Texas Commission on Environmental Quality Stormwater Team (MC-148) Attn: Ms. Rebecca Villalba P.O. Box 13087 Austin, TX 78711-3087

Re: City of Austin Municipal Separate Storm Sewer System (MS4) System-wide Annual Report Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0004705000 (EPA I.D. No. TXS000401)

Dear Ms. Villalba,

Please find herewith for your review, the MS4 system-wide annual report for the City of Austin. The report has been prepared as required by Part IV.C. of the permit and includes the City's accomplishments during the reporting period from October 1, 2020 through September 30, 2021.

As required by Part IV.D and in accordance with Part V.B.8 of the permit, I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

If additional information related to any of the City's compliance activities described in the report should be required, please contact Ms. Julie White, TPDES Program Coordinator, at julie.white@austintexas.gov.

Sincerely,

Jorge L. Morales, P.E., CFM, Director Watershed Protection Department

SYSTEM-WIDE OVERVIEW

The City of Austin (City) was originally issued a Municipal Separate Storm Sewer System (MS4) Storm Water Permit by the Environmental Protection Agency (EPA) in September 1998 (EPA ID. TXS000401). The City renewed the MS4 storm water permit with the Texas Commission on Environmental Quality (TCEQ) in February 2006 (WQ0004705000) and has continued to do so every 5 years as required since then. The TCEQ reissued the City's most recent MS4 storm water permit on August 15, 2018.

The City has continued to implement the compliance activities required by the storm water permit and as outlined in the City's Storm Water Management Program (SWMP). The City reports accomplishments executed during the City fiscal year, October 1st through September 30th of each year. The System-Wide Annual Report is due May 1st of each year.

This report documents the City's compliance activities during the reporting period from October 1, 2020 to September 30, 2021; permit year 3 of the permit. Detailed information related to each minimum control measure (MCM) is included in this report along with associated appendices. The annual report was reformatted to improve readability and alignment with the required format laid out in the permit.

Significant events to consider:

- COVID-19 Pandemic. The sustained presence of the COVID-19 virus required modification of City of Austin operations to protect employees and customers. This resulted in limiting municipal operations to remote working or, when possible, in a safely distanced manner with proper personal protective equipment (PPE). Transportation to some work sites was challenging due to the risk of sharing a vehicle. These protective measures and practices affected the productivity of field units and limited the City's ability to conduct in-person outreach events and inspections associated with many of the MCMs.
- On October 11, 2019, the City received a Notice of Deficiency (NOD) from the TCEQ
 requiring the addition of measurable goals within each MCM in the SWMP. The TCEQ
 also requested that additional targeted controls be developed to address bacteria related to

- human defecation from homeless encampments. The City responded to the NOD on October 31, 2019, with an amended SWMP and information related to bacteria impaired waters in the City.
- On October 18, 2021, the City received a second NOD from the TCEQ requiring amended and additional measurable goals. The TCEQ also stated that the City had not sufficiently addressed the requirements related to impaired waterbodies and Total Maximum Daily Loads (TMDLs) as required by Part II.C of the permit.
- On November 18, 2021, the City responded to the second NOD with an amended SWMP that included measurable goals for each MCM. Within the SWMP, the City included a TMDL section that included measurable goals to address the areas designated in Part II.C.2.v. of the permit. The City also included goals to address bacteria from human defecation as requested.

a. MCM 1: MS4 Maintenance Activities

i. Structural Controls

Watershed Protection Department - SCM Inspections

Status of Implementation and Compliance

The Watershed Protection Department (WPD) is responsible for the operation, inspection, maintenance, and repair of the City's storm water drainage infrastructure. Both private and City owned Stormwater Control Measures (SCMs) are inspected by WPD. To ensure proper functionality of the SCMs, inspectors observe the condition of the site and structures, identify, and prioritize structural issues, and document maintenance concerns such as standing water, or sediment buildup. SCMs that are subject to the Barton Springs Zone Operating Permit (BSZOP) have additional inspection oversight to ensure proper functionality of the innovative technology.

SCM Inventory for FY 21 was as follows: 1046 City maintained SCMs 329 City maintained SCMs in Barton Springs Zone (BSZ) 356 Privately maintained SCMs subject to BSZOP 8300 Private SCMs

During the FY21 reporting period, the following activities were accomplished:

MCM 1 Maintenance Activities FY 21 Structural Controls				
Activity/BMP	Quantifiable Goal	Achievement	Completion	Department
Inspections of City	100% of the SCMs	100% of City	September	WPD
maintained	maintained by the	maintained SCM	30, 2021	(PIDS)
stormwater control	City will be inspected	inspected		
measures	every year.			
Inspect City	100% of the SCMs	100 % of City	September	WPD
maintained facilities	maintained by the	BSZ SCMs	30, 2021	(PIDS)
within the BSZ and	City within the BSZ	inspected

owned stormwater	maintained SCMs per	private SCMs	30, 2021	(PIDS)
control measures.	year.	inspected		

Summary of enforcement actions

221 Notices of Violation issued

4 Citations or affidavits issued

39 Notice of Violations issued for the BSZOP

Explanation of Deficiencies

In response to COVID19, the inspection of privately owned SCMs was halted during a significant portion of FY21 for the safety of staff and the regulated public. WPD was able to conduct a significant number of inspections during this time; however, the proposed new goal of 33 percent was not met. WPD has hired additional inspectors and has been working diligently to increase inspection output. WPD is confident that this metric will be met in fiscal year 2022.

Additional details or accomplishments of the program

The SCMs subject to the BSZOP receive additional oversight by WPD staff including SCM design review and construction inspection. Additionally, the post construction inspections for BSZOP sites are extensive. A total of 875 post construction site visits were conducted on the 356 SCMs in the BSZOP program.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

Watershed Protection Department – SCM Maintenance Status of Compliance and Implementation

WPD is responsible for the operation, inspection, maintenance, and repair of the City's storm water drainage infrastructure and open waterways. WPD assets that are maintained include stormwater pipes, inlets, culverts, bridges, and ponds. Sediment, vegetation, debris, and other obstructions are removed to ensure proper flow and function of WPD assets. These activities are part of a comprehensive maintenance plan to identify, evaluate, and solve flooding, erosion, and water quality problems.

During the FY21 reporting period, the following activities were accomplished:

STOPA OF A	MCM 1 Maintenance Activities FY21				
Postage III	Structural Controls				
Activity/BMP	Quantifiable Goal	Achievement	Completion	Department	
Open channel vegetation management	Remove debris and excessive vegetation from approximately fifty (50) miles of open channels	68.2 miles of creek in inventory (227 sites) 126.74 miles maintained 47.2% of total scheduled cuts were	Cut 2 to 6 times by September 30, 2021	WPD Green Infrastructure	
		completed			
Inspections of storm drain inlets	Inspect and clean at least 2,500 inlets and remove collected sediment and other pollutants	7,529 inlets maintained	September 30, 2021	WPD Closed Systems	
Inspections of storm drain pipeline system	Clean at least four miles (21,120 ft.) of the City of Austin storm drain pipeline system	39,308 feet maintained	September 30, 2021	WPD Closed Systems	
Routine vegetation management of City SCMs	Manage vegetation at 75% of SCMs that are maintained by the City (and responsible for vegetation)	764 ponds and 43 specialized sites/ponds =807 total site inventory	Cut 3 to 6 times by September 30, 2021	WPD Green Infrastructure	
		specialized vegetation cuts conducted (43.4% of scheduled cuts on ponds performed)			
Culvert and bridge obstruction management	Remove debris, sediment, vegetation, and obstructions from at least 500 culvert and bridge locations to maintain flood flow conveyance	855 locations maintained	September 30, 2021	WPD Open Waterways	
Open waterway obstruction management	Clear a minimum of 3 miles of open waterways of excess sediment and obstructions	4.67 miles maintained	September 30, 2021	WPD Open Waterways	

Explanation of Deficiencies

Green Infrastructure: There were COVID related staffing problems with contractors resulting in less cuts as compared to previous years. One contractor that was assigned a large number of WPD pond sites with the most frequent cuts dropped out of the contract unexpectedly in the spring of 2021. It took several months to find a replacement contractor and train them to take over the large workload.

Additional details and accomplishments of the program

Green Infrastructure: An additional 101 vegetation, trash and debris removal, or invasive species removal jobs were conducted at ponds and creek Vegetation Control Program (VCP) sites completed by WPD crews and T.O.O.F. A total of 213.9 acres of ponds and open space sites are on this modified schedule to allow native grasses and wildflowers to grow and set seed. The WPD seeded 24 acres total of ponds and open space sites with a native grass and wildflower mix in FY21.

Proposed SWMP changes for the next reporting year

The City is anticipating a Notice of Deficiency from the TCEQ. SCM maintenance goals will be updated upon responding to the TCEQ. Since vegetation cut frequencies vary, this will be evaluated along with the establishment of clear measurable and achievable goals for all SCM maintenance programs.

ii. Floatables

WPD operates a Floatables Program that has established litter collection sites at the mouth of two urban creeks, Shoal Creek and West Bouldin Creek, just prior to their discharge into Lady Bird Lake.

Floatables Removal Site Locations

Watershed	Site No.	Monitoring & Collection Site Location	Land Use
Shoal Creek	1	Shoal Creek at Lady Bird Lake	Mixed Urban
West Bouldin Creek	2	West Bouldin Creek at Lady Bird Lake	Residential Urban

WPD inspect the booms and, when necessary, crews remove all trapped floating material using equipment that can reach the middle of the creek from both sides of the bank. The material removed from each site is loaded into City dump trucks, hauled to a local landfill for proper disposal, and measured by weight at the disposal site.

During the FY21 reporting period, the following activities were accomplished:

	MCM 1 Maintenance Activities FY21 Floatables				
Activity/BMP	Quantifiable Target Achievement Completion Department				
Inspection of boom	Inspect 100% of monitoring boom sites	100% of inspections conducted	September 30, 2021	WPD	
Cleaning of boom sites	Clean 100% of boom sites, if necessary	1.78 tons of material retrieved from booms	September 30, 2021	WPD	

January 2021: Approximately 1,380lbs of floatables were removed from the West Bouldin Creek boom.

Additional details and accomplishments of the program

In addition to monitoring and retrieving material collected from the booms at Shoal Creek and West Bouldin Creek, the Lady Bird Lake crew retrieved an additional 6.18 tons of floatable material in FY21 from the shores of Lady Bird Lake utilizing boats and shore access to hand pick trash and litter from the shoreline.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

iii. Roadways

Status of Implementation and Compliance

The Public Works Department (PWD) and Austin Resource Recovery (ARR) maintain public roadways and right of ways (ROWs) to minimize the discharge of pollutants.

Austin Resource Recovery (ARR)

ARR ensures pollutant removal activities such as street sweeping, litter collection, illegally dumped waste, and dead animal removal are implemented within the public ROW.

During the FY21 reporting period, the following activities were accomplished:

MCM 1 Maintenance Activities FY21 Roadways				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Clean trash, leaves, dirt, and debris, from roadways	Sweep 100% of City-owned public streets	100% of streets swept 2,876 tons of litter removed	September 30, 2021	ARR
Litter Removal	100% of litter containers in downtown district will be emptied	527 tons of litter removed	September 30, 2021	ARR
Remove litter from City-maintained streets and rights of way	Respond to 100% of complaints in known problem areas	3,403 tons of litter removed from ROW and streets	September 30, 2021	ARR
Remove trash and debris due to illegal dumping on public property	Removal of 100% of illegally dumped trash and waste material on public property	527 tons of illegally dumped waste removed from public areas	September 30, 2021	ARR
Removal of dead animals on City- maintained public roadways seven days a week	100% removal of reported dead animals on Citymaintained roadways	31 tons of dead animals removed from roadways	September 30, 2021	ARR
Collection of residential brush and bulk on scheduled basis	100% collection of residential brush and bulk on a scheduled basis	8,768 tons of brush collected 11, 970 tons of bulk collected	September 30, 2021	ARR

Explanation of deficiencies

ARR has continued to experience staffing shortages due to COVID and thus street sweeping services were partially suspended during this timeframe to help provide resources to core services which include trash, recycling, and compost collection.

Additional details and accomplishments of the program

ARR collected a total of 56,327 tons of yard trimmings and compost from residences during weekly collection activities.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

Public Works Department (PWD)

The Roadways Program under PWD includes the implementation of Best Management Practices (BMP) for road repair and snow and ice management.

Status of Implementation and Compliance

During FY21, no changes to PWD programs were made. The PWD continued to implement BMPs during road repair projects. The PWD responded to Winter Storm Uri with the application of dolomite where necessary on roads. Work orders are automatically created for sweeping after applying dolomite to a street segment/bridge. Material was removed following the event.

PWD advised the Transportation Department on the proper handling of wash water during street marking power washing.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

b. MCM 2: Post-Construction Stormwater Control Measures (SCMs)

i. Areas of New Development & Significant Redevelopment

Development Services Department (DSD)

Status of Implementation and Compliance

Multiple departments implement the comprehensive over-sight of land development process requirements, regulatory compliance, and enforce programs to ensure the proper operation and maintenance of controls after new or redevelopment is complete. This is achieved through ordinances, water quality regulations, and policies.

New development and redevelopment activities in the City of Austin's planning jurisdiction are subject to internal review for compliance with water quality regulations of the Austin City Code. The Watershed Protection Department Strategic Plan seeks to carry out the mission of protecting the lives, property, and environment of our community by reducing the impact of flooding, erosion, and water pollution. To facilitate the implementation of this plan, DSD ensures the review of site development plan applications, subdivision plans, and proposed utility projects for compliance with the water quality regulations of the City's land development code.

