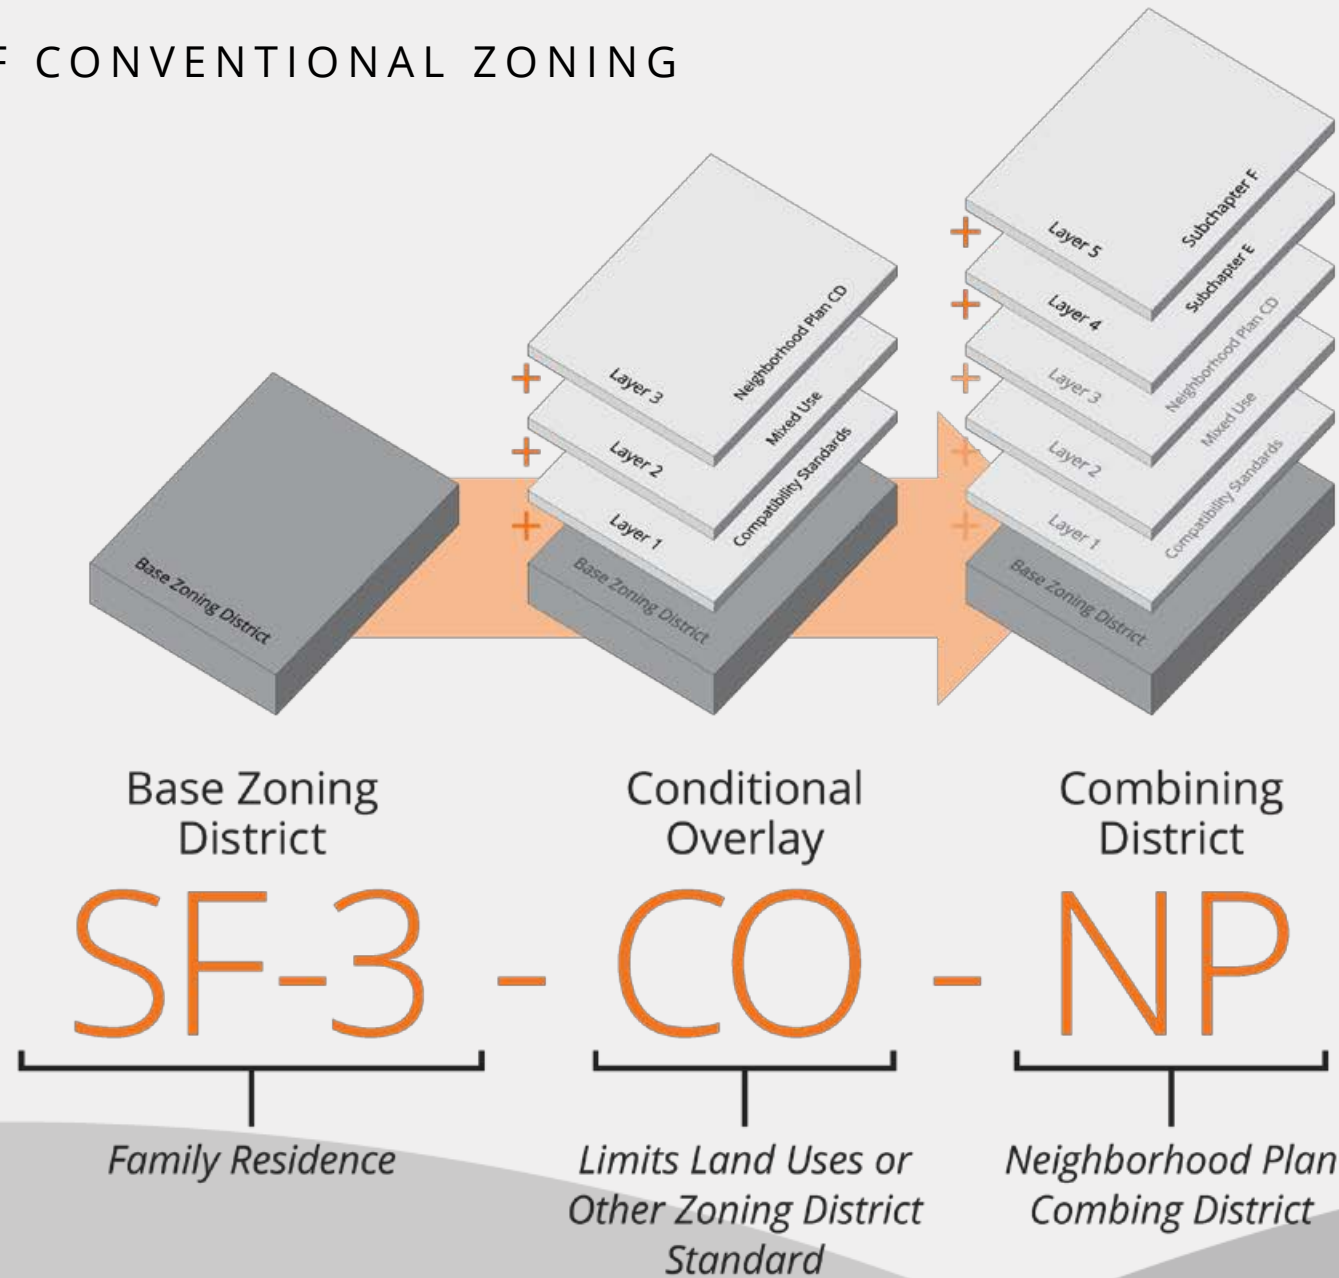

The conventional, use-based approach to zoning has been shown to be ineffective for regulating diverse, urban, mixed-use environments.

These three parcels have “CS – Commercial Services” as their base zone.

LIMITATIONS OF CONVENTIONAL ZONING

Over the years, supplemental layers of regulations have been added to address incompatibilities and issues of the day, resulting in complexity and reduced usability.

PART 3

OVERVIEW

A Hybrid Approach

Hybrid codes apply different zoning tools in different places within a city.

Ability for city to “right-size” the zoning tools needed in a predictable and clear manner.

**Form-Based +
Euclidian (Use-based)
Districts**

PLANNING PRACTICE

Going Hybrid

How one city overhauled its zoning code while combining form-based and conventional elements.

By Roger E. Eastman, AICP, with Daniel Parolek and Lisa Wise

FLAGSTAFF, ARIZONA, entered an exclusive club in November. It is now one of the few cities in the U.S. that have adopted a hybrid zoning ordinance with both form-based components and conventional Euclidean elements as part of a complete code rewrite. “Simplified, streamlined, predictable” raved an editorial in the *Arizona Daily Sun* while praising both the code and the process used to adopt it. Getting the new code adopted wasn’t easy, but many city residents think the effort will be repaid in a more efficient, more equitable, and easier-to-use zoning system. The adoption of the new zoning code also caps off a successful public engagement process that has changed the generally negative perception of city planners.

TIME FOR AN UPDATE

The important first step in approaching a code was differentiating between what the city wanted to keep and what it wanted to change. From “drivable suburban” areas to “walkable urban” areas, the city wanted to keep the form-based code in the walkable areas. In the more suburban areas, the form-based code was generally leaving the form-based code in place in the

