

The freshwater fish diversity found in Barton Creek

The Barton Creek watershed hosts a wide diversity of fishes. Historically, 41 species have been recorded throughout its waters. More recent surveys detected a total of 28 species, indicating a decline in overall species richness. Here are some of the fishes you may find:

www.fishesoftexas.org

Largemouth Bass (*Micropterus salmoides*)

Weed Shiner (*Notropis texanus*)

Longear Sunfish (*Lepomis megalotis*)

Western Mosquitofish (*Gambusia affinis*)

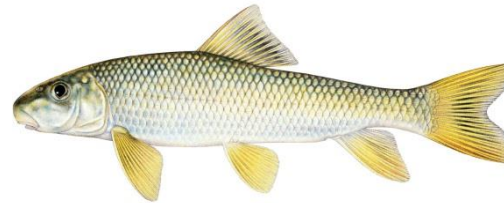

Flathead Catfish (*Pylodictis olivaris*)

Bluegill (*Lepomis macrochirus*)

Fathead Minnow (*Pimephales promelas*)

Gray Redhorse (*Moxostoma congestum*)

Greenthroat Darter (*Etheostoma lepidum*)

Red Shiner (*Cyprinella lutrensis*)

Mexican Tetra (*Astyanax mexicanus*)

Rio Grande Cichlid (*Herichthys cyanoguttatus*)

Inland Silverside (*Menidia beryllina*)

Black Bullhead (*Ameiurus melas*)

Guadalupe Bass (*Micropterus treculii*)

Blackstripe Topminnow (*Fundulus notatus*)

Redspotted Sunfish (*Lepomis miniatus*)

Channel Catfish (*Ictalurus punctatus*)

Green Sunfish (*Lepomis cyanellus*)

American Eel (*Anguilla rostrata*)

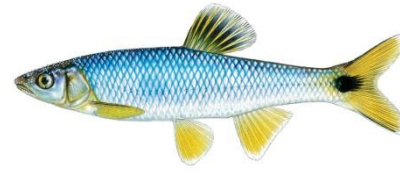

Spotted Bass (*Micropterus punctulatus*)

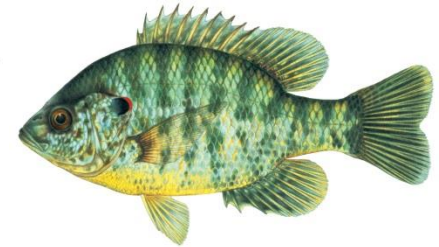

Mimic Shiner (*Notropis volucellus*)

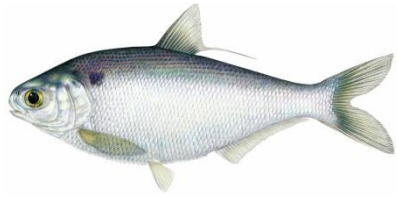

Bullhead Minnow (*Pimephales vigilax*)

Blacktail Shiner (*Cyprinella venusta*)

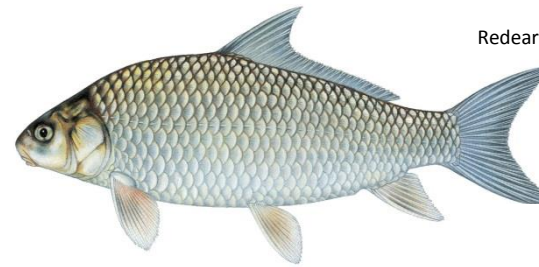

Redear Sunfish (*Lepomis microlophus*)

Gizzard Shad (*Dorosoma cepedianum*)

Redbreast Sunfish (*Lepomis auritus*)

River Carpsucker (*Carpiodes carpio*)

Yellow Bullhead (*Ameiurus natalis*)

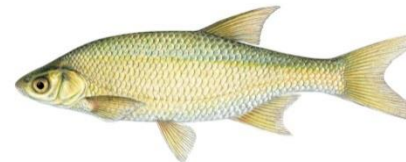

Warmouth (*Lepomis gulosus*)

Common Carp (*Cyprinus carpio*)

Central Stoneroller (*Campostoma anomalum*)

Golden Shiner (*Notemigonus crysoleucas*)