During the FY21 reporting period, the following activities were accomplished:

MCM 2 Post-Construction SCMs FY 21 Areas of New Development and Significant Redevelopment					
Activity/BMP	Quantifiable Target	Achievement	Completion	Department	
Subdivision application review	Review 100% of applications received	395 Subdivision applications reviewed	September 30, 2021	DSD	
Site plan and school plan application review	Review 100% of applications received	1668 Site plan and school plan applications reviewed	September 30, 2021	DSD	
General Permit application review	Review 100% of applications received	492 General Permit applications reviewed	September 30, 2021	DSD	

Additional details or accomplishments of the program

The conversion of land from its natural state or from agricultural use to urban use accelerates the processes of erosion and sedimentation. These negatively impact the city's drinking water supply, aquatic life, and the recreational resource provided by them. The City of Austin's Code and Criteria provide for protection of land and water resources, minimize the adverse effects of erosion and sedimentation, and enhance stormwater quality.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

Housing and Planning Department (HPD)

Status of Implementation and Compliance

HPD is responsible for most comprehensive planning activities, including ongoing planning support in areas such as land use inventories, mapping, and analysis; population and demographic forecasting; neighborhood planning; and transportation planning. HPD staff review zoning cases.

During the FY21 reporting period, the following activities were accomplished:

MCM 2 Post-Construction SCMs FY21 Areas of New Development and Significant Redevelopment							
Activity/BMP	vity/BMP Quantifiable Target Achievement Completion Department						
Zoning	Review 100% of 182 Zoning September 30, HPD						
application							
review	received	reviewed					

From October 1, 2020, to September 30, 2021, the City of Austin experienced a net growth of 13,561 persons to reach a total population of 982,148. This increase represents a 1.40% annual growth rate and is down from an annual increase of 1.76% from the previous year.

During the reporting period the net acres annexed were as follows:

- 67 acres full purpose (converted from limited purpose)
- 0 acres limited purpose*
- 67 total acreage added to the city limits in FY21
 - * 0 acres of limited purpose were converted to full purpose

Additional details and accomplishments of the program

The zoning case management group processed 190 applications in FY21. Of this total, approximately 88% of staff recommendations were approved by Council.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

Watershed Protection Department (WPD)

Status of Implementation and Compliance

WPD reviews plans for construction of water quality controls over the Barton Springs Zone.

Operating Permit applications are technically reviewed to determine compliance with City code and inspections are conducted during construction.

During the FY21 reporting period, the following activities were accomplished:

MCM 2 Post Construction Stormwater Controls FY 21 Areas of New Development and Significant Redevelopment					
Activity/BMP	Quantifiable Target	Achievement	Completion	Department	
Operating Permit Barton Springs Zone application review	Review 100% of applications received	12 applications reviewed	September 30, 2021	WPD	

Additional details and accomplishments of the program

This is a new process that began in July of 2021. The BSZOP inspectors are now part of the official site plan review process to ensure proper design and functionality of the SCMs.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

ii. Regulatory Mechanism Evaluation

The City implements a thorough review of applications for development with dedicated staff that focus on protecting water quality and sensitive features.

In addition to regulations applied during the review process, multiple departments conduct inspections of construction sites, industrial facilities, private ponds, on-site septic facilities, and hazardous materials storage facilities. Inspections are also conducted in response to allegations of pollutant discharges or hazardous materials spills. All departments that implement these programs have mechanisms through code to initiate enforcement to achieve compliance.

Proposed SWMP changes for the next reporting year

No changes to the regulatory mechanism are required at this time.

iii. Stormwater Control Measures (SCMs)

(referred to in permit as "Flood Control Projects")

WPD- Dam Safety

Status of Implementation and Compliance

WPD maintains an inventory of City owned dams and conduct inspections at each dam under the supervision of an engineer. WPD staff also participate in inspections with the TCEQ Dam Safety Program.

WPD has a robust inspection and maintenance program which plays an integral role in the City Asset Management Plan. During the comprehensive inspections of these facilities, maintenance items are identified by WPD inspection staff. The findings are turned into work orders to the Field Operations Division for repair or given to the Project Design and Delivery Division to implement an engineered solution.

During the FY21 reporting period, the following activities were accomplished:

MCM 2 Post Construction Stormwater Controls FY 21 Dam Safety							
Activity/BMP	Activity/BMP Quantifiable Target Achievement Completion Department						
Dam Safety	Inspect 33 TCEQ	33 Inspections	September	WPD			
Inspections regulated dams under the conducted 30, 2021 supervision of a P.E.							

Additional details and accomplishments of the program

Below are some program highlights in addition to inspecting all 33 TCEQ regulated dams on an annual basis.

- Created a priority field engineering project list to begin the process addressing dams with significant maintenance needs. Seven dams were included in project
- 10 Dams received general maintenance
- Conducted pre-storm recons for two major storm events ensuring inlets and outlets are free of debris and operated as designed.
- Began process of upgrading to real time monitoring for dams. Project was included in fiscal budget.
- CIP Projects: Mearns meadow, Duval West, Lincolnshire 1 & 2, Northwest Park, Old Lampasas
- TCEQ Audit: July 2021; no significant findings
- Updated all Emergency Action Plans for Dams

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

WPD – Infrastructure Projects

Status of Implementation and Compliance

WPD assesses proposed WPD SCM infrastructure projects to ensure City code and criteria elements are met. Existing SCM facilities are evaluated for water quantity and quality retrofit opportunities.

The WPD considers retrofit projects to improve areas that were developed prior to modern regulations. These projects include retrofits to SCMs intended to reduce pollution, flooding, and prevent erosion caused by existing development. A specific schedule is not set for retrofit evaluations as it is done in conjunction with other planning processes.

Stormwater control facilities are evaluated by utilizing an existing asset condition assessment, reviewing maintenance records, and evaluating the following criteria:

- General size and layout
- Drainage area size and pollutant load
- Opportunities for BMP integration with existing features

During the FY21 reporting period, the following activities were accomplished:

MCM 2 Post Construction Stormwater Controls - FY21 Infrastructure Projects				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Evaluate	The incorporation of multi-	Multi-purpose	September	WPD
multi-purpose	purpose functions (water	functions were	30, 2021	
functions in	quality, flood, erosion) will	evaluated in		
WPD	be evaluated in 100% of	100% of WPD		
infrastructure	WPD watershed	infrastructure		
projects	infrastructure projects.	projects		

Additional details or accomplishments of the program

In addition to evaluating all WPD's drainage infrastructure Capital Improvement Program projects through the department's Mission Integration and Prioritization process during the planning and preliminary phases to identify possibilities for including multi-purpose functions, WPD also completed construction of several projects in FY21.

Completed Project - Village at Western Oaks Water Quality Pond Repair Project

This project is located over the Edwards Aquifer Recharge Zone. The wet pond restoration included the removal of sediment and vegetation that had impacted the clay liner and the reconstruction of the liner and wet pond to meet current standards.

Other completed projects in FY21 include the following, all of which were evaluated in prior years during the planning and preliminary phases for incorporation of multi-function purposes:

- Waller Creek District Waterloo Link Waterloo Park
- Tannehill Creek Airport Blvd/Highland Mall Regional Pond
- Williamson Creek Battle Bend Neighborhood Water Quality Retrofit
- Waller Creek Reznicek Field Water Quality Retrofit
- East Bouldin Mary Street Storm Drain Relief System
- Williamson Creek Bitter Creek Tributary Channel Rehabilitation
- East Bouldin Stacy Lane Creek Bank Restoration
- Little Walnut Creek Creek Erosion Mitigation at 8401 Bangor Bend
- Harvest Lane Pond Repair
- Curameng Pond Repair
- Lavendale Pond Repair
- Country Club West 2706 Catalina Drive Channel Restoration Grade Control
- South Boggy Taylor Estates Sec 1 Pond Outfall Repair
- Bear Creek Olympic Heights West Pond Repair
- Waller Creek Capitol Complex Storm Drain Improvements at San Jacinto

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

c. MCM 3: Illicit Discharges Detection and Elimination

i. Illicit and Allowable Discharges

The Watershed Protection Department (WPD) receives approval requests for the discharge of non-stormwater discharges to the City MS4. WPD reviews each request and determines if it is an allowable non-stormwater discharge and if appropriate BMPs are planned for the discharge. The WPD may recommend additional BMPs and approves or denies the request for discharge.

During the FY21 reporting period, the following activities were accomplished:

MCM 3 Illicit Discharge Detection & Elimination FY 21 Non-Storm Water Discharges						
Activity/BMP	Quantifiable Target	Achievement	Completion	Department		
Non-	Respond to 100% of	13 Non-storm water	September	WPD		
Stormwater	requests to	discharge reviews	30, 2021			
Discharge	Discharge discharge non-					
Review stormwaters to MS4. 13 Non-stormwater						
program						
		received				

Proposed SWMP changes for the next reporting year

The allowable non-stormwater discharges section of the SWMP was amended in 2019. A list of illicit pollutant discharges is maintained in City Code. No changes are being proposed to the SWMP for this program.

ii. Detection and Elimination of Illicit Discharges

vi. MS4 Screening and Illicit Discharge Inspection Program

ix. Spill Prevention and Response

Watershed Protection Department (WPD)

Status of Implementation and Compliance

WPD maintains rapid response capabilities for the investigation of environmental emergencies. WPD also responds to non-emergency pollution complaints. Notification of spills are primarily received from the Austin Fire Department (AFD), citizen calls to the WPD Pollution Hotline or Austin 311, the Texas Commission on Environmental Quality (TCEQ), Travis County, referrals

from other WPD staff, and Austin Water. WPD staff are available to receive notification of spills 24 hours a day, every day of the year. WPD hotline and Austin 311 operates on a 24-hour basis, thus allowing for after-hours notification of environmental emergencies.

WPD has developed a categorization system for illegal discharges that are reported based on the severity of the incident and the potential to pollute surface water or storm water. The two incident categories are:

- Priority Incidents which pose an immediate threat to water quality, and
- Non-priority Incidents which do not pose an immediate threat to water quality.

WPD responded to:

- 401 priority incidents.
- 381 non-priority incidents.

WPD recovered:

- 6,145,739 gallons
- 438 cubic yards of pollutants

WPD detected and corrected:

• 1 illicit plumbing connection

During the FY21 reporting period, the following activities were accomplished:

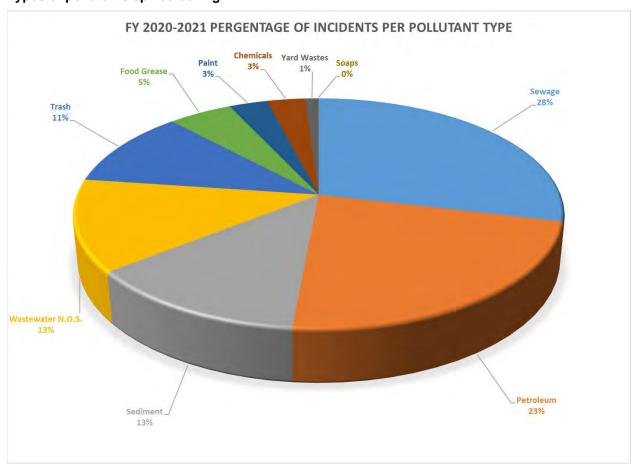

MCM 3 Illicit Discharge Detection & Elimination FY 21 Spill Prevention and Response

Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Spill Response program	Investigate 100% of observed or reported applicable accidental spills and illicit discharges that may enter the MS4.	782 Investigations conducted 24 Investigations conducted in the Barton Springs Recharge Zone (BSRZ)	September 30, 2021	WPD
		782 Incident notifications received		

Summary of enforcement actions

- 111 Notices of Violation issued
- 3 Citations issued
- 4 Enforcement actions over the BSRZ
- 9 Referrals to other enforcement agencies

Types of pollutants spilled during FY21.

Explanation of deficiencies

The total number of incidents was somewhat lower than average which was likely due to behavior changes due to the COVID-19 pandemic (less traffic, less businesses with in-person operations, less citizens out to observe and call about problems).

Additional details and accomplishments of the program

There were no interruptions in service during Winter Storm Uri and WPD addressed several significant illicit discharge events during the storm. Staff also assisted with the Austin/Travis

County Emergency Operations Center for various requests during the storm and the aftermath (welfare checks, distribution of water, assisting with logistics operations, etc).

WPD, AFD, and state partners at the TCEQ, participated in a drill coordinated by Magellan Midstream Partners, L.P. on Wednesday, June 16, 2021. The scope of the drill was a coordinated response to a pipeline failure resulting in a release of crude oil into Lady Bird Lake. The exercise focused on the initial response, protection, and containment measures to protect waterways and intakes, establishing command and incident objectives, and multiagency/department coordination during a large-scale event.

Containment boom was deployed from the shoreline at Festival Beach in different configurations to simulate different types of responses (containment vs. recovery). The event successfully demonstrated the response capabilities of WPD, AFD and TCEQ and helped to identify the resources each of these entities can bring to an emergency response of this scale.

Photo 1. WPD and Magellan planning

Photo 2. WPD crews deploying boom

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

AFD Special Operations

Status of Implementation and Compliance

AFD hazardous materials response is conducted by the Special Operations Division. The Special Operations Division specializes in maintaining response capabilities to hazardous material spills or other incidents that may endanger human health and safety within the City limits. AFD works closely with WPD to implement controls during an emergency to reduce the discharge of pollutants from entering a storm sewer conveyance or water body.

During the FY21 reporting period, the following activities were accomplished:

MCM 3 Illicit Discharge Detection & Elimination FY 21 Spill Prevention and Response				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Hazardous Material	Respond to 100% of reported incidents	Responded to 87,308 incidents	September 30, 2021	AFD
Incident Response		126 Incidents		
		were at facilities with AFD		
		Hazardous Material Permits		

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

iv. Overflows and Infiltration

Wastewater Pipelines

Status of Implementation and Compliance

The Austin Water Utility Department (AW) is responsible for maintaining the integrity of the wastewater collection system to prevent the infiltration or seepage of wastewater into the storm sewer system and waterways. This task is accomplished by using flow monitoring, television inspection, smoke testing, dye testing, creek surveys associated with sewer line crossings, cleaning sewer lines, and working with the Watershed Protection Department (WPD) to determine the location and sources of seepage, exfiltration, and infiltration.

