

NORTH ACRES STORM DRAIN IMPROVEMENTS

WALNUT CREEK WATERSHED

PROTECTING LIVES & PROPERTY

The Watershed Protection Department is working on a project to reduce flood risk in the North Acres neighborhood. The project is divided into two phases. The first phase includes restoring curbs and gutters, where feasible,

to improve drainage. During the second phase, we will install storm drain pipes and inlets and restore the remaining gutters. The new storm drain system will reduce flooding on the streets.

TYPICAL STORM DRAIN SYSTEM

INLETS AND CURBS CAPTURE RAIN WATER.

UNDERGROUND PIPES CARRY THE WATER.

RAIN WATER IS RELEASED INTO A CREEK.

Project Timeline

Phase 1: Restoring Road Gutters,
Two rounds of construction, starts 2021

Phase 2: Storm Drain System,
Construction anticipated in 2024
