

Redbud Trail Bridge Project

What you may see later this year

In 2020, the project is entering the Design Phase. As a result, you may notice various crews in the road and bridge vicinity gathering field data and information for design.

Geotechnical Borehole Drilling for subsurface conditions

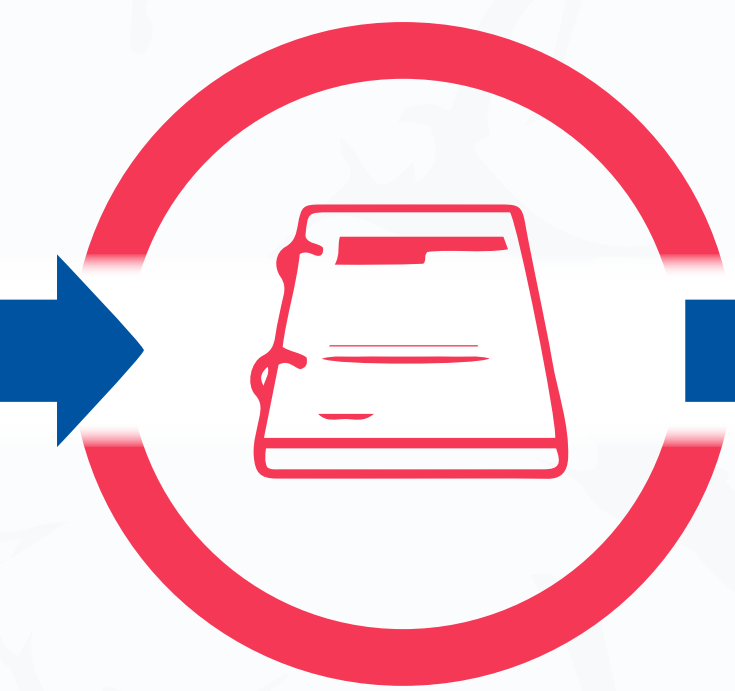

Survey Crews to identify topography and existing conditions

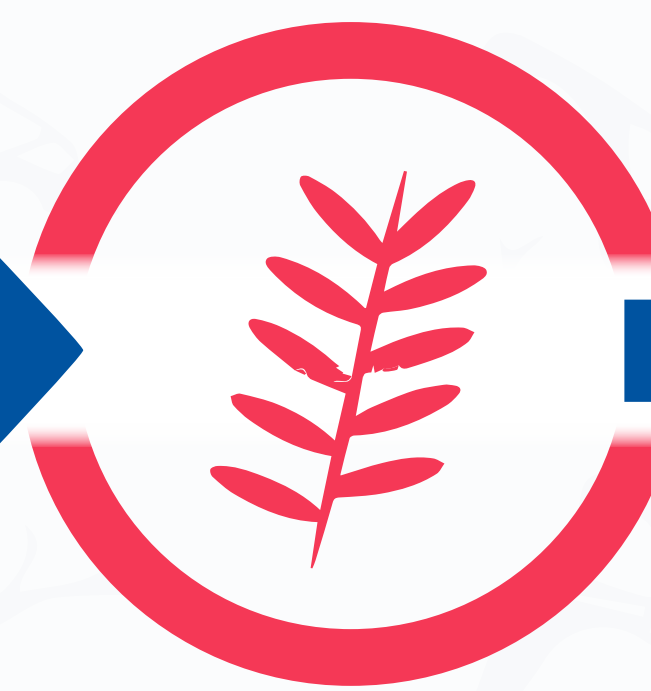

Environmental Field Staff to identify sensitive features

Project Next Steps

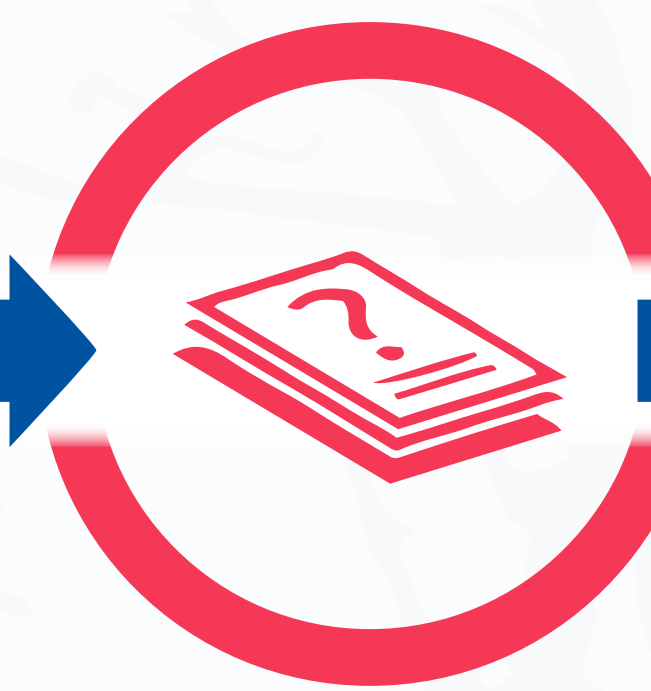

DETAILED BRIDGE DESIGN

Investigations and Detailed Bridge Design 2020-2022

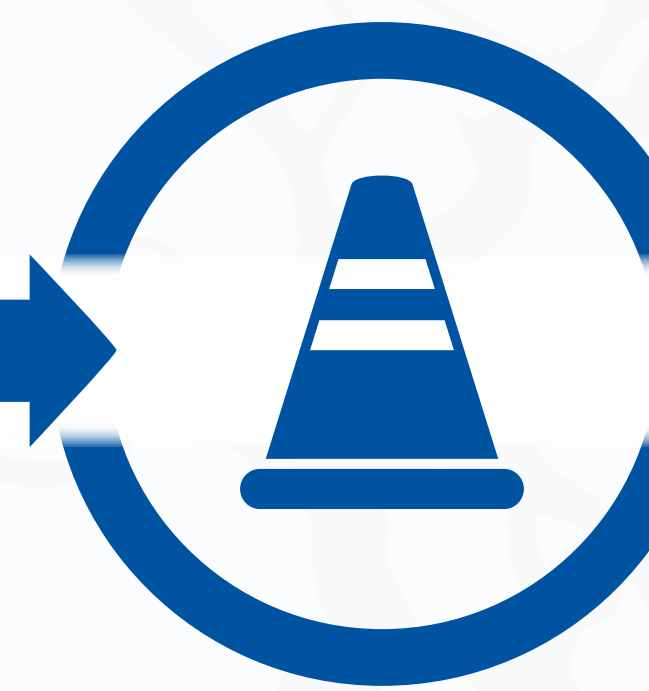

CLEARANCE & PERMITTING

Environmental Clearance and Permitting 2021-2022

CONSTRUCTION LETTING

Construction Contract Letting 2023

CONSTRUCTION 2023-2024

Bridge maintenance activities will also continue in 2020. In addition, safety measures to improve roadway surface friction are anticipated in 2020, prior to the ultimate bridge/roadway project.