During the FY21 reporting period, the following activities were accomplished:

MCM 3 Illicit Discharge Detection and Elimination FY21 Overflows and Infiltration - Wastewater Pipelines

Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Respond to wastewater emergencies	Respond to overflow emergencies within 1 hour 95% of the time.	427 Emergency response incidents 89.71 % of emergencies responded to within 1 hour	September 30, 2021	AW
Clean wastewater lines	Approximately 1,300,000 linear feet	1,390,365 linear feet cleaned	September 30, 2021	AW
TV inspect and score gravity collection lines	Approximately 1,300,000 linear feet	1,675,179 linear feet inspected	September 30, 2021	AW
Inspect manholes to ascertain integrity	Inspect 2,800 manholes	3,133 manholes inspected	September 30, 2021	AW
Smoke Testing	200,000 linear feet	493,885 linear feet tested	September 30, 2021	AW
Inspect City Owned Lift Stations	Inspect 100% of City lift stations	133 City Lift stations 100 % inspected weekly	Weekly	AW
Televise the collection system located within the EARZ	Televise 100% of the collection system in the EARZ	Approximately 25% televised.	September 30, 2021 5-year cycle complete in 2024	AW

Explanation of deficiencies

During Winter Storm Uri, driver safety took precedence over response time. It was impossible to get to all calls in a safe manner and therefore crews went when travel was safe. In addition, 311 and AW dispatch was overwhelmed with calls, delaying the transfer of calls to AW field crews. These combined obstacles lowered the wastewater emergency response time of 95% within 1 hour to 89.71%.

Proposed SWMP changes for the next reporting year

The City is anticipating a Notice of Deficiency from the TCEQ. The emergency response time goal will be updated upon responding to the TCEQ. Upon further discussion following the circumstances of Winter Storm Uri, it was determined that the goal should be lowered in anticipation of extreme weather events.

On-Site Sewage Facilities (OSSFs)

Status of Implementation and Compliance

AW is responsible for the regulation of OSSFs located within the City of Austin's full purpose jurisdiction and limited purpose annexation areas where health and safety codes apply.

The Texas Commission on Environmental Quality (TCEQ) has granted AW the authority to implement and enforce the OSSF regulations outlined in Title 30 of the Texas Administrative Code (TAC) Chapter 285. The focus of the program is to abate and/or prevent pollution and protect public health from the use of inadequate and/or failing private sewage facilities.

During the FY21 reporting period, the following activities were accomplished:

MCM 3 Illicit Discharge Detection and Elimination FY21 Overflows and Infiltration - Septic Systems

Activity/PMD Quantifichle Target Achievement Completion

Two investigations conducted within 24 hours/next business day of notification. Two investigations conducted within 24	2021 September 30,	

Summary of enforcement actions

One Notice of Violation issued

Explanation of deficiencies

Excepting health and safety violations, all enforcement actions were suspended during the COVID-19 pandemic.

Additional details and accomplishments of the program

During the reporting period, 38 OSSFs were abandoned, and service was connected to the City's wastewater collection system. Nine septic tanks were abandoned in preparation for development or because they were no longer functioning as septic tanks.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

v. Household Hazardous Waste & Used Motor Vehicle Fluids

Status of Implementation and Compliance

The Austin Resource Recovery (ARR) Department operates a Recycle and Reuse Dropoff Center (RRDOC) (formerly known as the Household Hazardous Waste Center) serving residents of Austin and Travis County. The RRDOC is a permanent facility offering services throughout the week. ARR also assists customers who require home pickups or other accommodations. Participation levels have increased from 450 households at the initial event to 28,866 households serviced in Fiscal Year 2021 (FY21). The operation of the RRDOC provides a location for proper disposal to reduce occurrences of illegal dumping. Approximately 1,993,409 pounds of household hazardous waste were diverted from City municipal waste streams in FY21.

During the FY21 reporting period, the following activities were accomplished:

MCM 3 Illicit Discharge Elimination and Detection FY21 Household Hazardous Waste & Used Motor Vehicle Fluids

Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Remove oil	Accept 100% of used	98,783 pounds of	September	ARR
from waste	residential motor oil	waste oil and 1,650	30, 2021	
stream	dropped off at facility	pounds of oil filters		
		recycled		
Remove	Accept 100% of	1,993,409 pounds of	September	ARR
hazardous	residential hazardous	hazardous waste	30, 2021	
materials from	waste dropped off at	accepted		
waste stream	the facility			
Offer HHW	Serve 100% of Austin	26,835 Austin	September	ARR
collection	residents that	households	30, 2021	
services to City	schedule an	participated in drop-		
of Austin	appointment for drop	off or pick-up		
residents	off HHW	services		

Additional items accepted for disposal

- Disposed of 654,691 pounds of flammable materials.
- Disposed of 50,394 pounds of corrosive materials.
- Recycled 341,611 pounds of materials, this does not include paint.
- Recycled 121,148 pounds of paint.

Explanation of deficiencies

When City and County health professionals declared Austin/Travis County at Stage 5 of the pandemic response, the RRDOC was closed to the public. At that time, operations were shifted to at-home collection of HHW only. This resulted in a dramatic reduction of tonnage received and processed.

Additional details or accomplishments of the program

The RRDOC will be piloting a program in the latter half of FY 2022 to provide a door-to-door pick up service of household hazardous waste. This will help address the issue of the RRDOC being in Southeast Austin, away from the growing population in Northwest Austin. Additional staff and equipment will be brought onboard to complete this pilot program. The pilot will provide data to be used to help determine the most efficient method of collecting Household Hazardous Waste for the City of Austin and its residents.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

City of Austin Stormwater Outfalls

d. MCM 4. Pollution Prevention/Good Housekeeping for Municipal Operations

i. Pollution Prevention/Good Housekeeping Program

Inspection Program

Status of Implementation and Compliance

The Watershed Protection Department (WPD) screens a list of all City properties and facilities to identify and prioritize city locations that could potentially contribute pollutants in storm water runoff. Staff inspects these City properties and facilities on a rotational basis and provides storm water training upon request to staff in various city departments.

During the reporting period, the following activities were accomplished:

- Conducted thirteen site visits of City owned properties to verify compliance with storm water regulations.
- Assisted City of Austin Parks and Recreation staff with end-of-season swimming pool
 water discharges by testing the water to ensure complete removal of chlorine prior to
 releasing the water to area waterways.
- Assisted with special events; coordinating with event staff to identify appropriate BMP's and pollution prevention measures for each event.
- Conducted seven stormwater inspections at City of Austin Fleet Service Centers.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

Training Program

Status of Implementation and Compliance

A Compliance Plan was approved by the TCEQ Austin Region Office on August 5, 2020, following a Notice of Violation documented by the TCEQ during an audit conducted in January 2020. Reporting year 20-21 (FY21) is *Year 2* of the Compliance Plan and Permit *Year 3*.

Departments implementing training programs include:

- Austin Fire Department
- Austin Resource Recovery Department

- Austin Water Utility
- Austin-Bergstrom International Airport
- Fleet Services
- Parks and Recreation Department
- Public Works Department
- Watershed Protection Department

During the reporting period, Compliance Plan Year 2, the following activities were accomplished:

- Training team meeting held October 22, 2020.
- Verified key personnel within each department that will organize training
- Determined personnel that should take training in each department
- WPD provided departments with videos that may be utilized for training
- Verified and finalized training topics and methods with key personnel
- Verified and finalized training tracking methods with key personnel
- No training requests to WPD were made by other departments during this period

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP. The City will continue implementing the training plan.

ii. Structural Control Maintenance

Please refer to MCM2, Section a. MS4 Maintenance Activities.

iii. Waste Handling

The City of Austin continues to properly dispose of waste that is removed from the MS4 and other municipal operations. This includes waste from the maintenance of storm water structural controls, floatables removed, and accumulations in storm sewer pipes and drains.

Material removed from the maintenance of City storm water structural controls is taken to an authorized landfill. When maintaining closed systems such as storm sewer pipes and drains, WPD vacuum trucks remove material and transport it to a WPD maintenance facility where the

material is allowed to dewater in designated areas. The solids are taken to an authorized landfill.

ARR and PWD take all litter and debris picked up from the right of way and streets to an authorized landfill.

iv. Pesticide, Herbicide and Fertilizer Application

Status of Implementation and Compliance

The Integrated Pest Management (IPM) Program is a Citywide program that coordinates educational outreach activities and provides information to Texas Department of Agriculture licensed pesticide applicators, retail nurseries, the landscaping community, City land managers and staff, and the public to promote responsible pesticide, herbicide, and fertilizer management practices. The IPM Program is managed by WPD.

IPM plans are required to be submitted to WPD for review when one or more of the following conditions exist:

- as required in the land development review process
- when required by a City Board or City Council
- when land development occurs over the Barton Springs Zone
- when written into a development agreement
- on intensive landscape management sites such as athletic fields and golf courses

During the FY21 reporting period, the following activities were accomplished:

MCM 4 Pollution Prevention and Good Housekeeping for Municipal Operations FY 21 Pesticide, Herbicide, and Fertilizer Application				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
IPM Plan Review	Review 100% of IPM plans submitted through the development review process.	83 plans reviewed 83 plans received	September 30, 2021	WPD
Distribute Grow Green educational information	10 locations	Distributed information at 53 locations	September 30, 2021	WPD
Educate Landscape Professionals	1 class	Class(es) held on 1/19/21; 1/21/21; 1/26/21; 1/28/21	September 30, 2021	WPD

Additional details and accomplishments of the program

- WPD Education staff distributed brochures and other IPM materials to the public, retailers, and City locations. When Covid restrictions did not allow in person deliveries, materials were mailed to partner sites.
- Pest-related questions from citizens are responded to with a phone call or an email.
- The WPD Education staff hosted a four-day virtual Grow Green/GSI training for landscape professionals on 1/19/21; 1/21/21; 1/26/21; 1/28/21
- Austin Water's Center for Environmental Research, a partnership of the City of Austin,
 The University of Texas at Austin, and Texas A&M University was not able to host the
 Texas Department of Agriculture Structural Pest Control Service's Austin area exams
 and classes in FY21 because the facility was closed due to Covid-19. The last in-person
 class at the CER was Feb 19, 2020.
- Collaborated with the Texas A&M AgriLife Extension, Travis County on a Texas
 Department of Agriculture continuing education units training with focus on urban pest
 issues including landscape pest management, herbicides, invasive brush control,
 minimizing pest pressures in turfgrass, turf diseases, oak wilt, and laws and regulations.
- Administered the internal IPM Program, providing guidance to various City departments related to pest management activities.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

e. MCM 5: Industrial and High-Risk Runoff

i. Priorities and Procedures for Inspections and Implementing Control Measures for industrial discharges

The Watershed Protection Department (WPD), Austin Fire Department (AFD), and Development Services Department (DSD) implement industrial facility permitting and inspection programs that are supported by enforcement protocols. Details surrounding these programs have been established in the SWMP and accomplishments for each of the programs are discussed below.

WPD

Status of Implementation and Compliance

Stormwater Discharge Permit Program

Specific commercial and industrial operations within the City of Austin full purpose jurisdiction are permitted to ensure compliance with City Codes that protect water quality. WPD also inspects entities covered under the program. Inspectors locate, verify, and monitor plumbing connections to the City storm sewer system and receiving waterways to prevent illegal discharges of commercial or industrial wastes. Inspectors also observe waste storage, handling, and disposal practices as well as verify and recommend best management practices to prevent pollutant discharges. The operational condition of water quality controls such as oil/grit separators, stormwater conveyances and ponds, and hazardous material interceptors are assessed. During the reporting period,

- Approximately 1.38 cubic yards of pollutants were recovered
- No illicit plumbing connections were detected by staff.

TPDES Multi-Sector General Permit (MSGP) Inspection Program

The WPD maintains records obtained from TCEQ Central Registry of facilities that have obtained coverage under the MSGP by submitting a Notice of Intent (NOI) or No Exposure Certification (NEC) to the TCEQ. WPD tracks permitted facilities that are discharging to the City's MS4 within the Austin full purpose jurisdiction.

Inspections are conducted by WPD staff of permitted NOI and NEC facilities on a routine basis. WPD also conducts desktop reviews of businesses that have submitted information to the State Comptroller's Office indicating that they are operating under a Standard Industrial Classification

(SIC) that requires TPDES MSGP coverage. Facilities that appear to require coverage under the TPDES MSGP are scheduled for inspection.

Municipal Landfills Program

WPD tracks remediation activities at selected sites. During the reporting period, WPD continued monitoring and mitigation activities when warranted at the following locations:

- Lott Avenue Dump Site This small dumping area was discovered in early 2010 following a citizen complaint regarding trash in a tributary of Fort Branch Creek. After large areas of surface dumping were removed from the stream channel by WPD crews; buried waste was discovered in the banks of the creek in several areas. The waste is similar to the Rosewood site, likely ash from burned municipal-type waste. In 2012, the City began design of remediation for the site. Design work by a private firm under contract to the City was delayed due to a dispute but has resumed. Construction is expected to begin in mid-2021.
- **Butler Landfill** The Butler Landfill is located on City parkland on the southern shore of Lady Bird Lake near the MoPac Expressway Bridge. The landfill was operated by the City from 1948 to 1967 exclusively for municipal waste. The City Council has initiated a public process to consider short- and long-term repairs of erosion of the landfill covering.

MCM 5 Industrial and High-Risk Runoff FY21

During the FY21 reporting period, the following activities were accomplished:

businesses from

Comptroller's list for permit eligibility.

Stormwater Inspection Program				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Landfill	Respond to 100% of	0 complaint	Investigated	WPD
Complaint	landfill complaints	investigations	upon	
Investigations	received	conducted	receipt of	
		0 complaints received	complaint	
City	Issue COA	958 stormwater	January 31,	WPD
Stormwater	Stormwater Discharge	discharge permits	2021	
Discharge	Permit to 100% of	issued		
Permit (High	identified high-risk			
Risk	operations			
Facilities)	Inspect 10% of	22 stormwater	September	WPD
	stormwater discharge	discharge permit	30, 2021	
	permitted facilities	inspections conducted		
TPDES	Inspect 20% of	0 NOI inspections	September	WPD
TXR050000	facilities with NOI or	conducted	30, 2021	
and	NEC	0 NEC inspections		
TXG110000		conducted		
(Industrial	Screen 100	30 unpermitted		WPD
Facilities)	unpermitted	businesses screened		

from Comptroller list

Summary of enforcement actions

- 0 Notices of Violation issued
- 0 Citations issued
- 0 Referrals to other enforcement agencies

Explanation of Deficiencies

Due to Covid-19 restrictions, the WPD Industrial Stormwater Inspection Program was not active.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

DSD

Status of Implementation and Compliance

Underground Storage Tank (UST) Leak Protection Program

DSD continued to focus efforts on all permittable facilities with USTs found within the Barton Spring Zone (BSZ) and the full purpose jurisdiction. DSD conducted inspections of identified facilities and new construction to ensure compliance with City Water Quality Code. Inspectors review the implementation of Best Management Practices (BMPs) for proper storage, monitoring, and leak detection activities. DSD recommended BMPs and provided educational materials applicable to each operation during permit renewals.

