

GET FREE COVID-19 TESTING NOW

Do you have a fever, cough, headache, runny nose, sore throat, loss of smell or taste, diarrhea, chills, or muscle pains? Have you been in close contact with someone who tested positive for COVID-19? Are you an older adult or a someone of any age with underlying medical conditions, like an immune-compromised state, obesity, or other chronic disease such as serious heart conditions?

Austin Public Health and CommUnityCare provide free testing options—especially for people without insurance and those without primary doctors. People with insurance should find private testing options like doctors' offices, pharmacies, and urgent care centers. Contact your provider.
