

Policy on Alternative Compliance for Vegetable Gardening

Chapter 6-4-83 of City Code allows the Director to permit a person to comply with alternative water use restrictions after determining that the alternative restrictions meet or exceed the intent of the Water Use Management Ordinance.

To support City sustainability initiatives and community-wide efforts to increase local food production, Austin Water has developed alternative restrictions for individuals using water to support food-producing plants in outdoor gardens. To receive a permit for alternative compliance, a water account holder must return the following form and adhere to the restrictions outlined below. A copy of the approved form must be posted in a location on the property that is accessible and visible to the public (account number and contact information may be redacted).

Approved alternative compliance permits will allow the account holder to water areas of food production at any day or time with drip systems or soaker hoses, Tuesday through Sunday in the morning and/or evening with a hose-end sprinkler, or twice per week in the morning and/or evening with an in-ground spray system. In all cases, alternative compliance permits require that water usage be reduced by 20% from a comparable month. This reduction meets the intent of Stage 2 or 3 water use restrictions, while allowing gardeners more flexibility to meet the needs of their plants by spreading out water application over multiple days.

Alternative compliance permits are intended for gardens producing food for retail sale, those used by many people as part of a community garden, and for individual gardens that provide a reasonable portion of household food consumption when in season. They are not intended for herb gardens, for solitary vegetable plants within a landscape garden, or fruit trees other than those that are part of urban farms and intended for retail production.

The water utility account holder is responsible for completing the form and ensuring compliance with its conditions.

To apply for an alternative compliance permit, please complete and sign the attached form and return to:

Please return completed form to:

Water Conservation Division - Austin Water
P.O. Box 1088 Austin, TX 78767

Austin Water Alternative Compliance Application for Vegetable Gardening

Property Address: _____ Account Holder Name: _____

Account Number: _____ Phone: _____ Email: _____

Water used for this garden is is not separately metered or submetered from other domestic uses.

I attest that (choose one):

- This property contains a community garden recognized by the City of Austin Parks Department.
- This property contains gardens used for retail food production (urban farm).
- This property contains a private garden generating at least 20% of the household's food consumption.

I agree to (choose one):

- Maintain water consumption at or below 80% of usage for the corresponding month, at this address, in 2009.
- Maintain water consumption at or below 80% of usage in August 2011 for this address (new gardens only).

I agree to (choose one):

- Irrigate only with a drip system or soaker hose as needed at any time, on any day of the week.
- Irrigate only with a hose-end sprinkler system before 10 a.m. and/or after 7 a.m., Tuesday through Sunday.
- Irrigate only with an in-ground spray irrigation system before 10 a.m. and/or after 7 p.m, no more than twice per week (Wed/Sat for odd addresses, Thurs/Sun for even addresses).

Please acknowledge the following statements and sign below.

I understand that Austin Water will monitor water use and revoke alternative compliance permits for properties found to violate permanent restrictions prohibiting water waste, and for properties not meeting the water use reduction goal as stated above.

I further agree to provide access to the garden for visual inspection of food production areas and/or irrigation equipment by Austin Water employees, if requested, prior to or during the duration of this alternative compliance permit. I understand that failure to grant access may result in the revocation of alternative compliance and leave me subject to citation for witnessed violations of the mandatory watering schedule in effect at the time.