DSD UST Inventory for FY21 was as follows:

66 UST Construction Permits

222 UST Renewal Applications

1 ghost tank facility (3 tanks identified) Identified USTs

7 new UST facilities built (10 new USTs installed) New USTs Installed

During the FY21 reporting period, the following activities were accomplished:

MCM 5 Industrial and High-Risk Runoff FY21 Stormwater Inspection Program				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Underground Storage Tank Construction permits reviewed	Review all UST Construction permits within 30 days	100% Construction permits reviewed	September 20, 2021	DSD
UST renewal application (every 3 years)	Review all UST renewal applications with 30 days	90% UST renewal applications reviewed	September 30, 2021	DSD
UST facility Inspections	Inspect 90% UST facilities annually.	2,886 Inspections conducted	September 30, 2021	DSD
New UST Construction	Inspect 90% New UST installations	286 new installation inspections conducted	September 30, 2021	DSD

Summary of enforcement actions

annually.

- 7 Notices of Violation issued
- 10 Citations issued

Inspections

- 0 Enforcement actions over the BSRZ
- 0 Referrals to other enforcement agencies

Explanation of deficiencies

The UST Program started FY21 with approximately 200 late annual compliance inspections. In FY21, two employees were hired, and UST was able to get through the backlog of late inspections. Currently, all annual compliance inspections are being conducted 100% on time. DSD continues to be 100% on time for all new UST construction inspections.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

AFD

Status of Implementation and Compliance

Aboveground Hazardous Materials Permit Program

AFD is responsible for the inspection and permitting (3-year permit term) of facilities that store or handle hazardous materials. During inspections, AFD reviews the facility's hazardous material storage, handling, and disposal practices and enforces City and International Fire Code (IFC) requirements.

AFD Aboveground Hazardous Materials Permit Program Inventory for FY21 was as follows: 3446 Permitted Locations
626 Tier II Permitted Sites

During the FY21 reporting period, the following activities were accomplished:

MCM 5 Industrial and High-Risk Runoff FY21 Stormwater Inspection Program				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Inspections of locations with Hazardous Materials Permits	Inspect 300 locations	452 inspections conducted	September 30, 2021	AFD
Investigation of complaints at locations without and with Hazardous Material Permits	Investigate 100% of all complaints	4 complaint investigations conducted 4 complaints received	September 30, 2021	AFD

Summary of enforcement actions

542 Notices of Violation issued

0 Citations issued

0 Referrals to other enforcement agencies

Additional details and accomplishments of the program

AFD has continued its Aboveground Hazardous Materials Inspection Program and continues to be responsive to all complaints received.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

ii. Industrial and High-Risk Monitoring Program

The City does not conduct industrial and high-risk monitoring at these facilities and instead has chosen the option in the permit to conduct inspections at permitted facilities that maintain either an NOI or NEC. The TPDES inspection program was not active during much of FY21 due to COVID; however, inspection frequency will increase in FY22 and FY23 to verify TPDES permit compliance with TXR050000.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SWMP for this program.

f. MCM 6: Construction Site Stormwater Runoff

i. Requirements for Structural and Non-Structural BMPs

Development Services Department (DSD)

Status of Implementation and Compliance

DSD staff continued the site plan review program functions within the City's planning jurisdiction. DSD environmental inspection staff inspects permitted site development plans, subdivision, and utility construction projects within the City full purpose areas and the ETJ for compliance with water quality regulations. Inspectors review compliance with water quality zones, impervious cover limitations, erosion and sedimentation controls, site disturbance areas, permanent final stabilization, cut and fill, water quality controls, spoil disposal, storm sewer discharges, wastewater restrictions, and roadway requirements.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

ii. Inspection of Construction Sites and Enforcement Requirements

Status of Implementation and Compliance

DSD staff is responsible for inspecting construction projects to ensure compliance with the plan that was approved based on code and criteria manual requirements.

A Pre-Construction meeting is conducted with the owner's representative, engineer, contractor, and relevant inspection staff. All parties review and discuss details and requirements of construction phase activities. DSD staff reviews the approved erosion and sediment control plan and confirms the placement of all approved temporary and permanent Best Management Practices (BMPs) which include erosion controls, water quality structures, drainage features, and permanent stabilization.

DSD Construction Inspection Inventory during FY21 was as follows:

1225 commercial sites were active

1199 residential sites were active

During the reporting period, the following activities were accomplished:

\$\frac{1}{2}	FAUS
. 100	

MCM 6 Construction Site Stormwater Runoff FY21

Activity/BMP	Quantifiable Target	Achievements	Completion	Department
Routine Inspections	Monthly inspections of 80% active commercial sites	88% commercial site inspections conducted (12998)	Monthly	DSD
Routine Inspections	Monthly inspections of 80% active residential sites	67% residential site inspections conducted (9617)	Monthly	DSD
Complaints	Respond within 24 hours (or next business day) to 90% complaints	99% complaint inspections conducted (496)	Monthly	DSD
Pre- construction Meeting	Conduct pre- construction meeting within 3 business of request	100% pre- construction meetings conducted	Monthly	DSD

Summary of enforcement actions

236 Stop Work Orders issued

- 1 Citations issued
- 43 Misdemeanors filed to municipal court
- 5 Referrals to other enforcement agencies

Explanation of deficiencies

Staff shortage due to Covid, national hiring issues, retirements & promotions resulted in residential monthly inspections being below 80%. An average of 67% of monthly residential inspections were conducted for total of 9617 inspections. Called residential inspections were ontime 98% of the time for the year.

Additional details and accomplishments of the program

Staff continued to schedule and conduct Pre-construction meetings with the development community within 3 business days. Complaints reduced from previous year to 496 and 99% inspections conducted within 24 hours of complaint. Commercial monthly inspections maintained a yearly average of 88% inspection rate per month with 12,998 annual inspections conducted. Staff development and training was increased from previous years.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

iii. Education and Training for Construction Site Operators iv. Notification of Requirements to Construction Site Operators

Status of Implementation and Compliance

The City continues to provide educational information related to storm water management techniques such as erosion and sedimentation controls, construction sequencing, permanent water quality controls and site restoration activities.

During the reporting period, DSD continued to provide developers and construction site operators the below handout when they meet one-on-one during the pre-construction meeting.

DSD presented to the Austin Contractor and Engineer Association and continues to regularly meet with the Home Builders Association and the Infill Coalition Association. DSD also meets in-person with contractors when they call for assistance.

Monthly meetings with WPD, Arborist, Water Quality Review, Environmental Review and SSI were established. Presentations were provided to stakeholders and the community providing further engagement.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

Pre-Construction Meeting Handout (Commercial Sites & Subdivisions)

Date:	
Site Name:	_
Site Address:	-
Permit Number:	-
TPDES: txr	
Environmental Inspector:	
Acknowledgement that Pre-Construction Handout was reviewed by a City of Austin Envi	ronmental Inspector
Date:	
Superintendent Name:	
Superintendent Signature:	

City of Austin Pre-Construction Checklist

ENVIRONMENTAL INSPECTIONS COMMERCIAL SITES & SUBDIVISIONS

Pre-Construction Meeting Requirements

	All permits must be approved, released and signed by Land Use Review	
	Acquire a Barton Springs Zone (BSZ) operating permit, if required	
	All applicable permits and notices must be posted at site entrance or location visible to the public	
	Copy of approved plans on site	
	Appropriate phase of temporary Erosion and Sedimentation Controls (ESC) must be installed per plans	
	Tree protection must be installed per plans prior to clearing and grading activities	
	 Changes to Tree Protection Plan must be approved by the Development Assistance Center (DAC) 	
	 Where trees are to be fertilized prior to construction activity, documentation is required prior to 	
	the pre-construction meeting	
	*The City of Austin encourages the preservation of trees and under-story plants that are not specifically	
	designated for preservation on approved plans*	
Storm Water Pollution Prevention Plan (SWP3) Requirements		
	SWP3 shall be accessible on site, or a posted Construction Site Notice (CSN) must describe the location	
	of the SWP3 if off site	
	SWP3 must be made readily available upon request, or no later than within 24 hours if stored off site	
	An owner representative is required to inspect controls daily and log entries	
	\circ Every 14 days, and within 24 hours after a $\frac{1}{2}$ " or greater rainfall event	
	OR	
	 Once weekly regardless of a rainfall occurrence 	
	Owner representative can be a Licensed Engineer, a person supervised by a Licensed Engineer, a	
	Certified Inspector, or an Inspector in Training (IT)	
	Update site map and other SWP3 information as site conditions change	
	Provide electronic copies of SWP3 reports immediately upon the request of the Environmental Inspector	
	Environmental Inspector will perform SWP3 audits biannually or as deemed necessary	
Tompo	erary Erosion and Sediment Controls (ESC) and other BMPs	
	ESCs shall be phased for effectiveness and maintained throughout the life of the permit	
	Minor adjustments can be made to the ESC plan without a site plan correction/ revision at the discretion	
	of the Environmental Inspector	
	Environmental Inspector shall request the installation of additional controls, if deemed necessary	
	Rough cut ponds shall serve as temporary sediment traps- constructed as the first item in the Sequence	
	of Construction	
	Install and maintain Construction Site Entrance to prevent tracking- if tracking occurs off site take	
_	corrective action immediately	
	Any off site discharge of water must comply with City Code (contact Environmental Inspector prior to	
_	de-watering activities)	
	 Settling tanks, filter bags, or pits recommended 	
	 A de-watering plan may be required 	
	Install lined concrete wash-out area- properly dispose of materials once solidified	
	Perform dust control measures as needed	
	Maintain good housekeeping at all times and keep trash and debris contained	
	Keep oil, hazardous material, and other liquids labeled, covered, and stored on secondary containment	
	Store port-o-johns on level ground, outside of drainage pathways, ROW, and Critical Root Zones	
	Initiate temporary/ permanent stabilization when construction ceases in disturbed area for more than	

14 days

Construction Activity Requirements		
	Construction activity must follow the Sequence of Construction in approved site plan	
	Limits of Construction (LOC), haul roads, staging & other designated areas must follow approved plans	
	Construction adjacent to creeks shall comply with requirements for construction in waterways	
	Coordinate with other departments for approval to construct within drainage easements, floodplain,	
	setbacks, ROW, etc.	
	Development must be consistent with approved plans- any changes, additions, and/ or deletions will	
	require all site plan corrections/ revisions to show as-built conditions	
	Any spoil/ fill material disposed off-site within the city limits out to 5-mile Extra Territorial Jurisdiction	
	(ETJ) of Austin must be disposed of at a permitted site	
	 Notify Environmental Inspector prior to disposal 	
	 Retain copy of disposal site permit and receipt 	
	All on-site temporary and permanent fill areas must comply with the location, depth, and limits on	
	approved site plan	
	All Water Quality Facilities must be constructed per approved site plan	
	o Environmental Inspector shall be notified to conduct benchmark inspections, or contractor shall	
	uncover and allow viewing of all components not seen during construction (upon request)	
	 Water Quality facilities must be complete, functional, and revegetated prior to final inspection 	
	Spills less than 5 gallons is the site operator's responsibility	
	 Contact City of Austin Spill Response (and TCEQ if applicable) for spills that are 5 gallons or more 	
	All sites also as assetions / assisions asset he assessed	
	All site plan corrections/ revisions must be approved	
	Submit an approved Engineer's Concurrence Letter (ECL)	
	Final inspection conducted by Environmental Inspector within approximately 48 hours of approved ECL submittal	
	Final inspection punch list items complete	
	Water Quality structures complete and fully functional	
	Temporary Certificate of Occupancy (TCO) may be issued prior to final stabilization, with the approval of	
	the Environmental Inspector	
	Certificate of Occupancy (CO) or Certificate of Compliance (CC) shall be issued once final stabilization	
	requirements are satisfied, or a Developer's Contract is in place	
	Final Stabilization requirements satisfied	
	 95% revegetation, 1 ½ " tall grass, per approved permanent seed mix/ sod on site plan 	
	AND/ OR	
	 Landscape requirements met according to approved site plan 	
	 Provide Landscape Concurrence Letter 	
	 Utilization of appropriate top soil 	
	 No bare areas exceeding 10 SF 	
	 Cool season and annual grasses will not be accepted as permanent revegetation 	
	 Temporary ESC and accumulated sediment must be removed from site 	
	Developer's Contract in place if final stabilization not complete at end of project	
	 Developer's contract issued for a 4 month period 	
	o If executed between Sep. 15 th and Dec. 15 th and requiring Bermuda grass, developer/owner can	
	request 1, 4 month extension	
	 If executed for a project requiring native grasses, developer/ owner can request 1, 8 month 	
	extension	
	Fiscal Release (ESC fiscal will not be released until final permanent stabilization requirements have been	
	satisfied)	

Violations and Enforcement Procedures

- Violations will be handled as followedVerbal warning
 - Written warning with re-inspection fee
 - o Stop Work Order (SWO) with re-inspection fee (officially initiating the enforcement process)
 - o Citation and criminal penalties up to \$2000 per day per violation
 - SWO and/ or Citation may result in all associated permits being placed on hold allowing no further work or inspections until issues are resolved

Environmental Inspector can bypass or duplicate any of these steps at their discretion, depending on the severity of the violation

Priority violations may result in an immediate Stop Work Order (SWO) or issuance of a citation

- ☐ A re-inspection fee will be issued if the Environmental Inspector has to make repeat site visits for:
 - Pre-construction Meetings
 - Non-permitted Sites
 - Release of a Violation or Stop Work Order (SWO)
 - o Release of an Ordinance Violation
 - Inspection of Water Quality Facility
 - Final Inspection
 - Complying with terms of Developer's Contract
- ☐ Examples of Routine Violations
 - Failure to perform maintenance and/ or repair temporary ESC after disturbance or rainfall event, or as directed by the Environmental Inspector
 - Failure to make plan revisions to temporary ESC as directed by Environmental Inspector
 - o Tracking of soil, base materials, gravel, or paving materials onto roadway
 - Failure to maintain tree protection
 - Failure to maintain good housekeeping
- □ Examples of Priority Violations
 - o No permit for development or other related construction activities
 - Failure to have pre-construction meeting
 - o Failure to follow Sequence of Construction
 - Any disturbance outside Limits of Construction
 - Clearing, grading, or filling beyond what is delineated on approved site plan resulting in damage to trees, natural areas, Critical Environmental Features (CEFs), or immediate water quality degradation
 - Occupancy of a building, parking lot, or proposed improvements prior to final inspection and release from Environmental Inspector
 - o Removal of protected trees without a permit
 - Offsite discharge of silt or other pollutants, particularly in the Barton Springs Zone (BSZ)
 - Failure to comply with a Stop Work Order (SWO)

ATTACHMENT 2

TCEQ Fact Sheet

Texas Commission on Environmental Quality (TCEQ) Construction General Permit No. TXR150000

What Activities Need TCEQ Construction General Permit (CGP) Coverage?

