Megadroughts Drive Water Planning

A July 10, 2020 feature on KUT shared research from the state of Texas climatologist, John Nielsen-Gammon, about the potential for more frequent “megadroughts” in the coming years. An increasingly arid climate will make it difficult to support agriculture and human activity without innovative water capture and storage technologies.

Business Excellence & Innovation

The Advanced Metering Infrastructure contract was executed the last week of April. A pilot installation of 5,000 meters will begin in the Fall, supported by software integrations to allow for billing and data analysis, as well as customer notifications through a customer portal. Full installation will commence in about one year.

Affordability

Utility bill relief in response to COVID-19 included a 10% rate reduction (Blocks 1-3) and $5M contribution to Plus 1 Program approved by Austin City Council. Temporary bill relief took effect April 9, 2020.

Annual Residential Bill is to stay at or below 1.5 percent of Austin Median Household Income (MHI)

Avg. Bill as % of MHI

FY 2020 Target <= 1.5%

Financial Health

Standard & Poor’s Bond Rating

2019 Standard & Poor’s rates companies on a scale from AAA to D. Austin Water’s target is a rating of AA indicating a very strong capacity to meet financial commitments.

Leak Detection Technology

Linear feet of leak detection performed on large diameter water transmission lines

Annual Target: > 52,800

Employee Engagement

Monthly Vacancy Rate Fiscal Year 2020

Monthly Target: < 5%

Listening to the Workforce survey – Employee Satisfaction

Respondents that noted a positive response (Strongly Agree or Agree) about their overall job satisfaction level at Austin Water.

58% Participation Rate in 2019!

The higher the participation rate %, the truer picture we get about what our workforce likes or dislikes about working at Austin Water.

Employee Turnover Rate

FY Annual Target: < 8.5%

Nielsen-Gammon cites Austin Water as a leader in preparing for a drier future with the Water Forward: Integrated Water Resource Plan, which “incorporated the increasing likelihood of drought driven by climate change into the planning process” and calls for strategies to reduce water loss, develop aquifer storage and recovery, and expand reclaimed water uses.
Customer Collaboration

Sanitary Sewage Overflows
Investigated within one hour of customer calls
Quarterly Target: 95%

Infrastructure Stability

Water Leak Management Index
(Infrastructure Leak Index)
The current annual real losses divided by the unavoidable annual real losses. The data that this calculation is based on is derived from the annual water loss audit.
Annual Target: < 2.7
2019 Infrastructure Leak Index dropped to 3.71

Reduce operational risks by successfully completing at least 80% of the Austin Water Capital Improvements Program on identified priority infrastructure needs annually.
Percentage of actual CIP spending to budgeted CIP spending
Annual Target: 80%

Asset Upkeep
Preventative maintenance routine validation. Validating pipe network asset types.
Total Validated Asset Types: 18

Product Quality

Drinking Water Quality Fiscal Year 2020: Cloudiness of water (turbidity)
- Permitted Level: less than 0.3 NTU
- Utility Target: less than 0.1 NTU
- Measured turbidity “cloudiness of water” is the indicator of the effectiveness of our filtration systems.
- Our target is to keep treated drinking water turbidity level at 0.10 Nephelometric Turbidity Unit (NTU) or less.

Wastewater Quality Fiscal Year 2020
- Permitted Level: less than 10.0 mg/l
- Utility Target: less than 3.0 mg/l
- Keeps the Carbonaceous Biological Oxygen Demand (CBOD) concentration from our wastewater treatment plants discharging at 3.0 mg/l or less.

Current J.D. Power overall customer satisfaction index

Reclaimed Water Customers:
- Customers using reclaimed wastewater for beneficial purposes.
  - Provided reclaimed water for irrigation in 1974, making our system one of the oldest in the Texas
  - Approximately 1.4 billion gallons of water used in 2018, about 3% of the City’s total water demand
  - Consists of 63.4 miles of reclaimed water transmission mains
  - Future plans for the system consist of over 130 miles of mains and over 8 billion gallons used annually
