

GUIDANCE FOR SALON AND BARBER SHOPS

Hair, nails, tanning salons and barber shops may operate provided they can ensure at least 6 feet social distancing between operating workstations. Due to the proximity of individuals in these facilities, compliance with health protocols is important.

Customer Interaction:

- Schedule appointments to limit people in the salon or facility to allow 6 feet between clients
- Do not allow clients to bring extra people to the appointment
- Clients and walk-ins should wait outside maintaining 6 feet between others until licensee is ready
- Contactless payment is encouraged
- Consider offering less complex and time-consuming services
- Do not let clients touch retail supplies

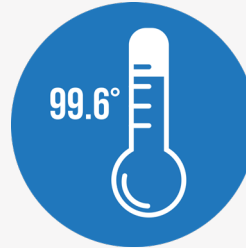

Facility Protocols:

- Remove unnecessary items such as magazines
- Use disposable supplies to minimize the need to handle and disinfect multi-use supplies
- Clean and disinfected multi-use tools and materials must be stored separate from soiled tools and materials
- Full sanitization of workstations and supplies must occur between each client
- Thoroughly clean floors, on-site laundry, and other facilities each day
- Regularly clean all other surfaces between use including computers and landline phones
- Post "Help Prevent Disease" signage to remind everyone of best hygiene practices

Employee Health:

Train all employees on appropriate cleaning and hygiene practices

Screen employees before entering the salon or facility, and send those home who are sick

Clean hands upon entering the salon or facility, and between clients

Wear gloves, if possible, when providing services

Maintain at least 6 feet from others to the greatest extent feasible

Wear fabric face coverings over the nose and mouth