You need permit coverage if:

- Your construction activities will disturb one or more acres, or
- Less than one acre is disturbed, but your site is part of a larger common plan of development or sale with the potential to cumulatively disturb one or more acres.

Who's Responsible for Getting Permit Coverage?

Title to the property does *not* determine permitting obligations.

It is the **operator** that is responsible for obtaining permit coverage. The operator is the party or parties that either individually or taken together meet the following two criteria:

- They have operational control over the site specifications (including the ability to make specification modifications);
- They have day-to-day operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions (e.g. are authorized to carry out activities identified in the plan).

At a typical commercial construction site, the owner will meet the first criteria of an "operator" and the general contractor(s) will meet the second criteria. If so, both the owner and the general contractor(s) must obtain permit coverage.

At a residential development, a developer may construct roads and install utilities, while builders do construction on individual lots. The developer and the builder will both meet the criteria of an "operator" and must obtain permit coverage.

A builder who controls his own plans and specifications, disturbs less than 1 acres but is part of a larger common plan of development of sale (e.g. a subdivision), must still obtain permit coverage.

What Will You Need To Do?

Large Construction Sites

If you operate a construction project that will disturb 5 or more acres you must:

- Obtain a copy of the TCEQ CGP (TPDES Permit no. TXR150000),
- Develop and implement a Storm Water Pollution Prevention Plan (SWP3) covering the entire site or all portions of the site for which you are the operator,
- Complete and submit a Notice of Intent (NOI) to TCEQ and forward a copy of the NOI to the City of Austin (the local MS4) prior to the commencement of construction, and
- Post copy of the CSN at the work site, or a construction sign that includes your permit number, a contact name and phone number, a project description and the location of the SWP3.

FACT SHEET-0603Rev2014

Small Construction Sites

If you operate a construction project that will disturb 1 or more acres, but less than 5 acres, you must:

- Obtain a copy of the TCEQ CGP (TPDES Permit no. TXR150000),
- Develop and implement a Storm Water Pollution Prevention Plan (SWP3) covering the entire site or all portions of the site for which you are the operator,
- Complete and post a construction site notice,
- Forward a copy of the construction site notice to the City of Austin (the local MS4) prior to the commencement of construction.

Unless notified to the contrary, operators are authorized to discharge storm water from construction activities under the terms and conditions of the permit, (7 days) after the date that the NOI is postmarked or if utilizing electronic submittal, prior to commencing construction activities.

Note: Construction projects that disturb less than 1 acre, but are part of a common plan development that will disturb 5 or more acres, must follow the guidance for **large construction sites**. If the construction project is part of a common plan of development will disturb 1 or more acres, but less than 5 acres, the guidance for **small construction sites** must be followed.

Note: Erosion and Sedimentation Control Plans required by the City of Austin **are not substitutes** for the TCEQ required Storm Water Pollution Prevention Plans (SWP3).

Where do you submit your information?

The completed NOI must be mailed to the following address:

Texas Commission on Environmental Quality (TCEQ)

Wastewater Permitting Section

Storm Water & Pretreatment Team; MC - 228

P.O. Box 13087

Austin, Texas 78711-3087

An application fee of \$325 or \$225-Electronic, must be submitted with each NOI and the application fee should be submitted separately to one of the following addresses:

By Regular U.S. Mail:

Texas Commission on Environmental Quality (TCEQ)

Financial Administration Division

Revenue Section MC-214

P.O. Box 13087

Austin, TX 78711-3087

By Electronic Steers:

Texas Commission on Environmental Quality (TCEQ)

www.tceq.state.tx.us/steers

Steers Participation Agreement Form

A copy of the NOI and the Construction Site Notice must be mailed to the City of Austin at the following address:

Lee C. Lawson
City of Austin - WPD/FOD
P.O. Box 1088
Austin, Texas 78767

How Can You Get More Information?

Information, forms and documents are available through the TCEQ storm water web site at www.tceq.state.tx.us.

Additional guidance can also be obtained by calling Lee C. Lawson at 974-3348.

Note: The City of Austin has provided this information for **educational purposes only**. The City of Austin does not enforce the TCEQ Construction General Permit requirements.

TCEQ Fact Sheet

Texas Commission on Environmental Quality (TCEQ) Construction General Permit No. TXR150000

What Activities Need TCEQ Construction General Permit (CGP) Coverage?

You need permit coverage if:

- Your construction activities will disturb one or more acres, or
- Less than one acre is disturbed, but your site is part of a larger common plan of development or sale with the potential to cumulatively disturb one or more acres.

Who's Responsible for Getting Permit Coverage?

Title to the property does *not* determine permitting obligations.

It is the **operator** that is responsible for obtaining permit coverage. The operator is the party or parties that either individually or taken together meet the following two criteria:

- They have operational control over the site specifications (including the ability to make specification modifications);
- They have day-to-day operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions (e.g. are authorized to carry out activities identified in the plan).

At a typical commercial construction site, the owner will meet the first criteria of an "operator" and the general contractor(s) will meet the second criteria. If so, both the owner and the general contractor(s) must obtain permit coverage.

At a residential development, a developer may construct roads and install utilities, while builders do construction on individual lots. The developer and the builder will both meet the criteria of an "operator" and must obtain permit coverage.

A builder who controls his own plans and specifications, disturbs less than 1 acres but is part of a larger common plan of development of sale (e.g. a subdivision), must still obtain permit coverage.

What Will You Need To Do?

Large Construction Sites

If you operate a construction project that will disturb 5 or more acres you must:

- Obtain a copy of the TCEQ CGP (TPDES Permit no. TXR150000),
- Develop and implement a Storm Water Pollution Prevention Plan (SWP3) covering the entire site or all portions of the site for which you are the operator,
- Complete and submit a Notice of Intent (NOI) to TCEQ and forward a copy of the NOI to the City of Austin (the local MS4) prior to the commencement of construction, and
- Post copy of the CSN at the work site, or a construction sign that includes your permit number, a contact name and phone number, a project description and the location of the SWP3.

FACT SHEET-0603Rev2014

Small Construction Sites

If you operate a construction project that will disturb 1 or more acres, but less than 5 acres, you must:

- Obtain a copy of the TCEQ CGP (TPDES Permit no. TXR150000),
- Develop and implement a Storm Water Pollution Prevention Plan (SWP3) covering the entire site or all portions of the site for which you are the operator,
- Complete and post a construction site notice,
- Forward a copy of the construction site notice to the City of Austin (the local MS4) prior to the commencement of construction.

Unless notified to the contrary, operators are authorized to discharge storm water from construction activities under the terms and conditions of the permit, (7 days) after the date that the NOI is postmarked or if utilizing electronic submittal, prior to commencing construction activities.

Note: Construction projects that disturb less than 1 acre, but are part of a common plan development that will disturb 5 or more acres, must follow the guidance for **large construction sites**. If the construction project is part of a common plan of development will disturb 1 or more acres, but less than 5 acres, the guidance for **small construction sites** must be followed.

Note: Erosion and Sedimentation Control Plans required by the City of Austin **are not substitutes** for the TCEQ required Storm Water Pollution Prevention Plans (SWP3).

Where do you submit your information?

The completed NOI must be mailed to the following address:

Texas Commission on Environmental Quality (TCEQ)

Wastewater Permitting Section

Storm Water & Pretreatment Team; MC - 228

P.O. Box 13087

Austin, Texas 78711-3087

An application fee of \$325 or \$225-Electronic, must be submitted with each NOI and the application fee should be submitted separately to one of the following addresses:

By Regular U.S. Mail:

Texas Commission on Environmental Quality (TCEQ)

Financial Administration Division

Revenue Section MC-214

P.O. Box 13087

Austin, TX 78711-3087

By Electronic Steers:

Texas Commission on Environmental Quality (TCEQ)

www.tceq.state.tx.us/steers

Steers Participation Agreement Form

A copy of the NOI and the Construction Site Notice must be mailed to the City of Austin at the following address:

Lee C. Lawson
City of Austin - WPD/FOD
P.O. Box 1088
Austin, Texas 78767

How Can You Get More Information?

Information, forms and documents are available through the TCEQ storm water web site at www.tceq.state.tx.us.

Additional guidance can also be obtained by calling Lee C. Lawson at 974-3348.

Note: The City of Austin has provided this information for **educational purposes only**. The City of Austin does not enforce the TCEQ Construction General Permit requirements.

g. MCM 7: Public Education and Outreach/Public Involvement and Participation

i. Public Education and Outreach

The public education and awareness efforts of the City encompass a wide variety of water quality-related programs. The Watershed Protection Department (WPD), Austin Resource Recovery Department (ARR), and Austin Water Utility Department (AW) each have programs that provide water quality and pollution prevention education to citizens in the Austin area.

Austin Water (AW)

Status of Implementation and Compliance

AW's customer outreach programs are geared at protecting the City's sanitary sewer system by promoting the proper disposal of commercial and residential fats, oil and grease and appropriate discarding of items that are frequently flushed down the toilet but should not be, like disposable wipes and unused pharmaceuticals.

During the FY21 reporting period, the following activities were accomplished:

OF ADJ.

MCM 7 Public Education and Outreach FY21

Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Public Outreach-	4 outreach	1 outreach events	September	AW
Stop the Blob!	events/year	conducted	30, 2021	
Social Media Campaign-Stop the Blob!	Quarterly post on AW social media	12 social media posts	September 30, 2021	AW

Explanation of deficiencies

With the continued Covid-19 pandemic, AW was able to participate in just one (1) in-person community outreach event during the reporting timeframe.

DateEvent NameEstimated Booth Visitors8/13-15/2021Austin Fall Home + Garden Show300+

In addition, AW provided Fats, Oils, and Grease (FOG) related outreach materials to be included in bags distributed to the Austin community on National Night Out despite there not being an opportunity to have a booth.

During the pandemic, AW took time to update/refresh the public outreach booth signage. This includes new, informative tabletop posters.

Additional details and accomplishments of the program

During FY21, AW continued to educate customers about proper disposal of FOG and the dangers of flushing items other than toilet paper using various outreach materials. In FY21, one-page flyers and bookmarks were created for both the "Stop the Grease Blob" and "Only Flush Toilet Paper" outreach programs. Handouts are provided at outreach events, included in outreach giveaways offered to apartment complexes following an SSO, and are located on the AW website. Copies of all outreach materials are available upon request.

The AW Stop the Grease Blob webpage was updated several times in FY21, including adding information on FOG related myths and some holiday specific information (especially as it relates to disposal of large amounts of cooking oil). As noted above, the Austin Water Stop the Grease Blob webpage includes links to the various FOG related outreach materials such as the residential Grease Blob handout and the one-page flyer on proper grease disposal for multifamily property managers to print for their residents.

Print, digital and radio advertisements related to the AW FOG outreach program ran on several platforms during October and November of 2020 and September 2021. The print advertisements were in the Community Impact paper, digital ads were on Community Impact, Audacy Inc., KUT, Sun Radio and Waterloo Media and radio spots were on KUT, Sun Radio and Waterloo Media.

Related to social media, the Austin Water Facebook, Twitter and Instagram accounts are updated throughout the year with reminders to residents to properly dispose of FOG and to only flush toilet paper. There were 12 "Stop the Grease Blob" and 6 "Only Flush Toilet Paper" related posts on the social media platforms in FY21.

<u>Proposed SWMP changes for the next reporting year</u>

No changes are being proposed to the SMWP.

Watershed Protection Department (WPD)

Status of Implementation and Compliance

The public education and awareness efforts of WPD encompass a wide variety of elements to encourage and assist citizens to help protect water quality in the full purpose jurisdiction. WPD coordinates a multitude of programs to accomplish outreach and education. Some of these program goals include educating students within the Austin Independent School District, providing responsible gardening information and tips to residents and landscape professionals, providing information and tools to pet owners, and providing oil-change buckets to home mechanics.