Flagstaff (pop. 62,000), at an elevation of about 7,000 feet, is the regional hub of northern Arizona. Established as a stop on the early transcontinental railway in 1882 and later Route 66 and Interstate 40, Flagstaff quickly grew as a logging and ranching town, and as a gateway for tourists visiting the Grand Canyon and other national parks and monuments. Residents appreciate the natural beauty of the area and enjoy outdoor pursuits such as hiking, skiing, hunting, fishing, and camping.

The downtown and oldest neighborhoods were planned with small blocks and lots, and today are valued for their historic buildings and inherently walkable urban character. Typical of many American cities, Flagstaff’s urban form changed after World War II as auto-oriented suburban developments were added to the periphery of the city. Until recently Flagstaff’s zoning ordinances have actively promoted these driveable suburban development patterns.

The need for a comprehensive update of the city’s land development code had been apparent for some time as developers, contractors, design professionals, and residents complained about the code’s complexity and inconsistency. Some even blamed the cumbersome nature of the code for contributing to the high cost of development and the failure of new projects and economic develop-

Form-Based Zoning (Transect)

Emphasis is on the design and form of development in order to shape desired character or, in some instances, maintain character

Development Standards include:

- Lot Width and Depth
- Building Type
- Building Placement (Setbacks)
- Height
- Encroachment
- Street Frontage
- Parking
- Impervious Cover
- Open Space
- Signage
- Site Constraints
 - Drainage
 - Water Quality
 - Tree Protection
 - Landscape
- Use Types

Use-Based Zoning (Non-Transect)