During the reporting period, the following activities were accomplished:

MCM 7 Public Education and Outreach FY21

Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Elementary School: Earth Camp and Earth School	Offer Earth Camp or Earth School to 100% of AISD Elementary Schools each school year	Earth Camp or Earth School offered to 75.9% of AISD Elementary Schools. AISD has 79 elementary schools. Virtual Earth Camp was provided to 17 schools and Virtual Earth School was offered to an additional 43 schools.	September 30, 2021	WPD
Storm Drain Marking	Support at least one storm drain marking event each quarter	4 storm drain marking events supported	September 30, 2021	WPD
Grow Green	Receive 10,000 webpage views	GrowGreen.org received 174,108 webpage views	September 30, 2021	WPD
Scoop the Poop	Fulfill 100% of requests from the Parks and Recreation Department for pet waste bags and dispensers	100% of requests from PARD were fulfilled. 2,856,000 pet waste bags provided to PARD 50 pet waste bag dispensers provided to PARD	September 30, 2021	WPD
Scoop the Poop	Mail information to pet-friendly business and pet-friendly apartments	Completed mailouts to pet-friendly businesses and apartments	September 30, 2021	WPD

Explanation of deficiencies

Due to the pandemic, WPD pivoted to virtual learning because AISD schools were not authorized to do field trips, and many did not accept in person presenters. Additionally, due to COVID, there was increased teacher turn-over in AISD, therefore, most schools focused on their core curriculum instead of additional services that WPD provides. There were also cancellations due to extreme weather events like Winter Storm Uri. WPD prioritized offering Virtual Earth School or Virtual Earth Camp to teachers who had previous experience within person versions of these programs. Creating virtual programs was more staff intensive and time consuming, therefore, the programs were not offered as early in the school year they typically are and not as many schools were able to be reached. Staff focused efforts on Virtual Earth Camp until December 2020 and then were able to add Virtual Earth School for the spring semester of 2021. Typically, WPD offers both programs for the full school year.

Additional details and accomplishments of the program

- Displayed prominent interpretive signage about the endangered Barton Springs and Austin Blind salamanders, hydrology of the Edwards Aquifer, the history of the springs, and the importance of stewardship at the main entries to Barton Springs Pool.
- Displayed signs in English and Spanish at Eliza Spring, Sunken Gardens and Upper Barton Springs to raise awareness about the endangered salamanders and activities that are not allowed in the area.
- Continued to provide materials such as an audio tour of Barton Springs Pool that citizens can stream on their phones, the "Who's swimming with you?" brochure in both English and Spanish, and Barton Springs salamander masks.
- Provided Grow Green landscaping education that includes a focus on reducing the use of landscaping chemicals by using integrated pest management techniques.
- Continued support for the Splash! groundwater education exhibit near Barton Springs.
 The building was closed to the public during the pandemic, but staff worked to share
 educational information online. During the reporting period, the "Barton Creek
 Timestream" exhibit debuted to share information about community advocacy that has
 protected the environmental health of this special ecosystem.

During the reporting period, the following activities were also accomplished:

MCM 7 Public Education and Outreach FY21

Activity/BMP	Quantifiable Target	Achievement	Completion	Department
East Austin Environmental Initiative (EAEI)	Participate in at least 2 community events each year	Participated in 2 community events	September 30, 2021	WPD
Shade Tree Mechanic	Provide educational information and free oil-change bucket to 100% of citizen requests	27 oil-change buckets provided to citizens	September 30, 2021	WPD
Pollution Hotline	Spend at least \$2,000 annually toward advertising the pollution hotline to the public	\$26,901 spent on advertising the hotline	September 30, 2021	WPD

Explanation of deficiencies

Due to Covid-19 restrictions, all face-to-face public EAEI events were cancelled or postponed to prevent transmittal of the Covid virus.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

Austin Resource Recovery (ARR)

Status of Implementation and Compliance

ARR implements education programs aimed to reduce the generation of litter and promote proper disposal of household hazardous waste. ARR advertises via social media, ARR's website, utility bill inserts, newspaper ads, etc. Programs encourage proper disposal of waste, recycling, and "smart" trash habits.

During the FY21 reporting period, the following activities were accomplished:

MCM 7 Public Education and Outreach FY21

See newsletter content on the following pages.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

ii. Public Involvement and Participation

Status of Implementation and Compliance

The City of Austin used to maintain a combination of co-sponsorships and contracts for different programs with Keep Austin Beautiful (KAB) Program, a 501(c) (3) non-profit organization. In 2021, the City changed to one contract in which different organizations compete for varying components.

During the reporting period, the following activities were accomplished:

MCM 7	Public Involven	nent and Part	icipation F	Y21
Activity/BMP	Quantifiable Target	Achievement	Completion	Dep
0 1 11	NA ' (' A ()	0 1 1	0 1

areas of cleanup, beautification, habitat and creek restoration, and education	Contract for projects and programs in the areas of cleanup, beautification, habitat and creek restoration, and	Maintain 1 contract with external	One contract maintained by WPD with external	September	

Additional details and accomplishments of the program

Keep Austin Beautiful (KAB) is a non-profit organization whose mission is to inspire and educate all Austinites to volunteer together, beautify green spaces, clean waterways, and reduce waste every day.

- Planned and executed 3 "Love Where You Live Days" engaging 126 volunteers, utilizing 252 volunteer hours, and distributing 63 cleanup kits for individuals and members of the same household to volunteer together. Our Adopt-a-Street and Adopt-a-Creek volunteers were invited to participate in our monthly "Love Where You Live Day" events;
- Supported 3 Adopt-a-Creek cleanups, engaging 17 volunteers, utilizing 33 volunteer hours;
- Supported 2 Adopt-a-Street cleanups, engaging 14 volunteers, utilizing 36 volunteer hours;
- Supported 13 Community Cleanups, engaging 81 volunteers, utilizing 141 volunteer hours, removing 490 pounds of litter, and collecting 80 pounds of recycling;
- Performed 1 Clean Lady Bird Lake event, engaging 8 volunteers, utilizing 16 volunteer hours, removing 140 pounds of trash and 50 pounds of recycling;
- Planned the Annual Keep Austin Beautiful Day which included:
 - Creating 400 clean up kits offered at no cost to volunteers;
 - Planning and organizing distribution of 360 cleanup kits;
 - Recruiting approximately 1,147 volunteers who contributed 2,234 volunteer hours;
 - Registering volunteers to work at 68 different clean-up sites in all 10 council districts;
 - Supporting volunteers who collected 23,580 pounds of trash and 3,632 pounds of recycling.

iii. Evaluation of the effectiveness of this MCM

It is challenging to directly measure the effectiveness of education through pollution reduction rates; however, it may be evaluated through the amount of people reached. The City varies education programs so that communications reach a large number and a wide variety of citizens. Education programs reach people through social media posts, email newsletters, websites with helpful information, printed information at garden centers, and in-person events such as conventions and school programs.

ARR's social media posts reached approximately 29,456 community members. WPD reached 2,445 students through partnership programs and 2,834 students through youth education programs in schools. There were 174,108 visits to the www.growgreen.org website, 170 storm drains marked by community members, and \$30,000 awarded to local schools for rainwater centered programming via Bright Green Future Grants. Austin Water had over 300 visitors at their booth at the Austin Home and Garden Show.

The Recycle & Reuse Drop-off Center has reopened, by appointment only

Beginning on Tuesday, March 9, 2021, the Recycle and Reuse Drop-off Center has reopened, by appointment only, following a temporary closure due to COVID-19 safety concerns. The center will resume its acceptance of hard-to-recycle items such as Styrofoam and plastic film, as well as household hazardous waste. Austin/Travis County residents can schedule a drop-off time.

Learn More & Schedule

Storm debris removal and disposal options are available for Austinites

Weeks later, Austinites are still faced with the mess left behind from winter storm Uri. If you still have storm debris like tree limbs, branches, shrubs and leaves, we have disposal options:

Compost small debris curbside: Small branches and leaves can be composted in your green cart. Branches that don't fit in the cart (no longer than five feet and no thicker than three inches in diameter) should be stacked into manageable bundles no heavier than 30 pounds, next to your cart. Learn more.

Drop off debris: Austinites can drop off storm debris from the recent winter storm at the Hornsby Bend Biosolids Management Plant through April 3. **Learn more.**

Get large tree limb removal: If you're an Austin Resource Recovery customer who must remove large tree limbs as a result of the winter storm, please cut tree limbs to any size between five feet to 15 feet in length and stack them at the curb no higher than four feet. Call 3-1-1 to schedule a storm debris collection.

Rustin Recycles

AUSTIN RESOURCE RECOVERY NEWS

Storm debris removal and disposal update

Many Austin Resource Recovery customers put in a special request for storm debris collection. Please be aware that we are running behind on completing these requests. Customers that still need a storm debris collection are asked to set out any remaining storm debris to the curb by 6 a.m. Monday, April 12 for collection. The high volume of storm debris material is taking longer than expected, and collection can take up to a month. Please leave the material out and we will collect it as soon as we are able. Thanks for your continued patience. Here are some other options for storm debris removal:

Set out material with your weekly composting collection: Small branches and leaves can be composted in your green cart. Branches that don't fit in the cart (no longer than five feet and no thicker than three inches in diameter) should be stacked into manageable bundles no heavier than 30 pounds, next to your green cart.

Set out material with your regularly scheduled large brush collection: Large brush and tree limbs that are too large for yard trimmings collection are collected periodically. Download the Austin Recycles app or check our website for your collection schedule.

Drop off debris: Austinites can drop off storm debris from the recent winter storm at the Hornsby Bend Biosolids Management Plant through April 18.

AUSTIN RESOURCE RECOVERY NEWS

Dangers lurking in our carts

Every day, nearly 300 trash, recycling and compost trucks hit the streets of Austin to collect the City's residential waste. While collecting every day, our sanitation workers have seen all sorts of things end up in carts that can cause serious injury to them or anyone around. These items have the potential to spontaneously combust when exposed to high temperatures or can cause severe chemical burns.

MoveOutATX is back for its third year, helping to keep items out of landfills

MoveOutATX is a community effort to keep good stuff out of the landfill during the local, university move-out season. The program kept 92 tons of material out of landfills in 2019. The program was canceled in 2020 due to the COVID-19 pandemic but will return for its third year this summer.

Gently-used items, such as furniture, cleaning supplies, clothing and more will be accepted at temporary donation stations (locations being determined) in and around West Campus July 24–25 and 29–31. Items collected will be donated to participating reuse organizations. MoveOutATX is facilitated by the City of Austin in partnership with the UT Office of Sustainability.

AUSTIN Austin Resource Recovery News RECYCLES

Back to school: zero waste your kids' lunch

Shopping for the school year usually involves purchasing clothes, school supplies and lunch box necessities. While your kids' homemade meals are made with love (and sometimes the crust cut off), packing their lunch box often includes single-use plastic bags, disposable utensils, wax-coated juice boxes and other hard-to-recycle items that end up in the landfill. Not to worry, there are many easy ways to make lunches with love... and with love for the environment too.

h. MCM 8: Monitoring, Evaluation, and Reporting

i. Dry Weather Screening

Status of Implementation and Compliance

The Dry Weather Screening Program aims to detect the presence of illicit connections and improper discharges to the MS4. The dry weather screening process was updated to target outfalls in areas of the City where illicit discharges are more likely to occur based on historic pollutant data, while accounting for every watershed within COA jurisdiction. Selected target outfalls covering all areas of the MS4 are screened at least once during the permit term.

WPD screens target outfalls for flow during dry weather periods (June – September and no rainfall in the previous 72 hours). No dry weather screening was conducted in FY21 due to Citywide COVID-19 safety measures and the re-formulation of the program. WPD is resuming Dry Weather Screening in FY22 and will screen all designated outfalls by the end of the permit term.

Explanation of deficiencies

During FY21 the Dry Weather Screening program was shifted to be the responsibility of a different workgroup. Because of the shift in responsibilities, it was decided to take the opportunity to update the program to focus on outfalls in areas where historical illicit discharge data showed that illicit discharges were more likely to occur. After designating outfalls for dry weather screening, a new Quality Assurance Project Plan (QAPP) was written for the Dry Weather Screening program during the fiscal year. No dry weather screenings were performed during FY21; screening of the newly designated outfalls under the new QAPP will resume in FY22, with all outfalls screened by the end of the permit term.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

ii. Wet Weather Screening

Status of Implementation and Compliance

WPD implements a program that uses a visual assessment to provide a post-storm event evaluation of the storm water runoff in the Austin area waterways. Each watershed monitoring

site(s) will be screened at least once during the permit term. A visual assessment of storm water flow will be completed at each monitoring site within 36 hours of a storm event. For the purposes of this monitoring program, a storm event will be defined as any event with greater than 0.10 inches of rain.

During the FY21 reporting period, the following activities were accomplished:

	MCM 8 Maintenance Activities FY21 Wet Weather Screening						
Activity	Quantifiable Target	Achievement	Completion	Department			
Wet weather Monitoring	Conduct wet weather monitoring in 5 watersheds. If 5 monitoring events are not possible in one year due to drought or untimely rain events, monitoring events will be increased the following year.	2 wet weather monitoring events conducted	September 30, 2021	WPD			

Explanation of deficiencies

This program is implemented by the MS4 Coordinator. The position was being managed by a WPD employee in an acting role for several months until the position was filled in June 2021. Wet weather monitoring was not conducted during that time. Monitoring has been increased in FY22 and all stations will be monitored by the end of the permit term.

Proposed SWMP changes for the next reporting year

No changes are being proposed to the SMWP.

iii. Industrial and High-Risk Monitoring Program

The City of Austin does not conduct industrial and high-risk monitoring at facilities and instead conducts inspections at permitted facilities maintaining either an NOI or NEC. Inspections will be conducted once per permit term to verify compliance with TXR050000. Please refer to MCM 5 for further information on the industrial inspection program.

iv. Wet Weather Characterization Program

The City of Austin implements Option 2 of the permit, Representative Rapid Bioassessment Monitoring. Option 2 requires storm event monitoring in permit Years 1 and 4 and the implementation of an approved rapid bioassessment monitoring program. The stormwater permit was renewed in August 2018 and stormwater monitoring commenced in Year 1 of the permit, October 1, 2018-September 30, 2019. Storm event monitoring was not required during the reporting period, Year 3, October 1, 2020-September 30, 2021.

Representative Monitoring

The Watershed Protection Department (WPD) implements the City's Representative Monitoring Program. The principal objectives in the effort to satisfy the representative monitoring requirements for Part IV.A.2 of the permit are to characterize not only the quality and quantity of stormwater discharges, but the effect these discharges may have on aquatic environments in the Austin area. These objectives were met through the continued implementation of a monitoring program composed of traditional chemical water quality measures and biological integrity assessments.

Streams that receive stormwater discharges from Austin's MS4 have been selected to represent the variety and intensity of development pressures on Austin's surface water resources. Storm event monitoring is conducted at sites with USGS stations and at sites selected to characterize stormwater influences and flow during storm events. A minimum of four sites are sampled in Year 1 and Year 4 of the permit period. The composite samples are analyzed for nutrients, metals, field and physical parameters. An overview of Austin area watersheds and the representative monitoring site locations is included in Figure 1.

Stormwater Sampling Component

The stormwater monitoring component of the program consists of four monitoring sites at outfalls located within four watersheds. Information about each monitoring location has been included in Table 1.

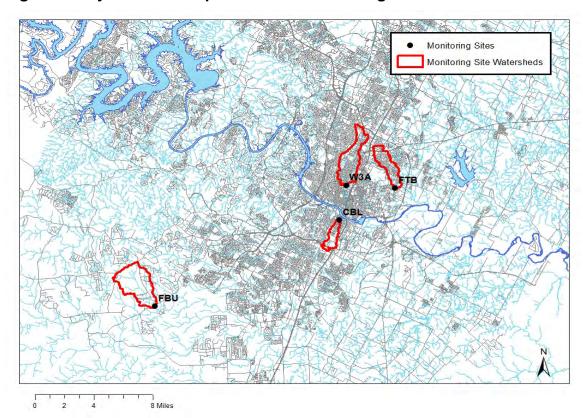

Figure 1. City of Austin Representative Monitoring Locations

Table 1. Stormwater Monitoring Site Locations

Watershed	Site No.	Monitoring Site Location	Drainage Are (Acres)	a Land Use	Receiving Water Body (Segment No.)
Bear Creek					
	001	Bear Creek @ FM 1826	3563	Undeveloped	1427
Waller Creek					
	002	Waller Creek @ 23rd St.	2524	Mixed Urban	1429
Fort Branch Creek					
	003	Fort Branch near Webberville Road	1600	Residential (Mixed Urban	1428
Blunn Creek	Blunn Creek				
	004	Blunn Creek near Little Stacey Park	786	Mixed Urban	1429

Sample Collection and Analysis

Stormwater monitoring consists of the collection of composite stormwater samples using automatic water quality samplers (Isco3700) and bubbler-type flow meters (generally ISCO 4200) at each outfall during storm events. The sample aliquots are collected for at least the first three hours of runoff or for the entire period of discharge if the duration is less than 3 hours. Sample aliquots are collected based on equal volumes of runoff. In addition to the composite

sample, one grab sample is collected at each of the four outfalls during the first 2 hours of runoff of the same runoff event. The amples are taken to an EPA-approved water quality laboratory for analysis. Grab samples are tested for the parameters listed in Table 2. Stormwater monitoring staff record pH (S.U.) and temperature (°C) data from the grab samples prior to transporting the samples to the laboratory.

Table 2. Grab Sample Parameters

PARAMETER	UNITS
Oil and Grease	mg/l
Fecal Coliform	colonies/100ml
Enterococci	colonies/100ml
Hardness (as CaCO ₃)	mg/l

In addition to the event mean concentration data collected from laboratory analyses, the following information is collected for each sampled storm:

- Rainfall depth (in.)
- Runoff volume (gal.)
- Event duration (hr.)
- Duration of the intervening dry period (hr.)

Rapid Bioassessment Component

(http://austintexas.gov/department/environmental-integrity-index)

The Environmental Integrity Index (EII) is the primary routine surface water monitoring program of the Watershed Protection Department (WPD) (COA1997) and is a critical piece of the WPD master planning process (COA 2001). WPD has implemented the EII as a tool to monitor and assess the ecological integrity and the degree of impairment of Austin's creek watersheds. In accordance with the approved rapid bioassessment monitoring program; the City of Austin performs EII studies on the following four watersheds on a semi-annual rotation: Barton Creek, Onion Creek, Walnut Creek, and Bull Creek. The WPD sampled the following Barton Springs Zone watersheds during the FY21 reporting period: Barton and Williamson creeks (See Table 5).

Sample sites within each watershed are selected for each defined sampling reach, with reaches representing contiguous areas of similar geomorphology and anthropogenic impacts. Each watershed is monitored for six index components: water quality, sediment quality, contact

recreation, aesthetics, physical integrity, and aquatic life support. Water quality samples are collected quarterly, and data are collected for all other components once per sampling year.

Each of the six components are averaged by site to produce the overall EII score. The aquatic life support score integrates benthic macroinvertebrate data collected using Surber samplers and periphyton (diatoms) collected from rock scrapings.

EII scores are reported on 100-point basis and are associated with narrative score descriptions, see (Table 4).

Table 4. Narrative Ell score descriptions

Narrative Score	Ell Score Range			
Narrative Score	Lower	Upper		
Excellent	89	100		
Very Good	76	88		
Good	64	75		
Fair	51	63		
Marginal	39	50		
Poor	26	38		
Bad	13	25		
Very Bad	0	12		

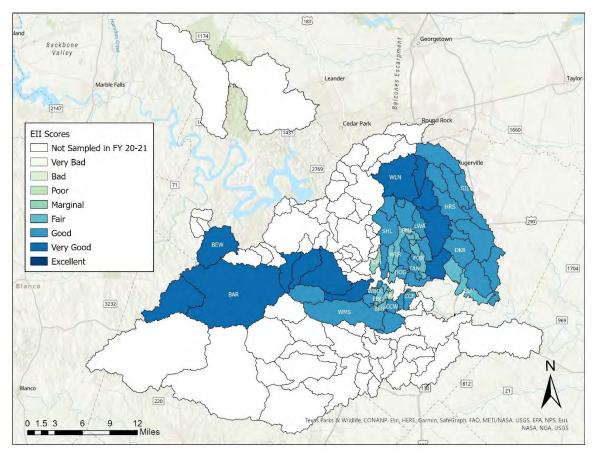

The EII narrative scores for all the EII watersheds sampled during the reporting period are found in Table 5. Watersheds in the Barton Springs Zone of the Edwards Aquifer are indicated with an asterisk (*) and watersheds monitored to fulfill permit requirements have been highlighted. EII sampling was conducted in 25 watersheds see (Table 5 and Figure 2). A total of 66 different reaches within the 25 watersheds were visited approximately 5 times for the EII program. The watersheds which required EII sampling this reporting period (Barton and Williamson creeks) are highlighted in Table 5. Data and resulting analyses obtained from monitoring additional watersheds are included for informational purposes only. Data from Onion, Bear, Slaughter, Little Bear, and Little Barton creeks will be submitted in FY22 as part of the 2-year rotational cycle of the EII.

Table 5. Total EII scores by watershed for FY 20-21 EII component. Watersheds containing the Barton Springs Segment of the Edwards Aquifer Recharge Zone noted with an asterisk (*).

Watershed	Wa	tershed Ell Score	Water Quality	Sediment Quality	Contact Recreation	Aesthetics	Habitat	Aquatic Life
		Very						
Barton Creek*	84	Good	67	78	74	97	92	94
D 0 1 W 1	0.7	Very	00			00	00	00

Boggy Creek	70	Good	59	78	52	79	69	81
Buttermilk Branch	60	Fair	56	68	38	74	50	76
Country Club East	64	Good	43	83	39	71	57	88
Country Club West	68	Good	63	68	44	80	67	86
Decker Creek	67	Good	53	89	40	72	73	75
East Bouldin	01	0000	00	00	10	72	70	10
Creek	56	Fair	53	68	49	66	43	58
Elm Creek	54	Fair	61	64	46	63	56	37
Fort Branch	61	Fair	62	80	38	69	51	68
Gilleland Creek	70	Good	40	85	54	80	78	84
Hamilton Creek	91	Excellent	81	87	100	98	86	94
Harper's Branch	45	Marginal	45	64	25	62	32	40
Harris Branch	70	Good	48	82	49	82	67	90
Johnson Creek	46	Marginal	41	69	34	62	28	44
Little Walnut								
Creek	70	Good	64	72	51	79	62	92
Maha Creek	64	Good	57	89	58	54	68	56
Shoal Creek	65	Good	59	65	43	79	68	75
Tannehill Branch	72	Good	63	78	55	82	62	90
Waller Creek	57	Fair	49	67	31	86	65	42
		Very						
Walnut Creek	76	Good	71	76	64	82	75	91
West Bouldin	0.5	Coord	60	70	40	70	00	70
Creek	65	Good	60	72	46	70	62	78
Wilbarger Creek	76	Very Good	48	85	72	80	85	88
Williamson Creek*	73	Good	61	85	56	82	73	79

Current total EII watershed scores indicate that 17 of 25 watersheds did score "good" or better in total overall EII score in the FY21 reporting period (see Table 5). Hamilton Creek yielded the highest total overall EII score, while Harper's Branch Creek yielded the lowest total overall EII score, classified a "marginal" score.

The change in the current EII scores was evaluated relative to baseline conditions established from 1996 to 1999. Change in a score of more than 12 points represents a significant change of at least one narrative category. There were no changes marked as significant decreases, decreases, or no change in EII sampling reach scores relative to baseline levels in the FY21 reporting period. The lowest increase in EII scores was +1 points, observed in the Barton and Harper's Branch Creek watersheds, which flow into Town Lake. Eight (8) sampling reaches yielded a substantial positive change from baseline. See Figure 3.

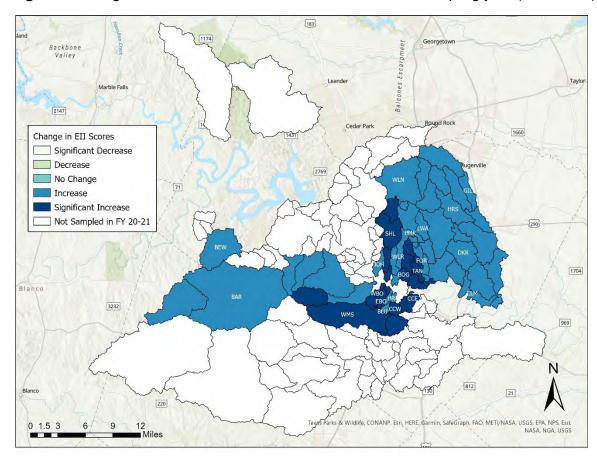

Figure 3. Change in FY21 EII reach total scores from baseline sampling year (1996-1999).

The change in EII scores from baseline assessments were improved in 100% of sampled reaches. The overall average change was a plus 10 points.

Other Water Quality Monitoring

Barton Springs Complex Sediment Monitoring

Due to the COVID-19 pandemic, staff was unable to collect sediment samples from within Barton Springs Pool in the FY21 reporting period. WPD staff in FY16 completed a new monitoring program to evaluate the spatial and temporal extent of organochlorine and PAH contamination in multiple watersheds in Austin including Barton Creek and published these summary reports in FY17.

http://www.austintexas.gov/watershed_protection/publications/document.cfm?id=276630 http://www.austintexas.gov/watershed_protection/publications/document.cfm?id=283711

Barton Springs Complex Water Quality Monitoring - Biweekly Monitoring

During the reporting period, WPD staff monitored for conventional water quality parameters, including physical parameters and nutrients, yielding a total of 12 samples from Barton Springs (see Appendix D). Nitrate-nitrogen levels were lower in FY21 with annual average nitrate-nitrogen concentrations of 1.37 mg/L.

Barton Springs and Associated Springs – Semi-annual and Annual Monitoring

An expanded list of water chemistry analytes was analyzed from Barton Springs on a quarterly basis (see Appendix D). One sample for organic analytes and five samples for ions and metals were collected from Barton Springs in this reporting period.

Organic analytes in water at Barton Springs were less than detection limits. Petroleum hydrocarbons have been detected in previous samples at Barton Springs at low levels but were not detected in this reporting period. Tetrachloroethene has been detected in water samples previously and from wells located in the recharge zone. These have been evaluated by WPD staff to determine if contaminant plumes may be sourced, potentially related to dry cleaning operations which use the solvent. No detected values of tetrachloroethene were observed in this reporting period.

Additional water quality measures for conventional analytes and physical parameters were conducted five times at Eliza Springs and Old Mill Springs and three times at Upper Barton Springs (see Appendix D). Some metals are not routinely collected for every event at these sites, but all data is reported. One sample was collected from Eliza and Old Mill Springs for an extended list of analytes including organic and volatile parameters in FY21 (see Appendix D). All organic analytes in water at Eliza and Old Mill springs were less than detection limits.

Barton Springs Continuous Monitoring

A multi-probe data logger has been continually deployed at a spring-fed cave at the bottom of Barton Springs Pool. The units are serviced every three to four weeks for cleaning and recalibration. Field parameter and discharge data continues to be monitored by the United States Geological Survey (USGS) in cooperation with City of Austin staff on a 15-minute interval basis and is available real-time via the web.

(http://waterdata.usgs.gov/tx/nwis/dv?referred module=sw&site no=08155500).

Physical parameters including temperature, conductivity, dissolved oxygen, turbidity, and pH may be accessed real-time or as daily averages from the USGS website. The City maintains a

contract with USGS. Barton Springs daily discharge averaged 49.8 ft³/s during the reporting year. The long-term historic average is 62 ft³/s. See Table 8.

Table 8. Multi-probe summary data for FY21

Parameter	Units	Mean	Minimum	Maximum	# Days Measured
Temperature	Deg C	21.81	21.8	21.83	365
Conductivity	uS/cm	665.24	661.27	669.28	365
Dissolved					
Oxygen	mg/L	5.39	5.36	5.42	365
рН	Std Units	7.09	7.08	7.10	365
Turbidity	FNU	1.97	1.81	2.20	365

Critical Environmental Feature Protection

During the site development permit application process, WPD reviewed site plans for large-scale residential and commercial development to ensure that Critical Environmental Features (CEF's) are properly identified and buffered from development. WPD staff identified new CEF's within Austin's jurisdictions, during a review of approximately 895 site development permit applications. Approximately 561 acres of new protective buffers were established by WPD staff, bringing the cumulative citywide total to approximately 8,617 acres.

v. Floatables Monitoring

Please refer to MCM1 of the Annual Report for information regarding the Floatables Monitoring program.

vi. Impaired Water Bodies and TMDL Requirements

Four Austin Streams

Walnut Creek, Waller Creek, Spicewood Tributary of Shoal Creek, Taylor Slough South

A TMDL was adopted and approved by the TCEQ and EPA in 2015 for 9 TMDLs in Four Austin Streams. The entire water bodies of each creek were included in the TMDL except for Waller Creek. Construction of the Waller Creek Flood Control Tunnel and associated redevelopment drastically changed the hydrodynamics of the lower portion of Waller Creek.