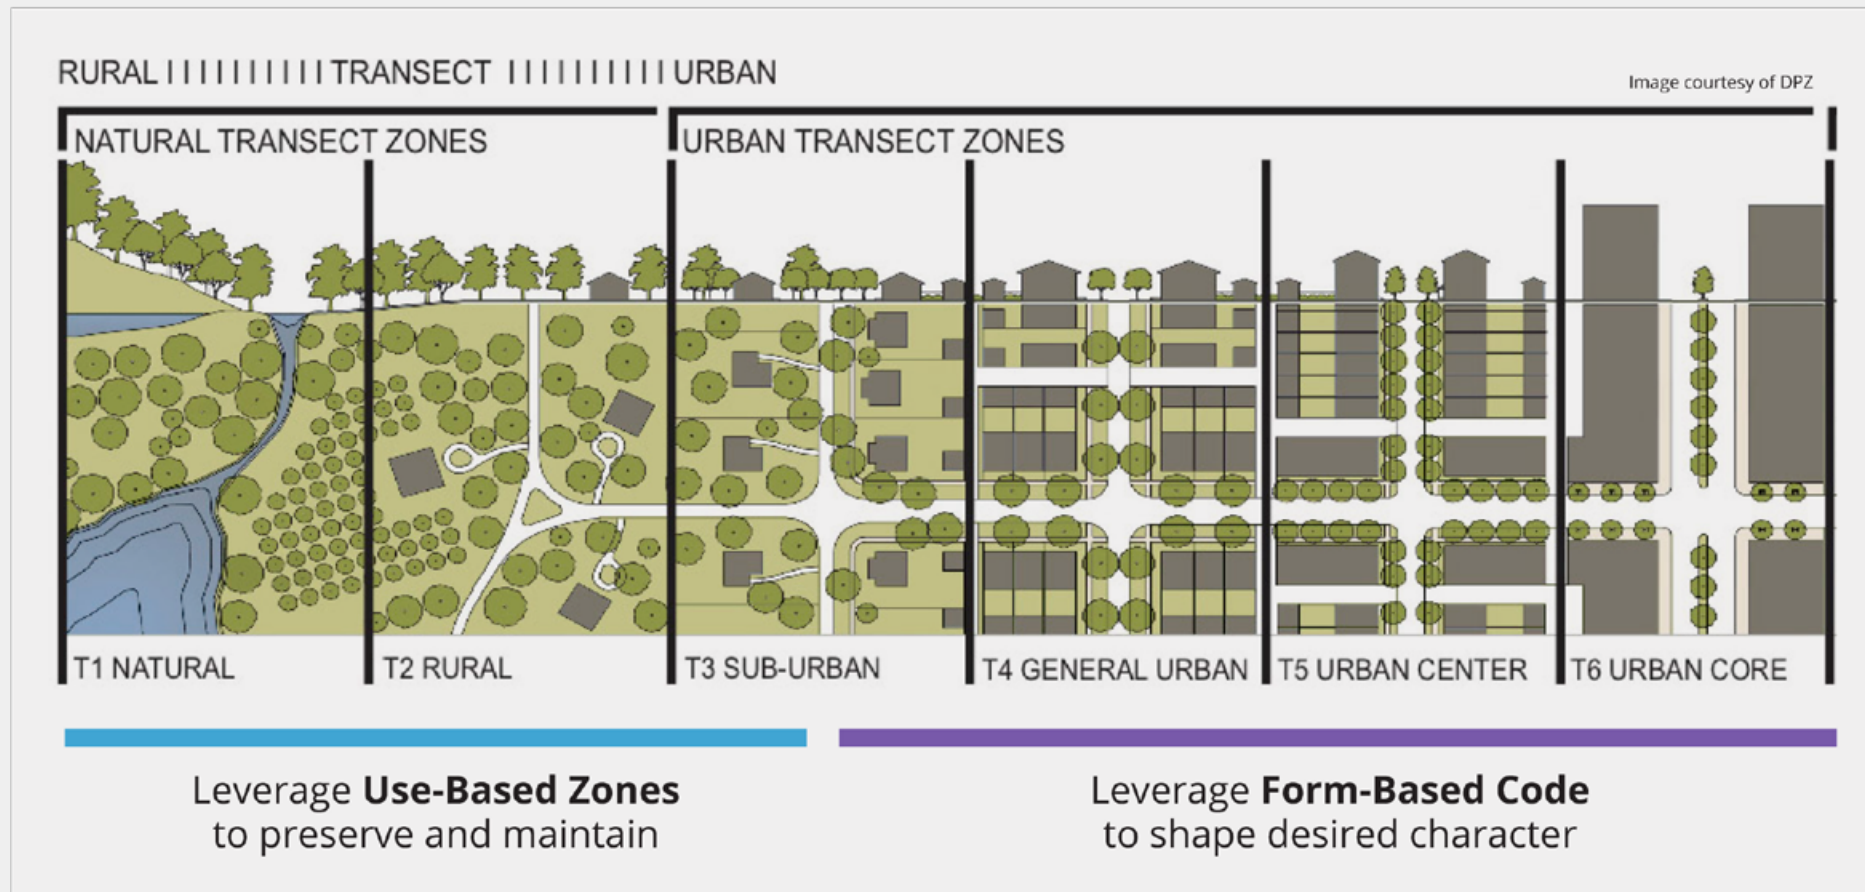

Emphasis is on the use of land in order to preserve and maintain character

Development Standards include:

- Use Types
- Parking
- Dwelling units per acre
- Floor to Area Ratio
- Lot Size
- Building Placement (Setbacks)
- Height
- Landscaping and Screening
- Outdoor lighting
- Signage
- Site Constraints
 - Drainage
 - Water Quality
 - Tree Protection
 - Landscape

Outreach Toolkit

This toolkit includes an FAQ, code preview, and timeline. While these materials alone do not equip Austinites to become code experts, they provide a simple, consistent way for interested residents to share basic information about CodeNEXT and initiate a dialogue with their communities.

Survey Tool

The survey is focused on how the draft code implements the Imagine Austin Priority Programs and alleviates the 10 major issues identified in the Land Development Code Diagnosis.

Current code issue: Code Changes Adversely Affect Department Organization

The current complexity of the LDC has an adverse effect on the organizational structure of the Planning and Development Review department.

CodeNEXT solution:
Portions of the new code have been rearranged to reflect the responsible city staff, so that a user dealing with a certain part of the code will interact primarily with the same set of staff members.

On a scale of 1-10 with 1 being not at all and 10 being completely, how well does the solution address the problem?

Code Comment Tool

Using a tool (CiviComment) that has been implemented in code rewrites across the country, staff will receive comments on the actual code document from Austinites.

<https://codenext.civicomment.org/>

The screenshot shows a web browser displaying the CodeNext website. The browser's address bar shows the URL <https://codenext.civicomment.org/chapter-23-3-general-planning-standards>. The website's header includes the CodeNext logo with the tagline "SHAPING THE AUSTIN WE IMAGINE" and the text "City of Austin Draft Land Development Code". The main heading is "Chapter 23-3: General Planning Standards for All". Below the heading is a "See More" link. A navigation bar at the top includes links for "Home", "My Comments", "Register", and "Log In". A search bar is located below the navigation bar. The main content area displays a table of contents for "Division 23-3B-1: Parkland Dedication". The table lists sections such as "Purpose and Applicability", "Dedication of Land or Payment in-Lieu of Building Permit", and "Administrative Authority". The "Add comment" section on the right side of the page prompts users to "log in or register to add and reply to comments." and includes social media sharing icons for Facebook, Twitter, LinkedIn, Google+, and Email. A green "Support" button is located at the bottom right of the page.

Division 23-3B-1: Parkland Dedication	
Contents	
23-3B-1010	Purpose and Applicability 1
23-3B-1020	Dedication of Land or Payment in-Lieu of Building Permit 2
23-3B-1030	Administrative Authority 2

23-3B-1010 Purpose and Applicability

(A) **Purpose.** The City of Austin has determined that recreational areas in the form of public parks are necessary for the well-being of residents. The City has further determined that the approval of new residential development is reasonably related to the need for additional parkland and park amenities to serve new development. This Article establishes a fair method for determining parkland dedication, or the payment of a fee in-lieu of dedication, to be required as a condition to the approval of new development in an amount proportionate to the impact of development on existing parks and established levels of service.

(B) **Applicability**

(1) The requirements of this Article apply to:

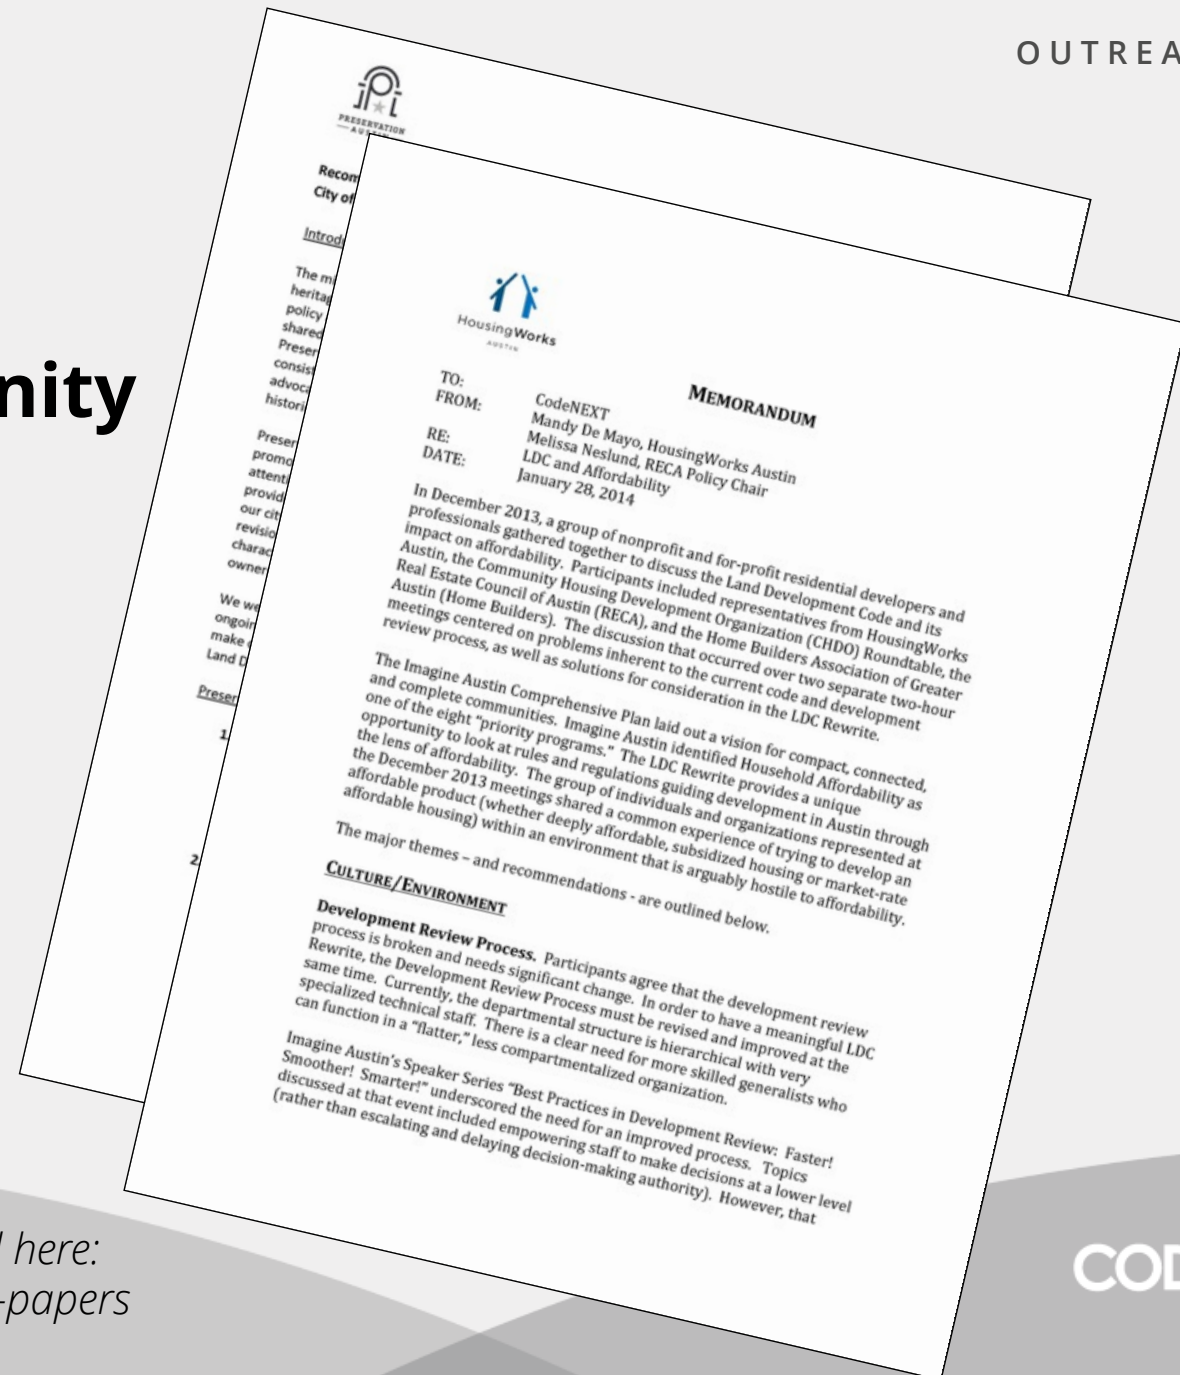

- (a) A residential Subdivision in the planning jurisdiction;
- (b) A Site Plan in the zoning jurisdiction that includes residential units or a hotel-motel use; and
- (c) A Residential Building Permit, as provided under Section 23-3B-1020 (Dedication of Land or Payment in-Lieu of Building Permit).

(2) The following are exempt from the requirements of this Article:

Viewpoints & Community Issues Papers