An Implementation Plan (I-Plan) was approved by the TCEQ and EPA in 2015 and the City of Austin participated in its implementation until its expiration in 2020. Stakeholders began meeting in June 2021 to work on the development of a new I-Plan. Local MS4 Operators that have jurisdictional areas along at least one of the creeks and interested stakeholders and community members have been engaged in developing strategies to improve water quality. The goal of the project is to reduce bacteria levels so that the creeks may be safe to use recreationally.

During the reporting period, the following activities were accomplished in the 4 Streams TMDL areas:

Wastewater Infrastructure and OSSFs

Austin Water (AW):

- Inspected133 City lift stations inspected weekly (city-wide)
- Responded to 427 Emergency response incidents and 89.71% of ER events were
 responded to within 1 hour (city-wide). AW investigated all sanitary sewer overflows
 (SSOs) and worked with the Watershed Protection Department (WPD) to recover as
 much spilled sewage as possible.
- Cleaned 1,390,365 linear feet of wastewater lines (city-wide)
- Conducted 67 OSSF inspections within 24 hours/next business day of receiving a customer complaint or becoming aware of a potential violation (city-wide)
- Conducted two OSSF investigations of illegal discharges within 24 hours/next business day of notification (city-wide)

Animal Sources

A kiosk is maintained at Walnut Creek Metro Park that includes an educational poster about pet waste. The kiosk is checked annually to ensure it is in good condition and to see if updates are necessary. WPD provides pet waste bags and dispensers to the Parks and Recreation Department (PARD) and PARD ensures that dispensers are available and full. During the reporting period, 2,856,000 pet waste bags and 50 pet waste bag dispensers were provided to PARD for city-wide distribution. WPD normally has a tabling event at Walnut Creek Metro Park annually; however, this was not done during FY21 due to COVID.

The WPD Education team mailed out educational information to pet-friendly business and pet-friendly apartment complexes within the City during the reporting period.

Residential Education

Watershed Protection Department

Earth Camp and Earth School was offered to 75.9% of AISD Elementary Schools. AISD has 79 elementary schools. Virtual Earth Camp was provided to 17 schools and Virtual Earth School was offered to an additional 43 schools.

Austin Water Utility

With the continued Covid-19 pandemic, Austin Water was able to participate in just one (1) inperson community outreach event during the reporting timeframe.

DateEvent NameEstimated Booth Visitors8/13-15/2021Austin Fall Home + Garden Show300+

In addition, Austin Water provided Fats, Oils, and Grease (FOG) related outreach materials to be included in bags distributed to the Austin community on National Night Out despite there not being an opportunity to have a booth.

During the pandemic, Austin Water took time to update/refresh the public outreach booth signage. This includes new, informative tabletop posters.

Illicit Discharge Detection and Elimination

Dry Weather Screening

During FY21, the Dry Weather Screening program was shifted to be the responsibility of a different workgroup. Because of the shift in responsibilities, it was decided to take the opportunity to update the program to focus on outfalls in areas where historical illicit discharge data showed that illicit discharges were more likely to occur. After designating outfalls for dry weather screening, a new Quality Assurance Project Plan (QAPP) was written for the Dry Weather Screening program during the fiscal year. No dry weather screenings were performed during FY21; screening of the newly designated outfalls under the new QAPP will resume in FY22, with all outfalls screened by the end of the permit term.

Homeless Encampments

The WPD and Parks and PARD have each funded two full time employee positions to respond to concerns related to individuals experiencing homelessness in the field.

The WPD Environmental Project Coordinator has continued to prioritize encampments for clean-up and respond to citizen concerns regarding incidents on WPD property. For the reporting period, WPD conducted 21 clean-ups and removed 69 tons of material.

The PARD Homeless Encampment Coordinator has continued to visit encampments and educate encampment residents and assist cleanup crews with resident engagement. During the reporting period, clean-ups conducted through PARD's contract resulted in the removal of 147 tons of material from City parkland.

The Public Works Department (PWD) visits encampment sites in the Right of Way (ROW) and prioritizes sites for clean-up. During the reporting period, PWD conducted 693 site visits and removed 814.29 tons of material.

The Austin Resource Recovery (ARR) removed 772 tons of debris through the Violet Bag/Encampment Cleanup program during the reporting period.

Gilleland Creek

A TMDL was adopted by the TCEQ in 2007 and approved by the EPA in 2009 for the Gilleland Creek Watershed due to concentrations of indicator bacteria exceeding the criteria used to evaluate attainment of contact recreation use. An I-Plan was approved by the TCEQ and EPA in 2011 and revised in 2017. The City of Austin has participated in its implementation since its inception. The Gilleland I-Plan expires in 2022.

Residential Education

With the continued Covid-19 pandemic, Austin Water was able to participate in just one (1) inperson community outreach event during the reporting timeframe.

DateEvent NameEstimated Booth Visitors8/13-15/2021Austin Fall Home + Garden Show300+

In addition, Austin Water provided Fats, Oils, and Grease (FOG) related outreach materials to be included in bags distributed to the Austin community on National Night Out despite there not being an opportunity to have a booth.

During the pandemic, Austin Water took time to update/refresh the public outreach booth signage. This includes new, informative tabletop posters.

Illicit Discharge Detection and Elimination

Dry Weather Screening

During FY21, the Dry Weather Screening program was shifted the responsibility of a different workgroup. Because of the shift in responsibilities, it was decided to take the opportunity to update the program to focus on outfalls in areas where historical illicit discharge data showed that illicit discharges were more likely to occur. After designating outfalls for dry weather screening, a new Quality Assurance Project Plan (QAPP) was written for the Dry Weather Screening program during the fiscal year. No dry weather screenings were performed during FY21; screening of the newly designated outfalls under the new QAPP will resume in FY 22, with all outfalls screened by the end of the permit term.

Wastewater Infrastructure and OSSFs

Austin Water Utility (AW):

- Inspected133 City lift stations inspected weekly (city-wide).
- Responded to 427 Emergency response incidents and 89.71% of ER events were responded to within 1 hour (city-wide). AW investigated all sanitary sewer overflows (SSOs) and worked with WPD to recover as much spilled sewage as possible.
- Cleaned 1,390,365 linear feet of wastewater lines (city-wide).
- Conducted 67 inspections within 24 hours/next business day of receiving a customer complaint or becoming aware of a potential violation (city-wide).
- Conducted two investigations of illegal discharges within 24 hours/next business day of notification (city-wide).

Benchmarks

The City utilizes the Waste Load Allocations (WLA) as identified in the two approved TMDLs, Four Austin Streams and Gilleland Creek. WLAs were determined for each sampling event and compared to the benchmark.

All events were below the benchmark except for one, Walnut Creek at Old Manor Road, Assessment Unit 1428_03. The average of the three WLAs for that monitoring site in FY21 was below the benchmark. No BMPs changes are being proposed in response to this one-time event.

Benchmark Assessment – Four Austin Streams

APPENDIX A

Water Quality Improvements
Water Quality Degradation
Measurable Goals Progress
Measured Reductions in Pollutants

Water Quality Improvement

The City has seen encouraging trends in bacteria reductions in TMDL waterbodies over the last 5 years. Austin Water is implementing a scheduled inspection program in TDML areas and increased bacteria source isolation investigations have assisted in locating leaks and improving water quality.

Water Quality Degradation

Increased trash in waterbodies in the City full purpose area could potentially contribute to water quality degradations. Several departments have implemented internal programs or established contracts with an external vendor to remove trash within their jurisdictional areas. A trash survey is being conducted by the Watershed Protection Department (WPD) in FY22 to obtain further data on the issue.

Progress Towards Measurable Goals

The City has improved the SWMP significantly to establish clear and measurable goals that are achievable. The City has continued to strive to meet and exceed measurable goals. This progress has been detailed in each MCM section within this report.

Measured Reductions in Pollutants

The City has implemented numerous programs to reduce pollutants in stormwater and improve water quality. The following displays measurements of the City's efforts to reduce pollutants during the FY21 reporting period:

- Collected 2,876 tons of dirt, leaves, and debris from roadways throughout the City.
- Collected 3,403 tons of litter from ROW and streets.

- Removed approximately 1.78 tons of floatable trash and debris from two floatable boom locations.
- Removed approximately 6.18 tons of floatable trash and debris from Lady Bird Lake.
- Removed 31 tons of dead animals from roadways.
- Removed 527 tons of illegally dumped waste from public areas.
- Properly disposed of approximately 1,993,409 pounds of household hazardous waste.
- Recycled 98,783 pounds of waste oil and 1,650 pounds of oil filters.
- Recycled 121,148 pounds of paint.
- Recovered approximately 6,145,739 gallons and 438 cubic yards of pollutants as a result of pollution investigations.

APPENDIX B

Annual Expenditures & Assessment of Controls

The City has compiled annual expenditure information for the FY21 reporting period from October 1, 2020 to September 30, 2021 and the proposed budget for the FY22 reporting period from October 1, 2021 to September 30, 2022. The table below is a breakdown of the major elements of the SWMP and reflects current operation budgets of City programs utilized to satisfy the City's TPDES MS4 stormwater permit requirements. The expenditure information may in some cases include expenses for activities not directly required by the permit.

Minimum Control Measure (MCM)	FY21	FY22
	Actual	Budget
MS4 Maintenance Activities	\$58,218,647	\$63,480,141
1Post-Construction Storm Water Control Measures	\$8,473,925	\$8,455,608
2 Illicit Discharge Detection and Elimination	\$14,347,021	\$15,961,815
Pollution Prevention/Good Housekeeping for Municipal Operation	\$213,925	\$208,548
Industrial and High Risk Runoff	\$1,046,567	\$1,175,800
Construction Site Stormwater Runoff	\$3,405,208	\$3,032,728
Public Education and Outreach/Public Involvement and Participation	\$5,188,276	\$5,950,769
Monitoring Programs	\$2,076,250	\$2,106,942
Total Expenditures	\$92,969,819	\$100,372,351

No revisions to the assessment of controls or fiscal analysis reported in the permit application are necessary.

APPENDIX C

NPDES & TPDES Notices and COA Inspection Summary

Below is a summary of the number of Notices of Intent, Change, Termination, and Small Construction received from construction site operators and industrial facilities applying for NPDES and TPDES coverage for storm water discharges. The number of inspections conducted by the City of Austin at construction sites and industrial facilities during the reporting period has been included.

During the reporting period, the City received the following submissions:

TPDES Construction General Permit (CGP) TXR150000

- 58 Notices of Intent
- 48 Notices of Termination
- 65 Construction Site Notices
- 15 Notices of Change

TPDES Multi-Sector General Permit (MSGP) TXR050000

- 10 Notices of Intent
- 0 No Exposure Certification

TPDES General Permit TXG110000

• 0 Notices of Intent

The WPD also maintains a database of industrial facilities in the City full purpose jurisdiction that have submitted Notices of Intent or No Exposure Certifications to the TCEQ. This information is obtained and updated by referring to TCEQ Central Registry and can be found in MCM5 of this report.

During the reporting period, the following amount of construction and industrial inspections were conducted by the City:

- 22,615 construction inspections at permitted development sites.
- 452 industrial inspections at facilities that store hazardous materials.
- 22 industrial inspections at facilities that may be contributing a substantial pollutant load to the MS4.

METHYL PARATHION	UG/L	0.017	0.017
METHYL TERT-BUTYL ETHER (MTBE)	UG/L	0.638	0.638
METHYLENE CHLORIDE	UG/L	1.020	1.020
MP-CRESOL	UG/L	6.150	6.150
N-NITROSO-DI-N-BUTYLAMINE	UG/L	0.403	0.403
N-NITROSO-DI-N-PROPYLAMINE	UG/L	0.777	0.777
N-NITROSODIMETHYLAMINE	UG/L	6.640	6.640
N-NITROSODIPHENYLAMINE	UG/L	0.427	0.427
NAPHTHALENE	UG/L	0.524	0.524

Appendix D Monitornig Data		1	
NITROBENZENE	UG/L	0.390	0.390
O-XYLENE	UG/L	0.576	0.576
PARATHION (PARATHION ETHYL)	UG/L	0.016	0.016
PENTACHLOROBENZENE	UG/L	0.420	0.420
PENTACHLORONITROBENZENE	UG/L	0.498	0.498
PENTACHLOROPHENOL	UG/L	0.129	0.129
PETROLEUM HYDROCARBONS >C12-C28	UG/L	0.000	0.000
PETROLEUM HYDROCARBONS >C28-C35	UG/L	0.000	0.000
PETROLEUM HYDROCARBONS C6-C12	UG/L	0.000	0.000
PETROLEUM HYDROCARBONS C6-C35	UG/L	0.000	0.000
PHENANTHRENE	UG/L	0.624	0.624
PHENOL	UG/L	1.500	1.500
PYRENE	UG/L	0.587	0.587
PYRIDINE	UG/L	5.330	5.330
STYRENE	UG/L	0.628	0.628
TETRACHLOROETHYLENE (TETRACHLOROETHENE)	UG/L	0.607	0.607
TOLUENE	UG/L	0.655	0.655
TOTAL CHLORDANE	UG/L	0.002	0.002
TOTAL CRESOLS	UG/L	6.150	6.150
TOXAPHENE	UG/L	0.004	0.004
TRANS-1_2-DICHLOROETHENE (TRANS-1_2-DICHLOROETHYLENE)	UG/L	0.701	0.701
TRANS-1_3-DICHLOROPROPENE	UG/L	0.627	0.627
TRANS-1_4-DICHLORO-2-BUTENE	UG/L	0.400	0.400
TRICHLOROETHYLENE (TCE)	UG/L	0.521	0.521
TRICHLOROFLUOROMETHANE	UG/L	0.651	0.651
TRIHALOMETHANE	UG/L	0.001	0.001
VINYL ACETATE	UG/L	0.804	0.804
VINYL CHLORIDE	UG/L	0.702	0.702
XYLENES	UG/L	1.600	1.600
